IN THE CIRCUIT COURT OF PULASKI, ARKANSAS

SEAN LYNN; and
LAURA HAMMETT — PLAINTIFFS

v. Case No. 60CV-26-216

BOARD OF TRUSTEES of the UNIVERSITY of ARKANSAS, in their official capacity;
et al. — DEFENDANTS

Brief in Support of Plaintiffs' Reply to Motion to Quash Subpoenas

I. Reports based on firsthand observations are relevant; short-term employment records are not and are unduly prejudicial.

Defendants Margolick and Beumeler assert that employment histories are relevant to a determination of Lynn's physical condition and abilities. *Defs. Resp. to Pls. Mot. Quash*, ¶ 1.

The information contained in Lynn's short-term employment records is beyond the scope of discovery permitted by Ark. R. Civ. P. 26(b)(1), as it is not proportional to the needs of the case and provides minimal probative value. Ark. R. Civ. P. 26(b)(1).

While such records may show that Lynn has difficulty maintaining employment, they are unlikely to accurately reflect the cause of that difficulty, particularly where employers may not document disabilities or reasons for termination. Ark. R. Civ. P. 26(c).

Any limited probative value is substantially outweighed by the risk of embarrassment and misuse of sensitive personal information, including disclosure of negative performance evaluations made without an understanding of Lynn's Hospital Acquired Conditions. Ark. R. Civ. P. 26(c).

Short-term employers and co-workers necessarily have limited interaction with Lynn and lack a reliable foundation to assess his medical condition or functional capacity. Ark. R. Civ. P. 26(b)(1).

Better and irrefutable evidence of Lynn's present condition exists. Lynn gave copies of his medical records after leaving UAMS to the Board's counsel. Hammett has offered to bring Lynn's records to Breumeler and Margolick's counsel for inspection. Counsel has or can inspect photographs of damage Lynn sustained due to Post Traumatic Epilepsy, such as the picture in *Pls. Ex. 10* taken on August 1, 2024.

While incomplete and inaccurate, Margolick, Beumeler and other UAMS personnel generated contemporaneous medical records documenting his condition, treatment, and behavior. *Pls. Ex.* 6.

The medical report generated by UAMS on April 29, 2025 reflects that Lynn was administered multiple sedating and deliriogenic medications and was not meaningfully evaluated by psychiatry for the first eleven days during his confinement. *Pls. Ex. 6*, at 168, 179.

UAMS personnel had access to Lynn's phone and identifying information but failed to contact family or obtain basic medical history, including known allergies and prior head injuries, before initiating invasive treatment. *Pls. Ex. 6*.

These firsthand observations and records are far more telling and relevant than speculative third-party impressions contained in short-term employment records. Ark. R. Civ. P. 26(b)(1).

II. The Court can and should limit Margolick and Beumeler's discovery as a sanction for spoliation of evidence.

A. Margolick and Beumeler knew or should have known that litigation would be pursued for unlawful treatment and failed to preserve relevant evidence.

UAMS admits that it does not possess surveillance footage of Lynn during his admission from January 13 to 27, 2024, and contends that it had no duty to preserve such evidence. *Pls. Ex. 11*, at 21 (responding to interrogatory 40 in the Claims Commission claim No. 250191.

However, Margolick and Beumeler and other UAMS personnel had actual notice of potential litigation no later than January 21, 2024, when Hammett informed a treating physician of her intent to seek legal counsel. Omitted from *Pls. Ex. 6*.

Notice was further established on January 27, 2024, when Hammett expressly referenced legal claims, including constitutional violations, during a recorded interaction with UAMS providers. *Pls. Ex. 6*, at 324.

UAMS personnel acknowledged involvement of legal counsel during this period, yet no litigation hold was implemented and relevant surveillance footage was allowed to be overwritten in contradiction to policy. *Pls. Ex. 6*, at 324.

Importantly, UAMS requires residents and probably others to take a class on workday that explains a patient's right to refuse treatment. Margolick and Beumeler and other UAMS personnel therefore knew or should have known that evidence of non-consensual treatment would be material to anticipated litigation. Ark. Code Ann. § 16-114-206.

B. The destroyed evidence was highly relevant and supported the plaintiffs' claims.

Margolick and Beumeler had access to surveillance footage capturing Lynn's demeanor, movements, and interactions with staff during the events at issue.

This footage would have shown Lynn's condition, how Lynn was returned to a room when he was able to get out, who entered Lynn's room, and movement throughout the facility, all of which are directly relevant to claims of unlawful restraint, medical battery, and lack of consent.

The destruction of this evidence substantially impairs the plaintiffs' ability to prove their claims and rebut the assertions made by Margolick and Beumeler. Now the defendants want to rely on personnel records instead of medical reports and observation of Lynn's communications.

C. Arkansas law supports sanctions for spoliation under these circumstances.

A circuit court is not required to make a specific finding of bad faith prior to instructing the jury on spoliation of evidence. AMI 106; *Bunn Builders, Inc. v. Womack*, 2011 Ark. 231, at 11.

Where destruction of evidence prejudices a party's ability to present its case, sanctions and adverse inferences are appropriate. *Bunn Builders, Inc.*, 2011 Ark. 231, at 13; *Goff v. Harold Ives Trucking Co.*, 342 Ark. 143, 150, 27 S.W.3d 387, 391 (2000).

Courts distinguish routine destruction from situations where a party knows or should know evidence is relevant to litigation. *Tomlin v. Wal-Mart Stores, Inc*., 81 Ark. App. 198, 209, 100 S.W.3d 57 (2003).

Here, unlike in *Tomlin*, Margolick and Beumeler had notice of potential litigation and failed to preserve evidence that was central to the claims and defenses in this case.

Under these circumstances, limitations on discovery—including quashing subpoenas seeking less relevant third-party records—are an appropriate sanction. *Goff*, 342 Ark., at 150.

III. Disclosure of Lynn's social security number and employment records creates unnecessary risk and embarrassment.

Disclosure of Lynn's social security number and employment records presents a significant risk of misuse and identity theft and is not necessary to resolve the issues in this case. Ark. R. Civ. P. 26(c).

Such disclosure would also result in unnecessary embarrassment through the dissemination of sensitive personnel information unrelated to the claims at issue. Ark. R. Civ. P. 26(c).

A protective order is insufficient under the circumstances, as Margolick and Beumeler and other UAMS personnel previously failed to comply with statutory safeguards governing involuntary treatment. Ark. Code Ann. §§ 20-9-604; 20-47-207; 20-47-211.

Margolick and Beumeler did not petition a court for authorization to treat Lynn without consent and did not advise him of his statutory right to counsel during involuntary hospitalization. Ark. Code Ann. §§ 20-9-604; 20-47-207; 20-47-211. There is no reason they would seek court approval before using or disseminating information protected by court order.

Under these circumstances, quashing the subpoenas is the most appropriate means of protecting Lynn from further harm. Ark. R. Civ. P. 26(c). Marolick and Beumeler should be required to give immediate notice to the subpoenaed parties.

Respectfully submitted,

May 11, 2026

HPI:
33 y/o M s/p fall off ladder on 1/13/24 - fell 30 feet off ladder - was cleaning gutters - admitted to UAMS 1/13/24-1/27/24

ENT - audiology 6-8 months -- ossicle dislocation
Trauma surg --
DC summary - SDH, ICH, nasal bone fracture, abdominal aorta injury, temporal bone fracture, TBI Impaired functional mobility, balance, gait, enduranceCognitive impairmentNeurobehavioral sequelae of traumatic brain injurySIADH Urethra injury - pulled foley catheters
Neurosurg-- Dr Krisht?
smoking
CT HEAD w/o done 2/8/24 shows persistent L hemisphere temporal lobe abnormality consistent with sequela from subacute, nonhemorrhagic infarct

I reviewed hospital records with following notes:
ENT - Recommended f/u with audiology 6-8 months -- ossicle dislocation. Sean says he has intermittent tinnitus and hearing loss still on the L side.

Trauma surg -- admitted, monitored his hemorrhage, and took primary control. Recommended against him leaving AMA from ICU.

DC summary - problem list included: SDH, ICH, nasal bone fracture, abdominal aorta injury, temporal bone fracture, TBI Impaired functional mobility, balance, gait, enduranceCognitive impairmentNeurobehavioral sequelae of traumatic brain injurySIADH
Urethra injury - pulled foley catheters. Urology consulted, expected no sequelae fromt his. No pain, no hematuria currently.
Neurosurg-- Dr Ali Krisht? He'd like referral to Dr. Krisht for further management/monitoring of SDH.
smoking - current smoker, not addressing this today> Says he uses home grown tobacco.
CT HEAD w/o done 2/8/24, ordered by his chiropractor, shows persistent L hemisphere temporal lobe abnormality consistent with sequela from subacute, nonhemorrhagic infarct

Still having frequent headaches, taking propranolol 20mg QID plus advil PRN for this.

Social: current smoker, current alcohol use, denies drug use
Medical history, surgical history, allergies, and family history reviewed.

Medical History: Medical History Verified.

Surgical History: L index finger 2008.

Hospitalization/Major Diagnostic Procedure: admitted for fall - fell 10-35 feet (reports vary) off ladder admitted to UAMS level 2 trauma 1/13/24.

Provider: JONATHAN BERRY, MD

Medications: Taking Propranolol HCl 20 MG Tablet 1 tablet orally four times a day , Notes to Pharmacist: migraine ppx, Medication List reviewed and reconciled with the patient

Allergies: N.K.D.A.

Objective:

Vitals:
BP: **106/68** mm Hg, HR: **74** /min, Oxygen sat %: **98** %, Ht: **71** in, Wt: **226** lbs, Wt-kg: 102.51, BMI: **31.52** Index, Body Surface Area: 2.26, Ht-cm: 180.34.

Examination:
General Examination:
General appearance: alert, well-nourished and in no acute distress.
Head: No visible bruising..
Eyes: sclera anicteric, extraocular movement intact (EOMI).
Ears: auditory canal clear, tympanic membrane intact and clear, no hemotympanum. Loss of Umbo on L side. .
Nose: nares patent.
Oral cavity: mucosa moist.
Throat: clear, no exudate.
Neck / thyroid: no masses and/or tenderness.
Lymph nodes: no cervical or supraclavicular lymphadenopathy.
Heart: regular rate and rhythm without murmurs, gallops, clicks or rubs, S1 and S2 are normal and no S3 and S4 gallop, no jugular venous distention.
Lungs: clear to auscultation bilaterally, with good air movement and no rales, rhonchi or wheezes.
Abdomen: soft with good bowel sounds, nontender, and no masses.
Extremities: MAEW, no pretibial edema.
Peripheral pulses: 2+ radial bilat, symmetric.
Neurologic: CN 2-12 grossly intact bilaterally (note of diminished hearing on L), Rapid alternating movements normal, finger-nose-finger normal, patellar reflex 1+. No nystagmus. EOMI. PERRLA. Sensation to light touch normal throughout. Strength of major joints of extremities 5/5 throughout.
Exhibits some wordfinding difficulty.
Psych: Alert and oriented, cognitive function intact cooperative with exam. Blunted affect. Speech reduced overall but 100% understandable and non-tangential. .

Referral To:Physical Medicine and Rehabilitation
Reason:Refer to Dr. Rani Gardner at UAMS PM&R

4. Word finding difficulty
Notes: Persistent neuro deficit, congruent with finding of temporal lobe damage.
Referral To:Physical Medicine and Rehabilitation
Reason:Refer to Dr. Rani Gardner at UAMS PM&R

5. Unspecified fracture of skull, initial encounter for closed fracture
Notes: Left AMA but suspect healing normally. Not mentioned as unhealed on recent CT head (did not have comparison from UAMS on the read).
Referral To:Neurological Surgery
Reason:Dr. Ali Krisht at CHI.

Referral To:Ear, nose and throat surgeon
Reason:Ark ENT

6. Unspecified fracture of facial bones, initial encounter for closed fracture
Notes: Left AMA but suspect healing normally. Not mentioned as unhealed on recent CT head (did not have comparison from UAMS on the read).
Referral To:Neurological Surgery
Reason:Dr. Ali Krisht at CHI.

Referral To:Ear, nose and throat surgeon
Reason:Ark ENT

7. Dislocation of ossicles of left ear
Notes: Off and on symptoms persistent. Was recommended 6 months f/u with audiology by inpatient ENT on initial eval but will go ahead and set up referral
Referral To:Ear, nose and throat surgeon
Reason:Ark ENT

8. Neurobehavioral sequelae of traumatic brain injury
Notes: Unclear if this is persistent as I do not know his baseline. Agree with recommendation to avoid high stimulus activities for now.
Referral To:Neurological Surgery
Reason:Dr. Ali Krisht at CHI.

Referral To:Physical Medicine and Rehabilitation
Reason:Refer to Dr. Rani Gardner at UAMS PM&R

9. Traumatic subdural hematoma with loss of consciousness, sequela
Notes: Refer Dr. Krisht for recheck and clearance.

You are invited attend our monthly Walk with a Doc event!

Each month, a UAMS physician leads a walk for those in the community. The walk takes place one Saturday a month at 9 a.m. at the UAMS Fitness Court, located at the corner of Fourth and Cedar streets on the UAMS Little Rock campus.

The July walk will be Saturday, July 13. The guest speaker will be UAMS physician Manisha Singh, M.D. She will speak along with UAMS medical student, Jared Hastings, about the importance of drinking electrolytes and salts during the summer heat. After the short talk, this FREE walking group will walk until 10 a.m., giving community members the chance to talk with both Singh and Hastings.

Clinical Notes

Telephone Encounter

Williams, Edward, RN at 1/29/2024 1552

Version 1 of 1

Author: Williams, Edward, RN | Service: — | Author Type: Nurse Triage Call Center Support Staff
Filed: 1/29/2024 5:15 PM | Encounter Date: 1/29/2024 | Status: Signed
Editor: Williams, Edward, RN (Nurse Triage Call Center Support Staff)

Dr. Sacha McBain asked us (Brain Injury Program) to follow up with Ms. Lynn due to a concern over signing out AMA and not pursuing TBI rehab. Sheila Beck PT made the initial contact then asked me to call regarding questions about hyponatremia. I spoke to Ms. Lynn for >30 min. and we discussed the following:

They had a bad experience at UAMS and she used the terms such as assault, battery, holding him against his will, abuse, etc. He has a PCP appointment on Thursday with her physician. She's concerned he needs to have his sodium checked multiple times between now and Thursday and he won't have insurance until Feb. 1st. She asked me if UAMS would test his sodium levels for free between now and then without charge because of their bad experience. I recommended she speak with a patient representative (I will find someone) who can address her UAMS experience. In the meantime, she should communicate with the PCP's office regarding labs and to call 911 or take him to a hospital for any concerns. I stressed the dangers of hypo or hyper natremia. She verbalized understanding.

We also discussed the importance of TBI rehab during this window of time and how proper rehab now pays off in multiples in the long run. He needs to get as much rehab as possible. She stated they will rehab at home with a holistic approach that more closely aligns with they health philosophy. She said they are not uneducated on health because her father was a surgeon and Chief of Staff at his hospital.

I sent her my credentials and contact information and encouraged her to contact me anytime for any reason. She thanked me for the call.

Eddie Williams RN, BSN, CBIS

ED Ultrasound FAST WITH THORACIC Resulted: 01/14/24 0717, Result status: Final result

Ordering provider: Kishimoto, Yusuke, MD 01/13/24 1720
Resulted by: Watkins, Adam S, MD
Performed: 01/13/24 1705 - 01/13/24 1712
Resulting lab: UAMS QPATH
Order status: Completed
Filed by: Interface, Rad Results In 01/14/24 2124
Accession number: 52941186

Impression:
EFAST_POCUS:

Exam Information:
Images are digitally stored for quality assurance review, retrievability, and archival purposes.:
Exam type: Diagnostic

Indication(s) for Exam:
The exam was performed with the following indications:: Blunt trauma

Views Obtained:
The following spaces were examined as part of the FAST exam:: Pericardial, pleural, Morison's pouch, splenorenal, and retro-vesicular spaces were examined.

Findings:
Pericardial space: Fluid absent
Pericardial tamponade: Absent
Morison's pouch (RUQ): Fluid absent
RIGHT pleural space: Fluid absent
Perisplenic (LUQ): Fluid absent
LEFT pleural space: Fluid absent
Retrovesicular space: Fluid absent
RIGHT lung sliding: Lung sliding present
Left lung slide: Lung sliding present

Interpretation:
Abdomen: No pathologic free fluid
Pericardial space: No pathologic free fluid
Tamponade: No evidence of tamponade
Pleural fluid: No pathologic free fluid
Lung: Normal lung slide

Confirmatory Study:
What confirmatory study was done?: Xray

Sign/Submit:
Submit Exam For QA Review: Yes
Attending Physician Attestation:: I was present and directly participated in the limited ultrasound procedure, have reviewed the imaging and the above represents my personal interpretation as the attending physician

Weight:				
Height:				

I have seen and examined this patient and discussed the H&P and plan with the *resident*. I have personally formulated all aspects of the MDM for the care of this patient. I agree with the note and have inserted my edits as needed.

I have personally reviewed all laboratory results, EKG tracings, and individual images separate from any report or interpretation by another provider.

Disposition: Admitted to SICU the case was discussed with the admitting physician
Condition stable

Critical Care Note:

Sean Patrick Lynn

I have spent in excess of 30 minutes discontinuously at the bedside providing critical care services for this patient as He is under imminent threat of demise of life threatening deterioration from his/her injuries and/or organ dysfunction and requires frequent assessments in a monitored Emergency Department Bed and critical interventions involving highly complex decision making to minimize the risk of mortality, morbidity, organ dysfunction, and/or organ damage. These services include, but are not limited to: conversations with the primary team, consultants, case management, the nursing staff, and multiple members of the care team. It also includes time spent personally reviewing all lab and diagnostic studies, and reviewing all culture data and medications. This time is exclusive of procedures and

teaching activities.

Adam Watkins, M.D.

Consults:Trauma was consulted by phone and/or in person. The presenting problem, results of Emergency Department work-up, tentative diagnosis(es), and potential plan were directly discussed with this consulting provider.

Medications Given in the Emergency Department:

Medications

ciprofloxacin-dexAMETHasone (Ciprodex) 0.3-0.1 % otic suspension (4 drops Right Ear Given 1/21/24 1026)
acetaminophen (Tylenol) tablet 975 mg (975 mg Oral Given 1/21/24 1025)
enoxaparin (Lovenox) syringe 50 mg (50 mg Subcutaneous Given 1/21/24 1026)
OLANZapine (ZyPREXA) 10 mg (injection) **CABINET OVERRIDE (has no administration in time range)**
polyethylene glycol (Glycolax) packet (17 g Oral Given 1/21/24 1025)
carboxymethylcellulose sodium (Refresh Plus) 0.5 % ophthalmic solution (has no administration in time range)
QUEtiapine (SEROquel) tablet 200 mg (200 mg Oral Given 1/20/24 2237)
QUEtiapine (SEROquel) tablet 100 mg (100 mg Oral Given 1/21/24 1025)
propranolol (Inderal) tablet 20 mg (20 mg Oral Given 1/21/24 1025)
OLANZapine zydis (ZyPREXA) disintegrating tablet 5 mg (5 mg Oral Given 1/21/24 1025)
sodium chloride soluble tablet 2 g (2 g Oral Given 1/21/24 1025)
divalproex (Depakote) enteric coated tablet 500 mg (500 mg Oral Given 1/21/24 1025)
OLANZapine (ZyPREXA) (injection) 10 mg (has no administration in time range)
fentaNYL (Sublimaze) (injection) 50 mcg (0 mcg Intravenous Stopped 1/13/24 1752)
iohexol (Omnipaque) 350 mg iodine/mL (injection) 200 mL (200 mL Intravenous New Bag 1/13/24

RADIOLOGY:

CT angiogram head & neck w/3D reconstruction

Final Result

Noncontrast CT head:

Multicompartmental intracranial hemorrhage with prominent hemorrhagic
contusions in the left temporal lobe, small left convexity subdural
hemorrhage, left tentorial subdural hemorrhage and small left convexity
subarachnoid hemorrhage causing mild mass

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

ED Provider Note (continued)

effect with midline shift of
7 mm to the right. No evidence of descending
transtentorial herniation.

CT angiogram head and neck:

Punctate focus of active contrast extravasation in
the left temporal
lobe hemorrhagic contusion.

No large vessel occlusion, hemodynamically
significant stenosis or
abrupt vessel cut off. No evidence of vascular
injury. Specifically
no evidence of dissection of the internal carotid
arteries in the
region of the sphenoid sinus roof fracture.

Findings were discussed with Dr. Jordan in the
ED at 6:43 pm on
1/13/2024.

Electronically Signed by: Prashanth Reddy
Damalcheruvu, M.D. on 01/13/2024 at 18:43:39

CT maxillofacial area without contrast

Final Result

Longitudinal fracture of the right temporal bone
involving the tegmen
mastoideum, anterior and posterior walls of the
external auditory canal
with hemomastoid and hemotympanum. No
evidence of ossicular disruption
or otic capsule involvement.

Fracture of the roof of the sphenoid sinus
extending to the walls of
the bilateral carotid canals. Sphenoid hemosinus
noted.

Linear minimally displaced fracture of the left
lateral cribriform

ED Provider Note (continued)

plate.

Mildly displaced fractures of the bilateral nasal bones and inferior
portion of the nasal septum.

Likely chronic fracture of the right lamina papyracea in the absence of
adjacent hemosinus. Herniation of orbital fat is seen without
herniation of extraocular muscle.

Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:39:22

CT cervical spine without contrast
Final Result
No acute cervical spine fracture or traumatic malalignment.

Findings were discussed with Dr. Jordan in the ED at 6:43 pm on
1/13/2024.

MEDICAL DECISION MAKING AND PLAN OF CARE

ED Course:[JT.2T]

This is an unknown age male, approximately in his 40s, who presents to the ED as a level 2 trauma activation following a fall off a 35 ft ladder. On arrival to the ED he is hemodynamically stable, bradycardic to the 40s, otherwise satting well on non-rebreather. On exam he has obvious trauma to the right temporal region, blood in the left ear, appears altered and is oriented to person. He is following commands. Trauma team was present on patient's arrival to the bedside. E fast was obtained and was negative. Following primary survey patient was taken to CT scanner where CT head was notable for multiple intracranial hemorrhages, blunt aortic injury. He was started on Keppra. Neurosurgery was consulted. Attending over-read is concerning for active temporal hemorrhage. I spoke to on-call Neurology resident and relayed these findings. Patient will be admitted to STICU for continued neuro exams. Sign-out was given to oncoming

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

ED Provider Note (continued)

resident.[JT.2M]

The evaluation and findings along with the disposition, and plan of care were discussed with the patient. They agreed and stated understanding.

Whiskey Ac Unktwentyfour is a 104 y.o. male who was seen on 01/13/2024 and was diagnosed with:[JT.2T]

1. **Closed head injury, initial encounter**
2. Intracranial hemorrhage (HCC)
3. Subdural hemorrhage (HCC)
4. Closed fracture of nasal bone, initial encounter
5. Closed fracture of temporal bone, initial encounter (HCC)
6. Injury of abdominal aorta, initial encounter[JT.3T]

Author Type: Resident
Status: Signed
Cosigner: Davis, Benjamin L, MD at 1/27/2024 6:13 PM

Trauma[JD.1M] Surgery Discharge Summary

Attending Physician:[JD.1T] Kimbrough, Mary K, MD[JD.2T]
Admission Date:[JD.1T] 1/13/2024[JD.2T]
Discharge Date:[JD.1T] 1/27/2024[JD.2T]
PCP:[JD.1T] No primary care provider on file.[JD.2T]

Admission Diagnoses:[JD.1T]
Subdural hemorrhage (HCC) [I62.00]
Intracranial hemorrhage (HCC) [I62.9]
Fall [W19.XXXA]
Closed fracture of nasal bone, initial encounter [S02.2XXA]
Closed head injury, initial encounter [S09.90XA]
Injury of abdominal aorta, initial encounter [S35.00XA]
Closed fracture of temporal bone, initial encounter (HCC) [S02.19XA][JD.2T]

Principle Diagnosis at Discharge:[JD.1T]
Principal Problem:
Traumatic brain injury (HCC)
Active Problems:
Impaired functional mobility, balance, gait, and endurance
Cognitive impairment
Irritability
Multiple closed fractures involving skull and facial bones (HCC)
Neurobehavioral sequelae of traumatic brain injury (HCC)
Delirium due to general medical condition[JD.2T]

Reason for Hospitalization:[JD.1T]
Level 2 trauma activation following fall from height.[JD.1M] Imaging with IPH, SAH, SDH with associated mass effect L hemisphere, temporal/parietal bone fx, contour irregularity of the aortic root with mediastinal hematoma concerning for blunt aortic injury, bilateral nasal bone fx, right lamina papyracea fracture, nondisplaced fracture of the lateral wall the right sphenoid sinus and left pterygoid plate. Admitted to the SICU for close monitoring[JD.1C]. Transferred to the floor where he was agitated requiring psych hold, restraints, prn medication for aggressive behavior. He became hyponatremic and was transferred back to the unit for treatment of SIADH. He was on a precedex ggt for agitation. He has been off precedex and out

of restraints for >24 hours. He pulled several foley catheters necessitating urology consult for hematuria. As of 1/27, he and his mother have requested to leave AMA. He has made great improvements but is not medically stable for discharge. PT/OT have previously recommended acute TBI rehab. Hospital Risk, Ethics, and CMO have been notified and have decided that patient can leave AMA. I have extensively discussed with the patient and mother that he is at increased risk of complications and harm to himself and others. I am worried that he will have continued agitation and irrational thought and decision making. He is unsafe to operate a motor vehicle. He is a threat to himself and others in his current state. He and his mother have signed AMA paperwork as of 1245 today and are leaving today.[JD.1M]

Hospital Course

This is a representative summary of hospitalization, for complete and full details, refer to daily progress notes.[JD.1T]

See above (see hospital daily progress notes for in-detail description of hospitalization).[JD.1M]

Mr. Lynn[JD.2T] was discharged with a prescription for[JD.1T] propranolol and salt tablets sent to the local pharmacy.[JD.1M]

Surgical Procedures:

Consults:[JD.1T]
CONSULT CLINICAL NUTRITION
CONSULT NEUROSURGERY
CONSULT OPHTHALMOLOGY
CONSULT OTOLARYNGOLOGY
CONSULT PHYSICAL MEDICINE REHAB
TRAUMA NEUROPSYCHOLOGY CONSULT
TRAUMA NEUROPSYCHOLOGY CONSULT
CONSULT UROLOGY
CONSULT PSYCHIATRY[JD.2T]

Condition of Patient at Discharge: Good
Disposition:[JD.1T] AMA[JD.1M].

Imaging:
X-ray chest AP portable

Result Date: 1/27/2024
FINDINGS AND IMPRESSION: No focal consolidation. Mild diffuse interstitial prominence noted. Bilateral CP angles are clear. Cardiac silhouette and hilar vasculature appear normal. There is no mediastinal widening noted. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Joe Jose, Dr. on 01/27/2024 at 11:40:03

X-ray dobbhoff tube placement portable

Result Date: 1/25/2024
Dobbhoff tube tip projects at the junction of the 1st and 2nd portions of the duodenum. Electronically Signed by: Lance Runion, M.D. on 01/25/2024 at 11:29:18

X-ray chest AP portable

Result Date: 1/24/2024
FINDINGS AND IMPRESSION: Feeding tube is seen coursing below the diaphragm with tip projecting over the gastric pylorus/1st part of duodenum. Gas distended loop of large bowel is seen in the abdomen. Electronically Signed by: Sumit Shah, Dr. on 01/24/2024 at 21:36:59

X-ray abdomen AP erect portable

Result Date: 1/24/2024
FINDINGS AND IMPRESSION: The Dobbhoff tube has been repositioned and appears retracted and coiled within the gastric fundus. Electronically Signed by: Tarun Pandey, M.D. on 01/24/2024 at 07:36:30

X-ray dobbhoff tube placement portable

Result Date: 1/23/2024
1. Interstitial probable edema or atypical infection.2. Nonobstructive bowel gas pattern as seen.3. Enteric tube tip in the gastric antrum. Electronically signed by John Hotchkiss, MD on 01-23-24 at 0133

X-ray chest AP portable

Result Date: 1/14/2024
Mild bibasilar atelectasis. No large pneumothorax. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Joe Jose, Dr. on 01/14/2024 at 10:06:58

CT temporal bones without contrast

Result Date: 1/14/2024
Longitudinal fracture of the right temporal bone traversing the tegmen mastoideum and anterior and posterior walls of the external auditory canal. No evidence of ossicular disruption or otic capsule involvement. Unremarkable HRCT of the left temporal bone. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:28:27

CT head without contrast

Result Date: 1/14/2024
Mild increase in left frontoparietal temporal subdural hematoma and left frontal lobe hemorrhagic contusion.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Discharge Summary Note (continued)

Stable left tentorial subdural hematoma and scattered subarachnoid hemorrhage. Confluent hemorrhagic contusion within the left temporal lobe is mildly increased when compared to immediate prior. Stable mild mass effect and midline shift without evidence of transtentorial herniation. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:18:05

CT head without contrast

Result Date: 1/14/2024
Stable appearance of previously seen left tentorial and left frontoparietal temporal subdural hematomas. Stable hemorrhagic contusion within the left temporal lobe. Stable rightward midline shift. No evidence of herniation. Stable scattered left cerebral convexity subarachnoid hemorrhage. Mild cerebral edema with effacement of the perimesencephalic cisterns, similar compared to prior examination. Redemonstration of calvarial and maxillofacial fractures better described on same day dedicated maxillofacial and temporal bone imaging. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:17:09

ED Ultrasound FAST WITH THORACIC

Result Date: 1/14/2024
EFAST_POCUS: Exam Information: Images are digitally stored for quality assurance review, retrievability, and archival purposes.: Exam type: Diagnostic Indication(s) for Exam: The exam was performed with the following indications:: Blunt trauma Views Obtained: The following spaces were examined as part of the FAST exam:: Pericardial, pleural, Morison's pouch, splenorenal, and retro-vesicular spaces were examined. Findings: Pericardial space: Fluid absent Pericardial tamponade: Absent Morison's pouch (RUQ): Fluid absent RIGHT pleural space: Fluid absent Perisplenic (LUQ): Fluid absent LEFT pleural space: Fluid absent Retrovesicular space: Fluid absent RIGHT lung sliding: Lung sliding present Left lung slide: Lung sliding present Interpretation: Abdomen: No pathologic free fluid Pericardial space: No pathologic free fluid Tamponade: No evidence of tamponade Pleural fluid: No pathologic free fluid Lung: Normal lung slide Confirmatory Study: What confirmatory study was done?: Xray Sign/Submit: Submit Exam For QA Review: Yes Attending Physician Attestation:: I was present and directly participated in the limited ultrasound procedure, have reviewed the imaging and the above represents my personal interpretation as the attending physician Electronically signed by Watkins, Adam on Sunday, January 14, 2024 at 7:17 AM

CT chest abdomen and pelvis with contrast

Result Date: 1/13/2024
1. Mild retrosternal mediastinal stranding/hematoma noted. 2. Airspace opacities and ground-glass opacities in the dependent portions of the bilateral lungs, may be secondary to aspiration. Cannot exclude contusions in the setting of trauma. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Joe Jose, Dr. on 01/13/2024 at 23:32:10

CT cervical spine without contrast

Result Date: 1/13/2024
No acute cervical spine fracture or traumatic malalignment. Findings were discussed with Dr. Jordan in the ED at 6:43 pm on 1/13/2024. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:44:02

CT angiogram head & neck w/3D reconstruction

Result Date: 1/13/2024
Noncontrast CT head: Multicompartmental intracranial hemorrhage with prominent hemorrhagic contusions in the left temporal lobe, small left convexity subdural hemorrhage, left tentorial subdural hemorrhage and small left convexity subarachnoid hemorrhage causing mild mass effect with midline shift of 7 mm to the right. No evidence of descending transtentorial herniation. CT angiogram head and neck: Punctate focus of active contrast extravasation in the left temporal lobe hemorrhagic contusion. No large vessel occlusion, hemodynamically significant stenosis or abrupt vessel cut off. No evidence of vascular injury. Specifically no evidence of dissection of the internal carotid arteries in the region of the sphenoid sinus roof fracture. Findings were discussed with Dr. Jordan in the ED at 6:43 pm on 1/13/2024. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:43:39

CT maxillofacial area without contrast

Result Date: 1/13/2024
Longitudinal fracture of the right temporal bone involving the tegmen mastoideum, anterior and posterior walls of the external auditory canal with hemomastoid and hemotympanum. No evidence of ossicular disruption or otic capsule involvement. Fracture of the roof of the sphenoid sinus extending to the walls of the bilateral carotid canals. Sphenoid hemosinus noted. Linear minimally displaced fracture of the left lateral cribriform plate. Mildly displaced fractures of the bilateral nasal bones and inferior portion of the nasal septum. Likely chronic fracture of the right lamina papyracea in the absence of adjacent hemosinus. Herniation of orbital fat is seen without herniation of extraocular muscle. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:39:22

Discharge Medications

Current Discharge Medication List

START taking these medications

	Details
propranolol (INDERAL) 20 MG tablet	Take one tablet (20 mg total) by mouth 4 (four) times a day. Take every 6 hours. Hold for heart rate less than 60. *Qty:* 360 tablet, *Refills:* 3

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Discharge Summary Note (continued)

sodium chloride 1,000 mg TbSO	Take two tablets (2 g total) by mouth 3 (three) times a day with meals. *Qty:* 90 tablet, *Refills:* 1

Discharge Orders/Instructions[JD.1T]

Discharge Procedure Orders

Discharge instructions

Order Comments:

Pain Management:
Alternate taking Tylenol (acetaminophen) and/or Advil/Motrin (ibuprofen) around the clock for the first few days to have a base layer of pain control.

Activity
If at all possible, have someone with you to help you. Going up stairs is not a problem. Listen to your body and rest when you are tired. Do not lift anything heavier than a gallon of milk, or 10lbs. Do not drive a motor vehicle; operate machinery or power tools while taking pain medications.

Diet
You may resume your at-home diet as directed immediately. Always try to take pain medications with food or milk to prevent nausea.

Follow Up
None necessary

Seek medical attention for a fever of 101.5F or higher (it is not uncommon to have a low-grade fever after surgery), unusual chest pain, or increased work of breathing. Call 911 in an emergency.

You have left against medical advice. You are highly advised to seek medical care immediately and it is felt that you are not medically ready to discharge.[JD.2T]

TRAUMA SURGERY FACULTY ATTESTATION

I was present in the trauma bay for this patient's arrival to UAMS as a level 2 trauma activation on 1/13/24. I have seen and examined the patient in the Emergency Department and confirmed the HPI, past medical/surgical history, medications/allergies, ROS, physical exam, laboratory studies, and diagnostic tests.

I have spent in excess of 75 minutes discontinuously providing consultative services. These services include, but are not limited to: bedside evaluation/ exam, conversations with ER team, nursing staff, and the patient about their current clinical condition, reason for our involvement, risks/benefits/indications for any possible surgical procedures, and time spent obtaining consent for any planned procedures. It also includes time spent personally reviewing all lab and diagnostic studies, reviewing all culture data and medications, and thoroughly reviewing the patient's history and medical record. This time is exclusive of procedures.

I confirm that the note written below by Dr. Arensberg on 1/13 accurately reflects our findings and assessment and plan with the following additions, corrections, or modifications, if any.

Fall from ladder reportedly about 30 feet.
Moderate TBI (GCS 12). CT looks worse than his exam with SDH and sizeable IPH. Suspect his exam will get worse - ICU for close monitoring and low threshold to intubate if declines. Short interval head CT followup.
He has a small mediastinal hematoma and radiology is concerned for some irregularity of the aortic root. I think this is probably artifact but we will get echo and cardiac surgery to review.
Does have some heart rate variability and bradycardia but this could be explained by his TBI.
Pulmonary contusions.

Nolan Bruce, MD
Trauma Surgery, Surgical Critical Care, & Acute Care Surgery

Knee Dislocation:[LA.1T] no[LA.3M]
Neuro:[LA.1T] person[LA.3M]
Motor:[LA.1T] diminished BUE BLE[LA.1M]
Sensation:[LA.1T] unable to assess[LA.1M]

Radiology:
Preliminary Read:

CT Head:[LA.1T] IPH, SAH, SDH, mass effect of L cerebral hemisphere[LA.3M]

CT Neck:[LA.1T] No acute fracture traumatic malalignment of the cervical spine.[LA.3C]

CT C/A/P:[LA.1T]

Contour irregularity of the aortic root with mediastinal hematoma concerning for blunt aortic injury.

Airspace opacities in the dependent portions of the bilateral lungs, which may represent aspiration.

Multiple diffuse subcentimeter mesenteric lymph nodes.

Trace pelvic free fluid.[LA.3C]

CT Maxillofacial:[LA.3M]

Mildly displaced nasal bone fractures.

Swelling of the right periorbital soft tissues.

Subtle fracture of the left pterygoid plate.

Small fracture of the right lamina per pre she a with herniation of orbital fat

Right temporal bone skull base fracture extending to the lateral wall of the right sphenoid sinus.[LA.3C]

CXR:[LA.1T] Widened mediastinum[LA.3M]

Orders Placed This Encounter

Procedures

- Consult Clinical Nutrition
- Consult Neurosurgery
- Consult Ophthalmology
- Consult Cardiac Surgery[LA.2T]

INJURIES/PROBLEMS/DIAGNOSES and TREATMENT PLAN:[LA.1T]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

H&P Notes (continued)

Injuries
- SAH, SDH
- Nasal fractures
- Basilar skull fracture, R parietal and temporal
- Potential blunt aortic root injury
- R lamina per pre she fracture with orbital fat herniation

Plan
- Consult neurosurgery, ophthalmology, ENT, Cardiac surgery
- SICU admission
- Keppra[LA.3M]

Patient evaluated and discussed with Dr.[LA.1T] Bruce[LA.3M] who helped formulate the above plan.[LA.1T]

Landon Arensberg
Emergency Medicine, PGY1[LA.3T]

1/13/2024 6:26 PM[LA.2T]

Chart Correction Addendum: Patient submitted a Request for Amendment of Health Information. Upon review of the chart, a mistake was discovered concerning the location where the patient's injury occurred. According to the Emergency Medical Services record, the patient was not at his place of residence when the injury occurred; therefore, "cleaning his gutters" was corrected to "cleaning gutters" in the history of Mechanism of Injury.

Trauma Consultant Note

Time Consult Initiated:[KA.1T] **01/13/24**[KA.2T]
0545 PM[KA.2M]

Time of Evaluation: 01/13/24, 5:54 PM

Consulting Service:[KA.1T] Neurosurgery[KA.2M]
Consultant Resident: KARRAR ALJIBOORI, MD
Consultant Attending:[KA.1T] Petersen[KA.2M], MD[KA.1T], PhD[KA.2M]

Brief Plan:[KA.1T]
- No neurosurgical intervention is warranted at this time.
- Please repeat non-contrasted CT in 4 hours from last scan.
- STAT CT for change in neurological exam.
- Recommend Na goal of 145.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

-[KA.2M] CSF leak precautions: Elevate HOB>45, NO nose blowing, closed mouth sneezes, wind instruments, straws, or incentive spirometry.[KA.2T]
-[KA.2M] TBI protocol:
- Elevated HOB>30.
- Maintain euvolemia.
- A[KA.2T]v[KA.2M]oid hypo/hyperthermia, cooling measures as indicated.
- Avoid tight cervical collars and endotracheal tube ties, maintain head and neck neutral.
- Keppra 1g BID for 7 days then stop if no seizures.
- Hgb>7.
- correct coagulopathy.
- OK for chemical DVT ppx 24h after stable CTH[KA.2T].[KA.2M]

Chief Complaint / Reason for consult:[KA.1T] Fall[KA.2M]

HPI:[KA.1T] Patient is a male in his 40s who presents as trauma after fall from ladder. CT head demonstrates L temporal contusions with a small extra-axial component as well a L hemispheric sulcal effacement and MLS of about 4 mm. There is also a closed, linear, non-displaced fracture through the left temporal bone that extends into the EAC as well as antrum/tegmen of mastoid. There is a punctate extradulral pneumocephalus in the R temporal fossa. No family identified at this time. Reportedly, patient had LOC and he does not take any blood thinners.[KA.2M]

14 point ROS is otherwise negative except as in above HPI

TRAUMA SURGERY FACULTY ATTESTATION

I was present in the trauma bay for this patient's arrival to UAMS as a level 2 trauma activation on 1/13/24. I have seen and examined the patient in the Emergency Department and confirmed the HPI, past medical/surgical history, medications/allergies, ROS, physical exam, laboratory studies, and diagnostic tests.

I have spent in excess of 75 minutes discontinuously providing consultative services. These services include, but are not limited to: bedside evaluation/ exam, conversations with ER team, nursing staff, and the patient about their current clinical condition, reason for our involvement, risks/benefits/indications for any possible surgical procedures, and time spent obtaining consent for any planned procedures. It also includes time spent personally reviewing all lab and diagnostic studies, reviewing all culture data and medications, and thoroughly reviewing the patient's history and medical record. This time is exclusive of procedures.

I confirm that the note written below by Dr. Arensberg on 1/13 accurately reflects our findings and assessment and plan with the following additions, corrections, or modifications, if any.

Fall from ladder reportedly about 30 feet.
Moderate TBI (GCS 12). CT looks worse than his exam with SDH and sizeable IPH. Suspect his exam will get worse - ICU for close monitoring and low threshold to intubate if declines. Short interval head CT followup.
He has a small mediastinal hematoma and radiology is concerned for some irregularity of the aortic root. I think this is probably artifact but we will get echo and cardiac surgery to review.
Does have some heart rate variability and bradycardia but this could be explained by his TBI.
Pulmonary contusions.

Nolan Bruce, MD
Trauma Surgery, Surgical Critical Care, & Acute Care Surgery

	Gross per 24 hour
Intake	3 ml
Output	—
Net	**3 ml**[TR.2T]

Pertinent Imaging:[TR.1T]
Contour irregularity of the aortic root with mediastinal hematoma concerning for blunt aortic injury.
Airspace opacities in the dependent portions of the bilateral lungs, which may represent aspiration.
Multiple diffuse subcentimeter mesenteric lymph nodes.
Trace pelvic free fluid.

Multicompartmental hemorrhage with left temporal lobe contusion as well as subarachnoid hemorrhage along the left cerebral convexity and trace subdural hemorrhage along the left tentorium and left cerebral convexity.
Mild mass effect of the left cerebral hemisphere with partial effacement of the sulci and left lateral ventricle.
Nondisplaced fracture involving the right parietal and temporal bones with a longitudinal skull base fracture through the petrous temporal bone with associated hemomastoid and hemotympanum with disruption of the tegmen mastoideum and tegmen tympani. There is disruption of the with soft tissue density and small fracture fragment in the external auditory canal. No definite ossicular chain disruption or otic capsule violation.
Mildly displaced bilateral nasal bone fractures. Swelling of the right periorbital soft tissues without globe disruption.
Right lamina papyracea fracture with herniation of orbital fat.
Nondisplaced fracture of the lateral wall the right sphenoid sinus and left pterygoid plate with fluid and air in the sphenoid sinuses.

Mildly displaced nasal bone fractures.
Swelling of the right periorbital soft tissues.
Subtle fracture of the left pterygoid plate.
Small fracture of the right lamina per pre she a with herniation of orbital fat
Right temporal bone skull base fracture extending to the lateral wall of the right sphenoid sinus.

No acute fracture traumatic malalignment of the cervical spine.
Longitudinal fracture through the petrous portion of the right temporal bone with associated hemotympanum and hemomastoideum without definite ossicular chain disruption or otic capsule violation.
Incompletely imaged subarachnoid hemorrhage along the left cerebral convexity.[TR.1C]

Microbiology:[TR.1T]

Microbiology Results (last 14 days)
**** No results found for the last 336 hours. ****[TR.2T]

ASSESSMENT:[TR.1T]
3[TR.1M]3[TR.3M] y.o.male[TR.1T] with no known medical history who presents as a level 2 fall from ladder. Per EMS, patient was cleaning his getters a fell approximately 35ft.[TR.1M] Postive LOC. GCS 12. Admitted to the SICU for close monitoring.

Injuries:
-[TR.3M] IPH, SAH, SDH with associated mass effect L hemisphere[TR.1C]
- T[TR.3M]emporal[TR.1C]/parietal bone[TR.1M] fx[TR.1C]
- C[TR.3M]ontour irregularity of the aortic root with mediastinal hematoma concerning for blunt aortic injury[TR.1C]
- B[TR.3M]ilateral nasal bone fx, r[TR.1M]ight lamina papyracea fracture[TR.1C]
- N[TR.3M]ondisplaced fracture of the lateral wall the right sphenoid sinus and left pterygoid plate[TR.1C]

Plan:
Neuro/Pain:
- GCS[TR.1T] 12[TR.3M]
- Sedation/Pain:[TR.1T] none[TR.3M]

IPH, SAH, SDH with associated mass effect L hemisphere[TR.1C]
- Neurosurgery consulted
- 3% hypertonic saline with goal sodium 145
- Keppra BID
- Repeat head CT at 2200[TR.3M]

Pulm:[TR.1T]
None (Room air) 4 L/min[TR.2T]
-[TR.1T] Wean supplemental oxygen as toleratd
- Encourage IS
- Respiratory care protocol[TR.3M]

CV/Heme:
- H/H[TR.1T] 16.4/45.7[TR.3M]
-[TR.1T] ROTEM within normal limits
- Daily CBC

C[TR.3M]*ontour irregularity of the aortic root with mediastinal hematoma concerning for blunt aortic injury*[TR.1C]
- Cardiac surgery consulted
- No need for impulse control
- Goal SBP 100-160
- ECHO ordered[TR.3M]

GI/FEN:[TR.1T]
NPO; Effective Now; No Exceptions[TR.2T]
- Tube feeds: at mL/h
- mIVF:[TR.1T] 75cc/hr[TR.3M]
- Replace electrolytes PRN (K>4, PO4>3, Mg>2)
-[TR.1T] Hypertonic saline at 30cc/hr, goal sodium 145
- Q6H chem 10[TR.3M]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Cardiac[KS.2M] **Surgery Consult Note**

Chief Complaint:[KS.2T] Fall 30ft from ladder
Reason for Consult: Concern for blunt aortic injury - contour irregularity aortic root with associated mediastinal hematoma[KS.2M]

History of Present Illness:[KS.2T]
Young M who presented as a level 2 trauma after falling 35ft off a ladder cleaning gutters around 16:30 this evening. +LOC, GCS13 (3,4,6) upon arrival with subsequent decline to GCS11. Sinus bradycardia but normotensive. Workup revealing moderate TBI with IPH, SAH, SDH with associated mass effect L hemisphere in addition to temporal / parietal skull fx and facial fx. On CT chest, mediastinal hematoma with concern for coutour irregularity at the aortic root consistent with possible blunt aortic injury. EKG without evidence of ST elevation, HS Trop <4.0. Remains bradycardic SBP 120s

and tegmen tympani. There is disruption of the with soft tissue density and small fracture fragment in the external auditory canal. No definite ossicular chain disruption or otic capsule violation.
Mildly displaced bilateral nasal bone fractures. Swelling of the right periorbital soft tissues without globe disruption.
Right lamina papyracea fracture with herniation of orbital fat.
Nondisplaced fracture of the lateral wall the right sphenoid sinus and left pterygoid plate with fluid and air in the sphenoid sinuses.[KS.3C]

CT max face[KS.3M]
Mildly displaced nasal bone fractures.
Swelling of the right periorbital soft tissues.
Subtle fracture of the left pterygoid plate.
Small fracture of the right lamina per pre she a with herniation of orbital fat
Right temporal bone skull base fracture extending to the lateral wall of the right sphenoid sinus.[KS.3C]

CT C-spine[KS.3M]
No acute fracture traumatic malalignment of the cervical spine.
Longitudinal fracture through the petrous portion of the right temporal bone with associated hemotympanum and hemomastoideum without definite ossicular chain disruption or otic capsule violation.
Incompletely imaged subarachnoid hemorrhage along the left cerebral convexity.[KS.3C]

Assessment[KS.2T] **/**[KS.3M] **Plan:**[KS.2T]
Young M who presented as a level 2 trauma after falling 35ft off a ladder cleaning his gutters around 16:30 this evening[KS.2M] sustaining moderate TBI as well as mediastinal hematoma. Cardiac surgery consulted due to concern for possible aortic root irregularity. EKG sinus bradycardia without ST elevation, Trop wnl, Echo without abnormality. Recommend telemetry monitoring, no abnormality noted to root of aorta low concern for BAI, no acute cardiac surgery intervention indicated[KS.3M]

Patient seen discussed and staffed with Dr.[KS.2T] Streitman[KS.3M], who helped formulate and agrees with the proposed plan.

Krista Stephenson, MD
General Surgery PGY[KS.2T]5[KS.3M]

I have personally seen and examined this patient and agrees the above assessment plan.

This is a young male who fell from a ladder approximately 30-35 feet with blunt trauma. As part of his evaluation, a CT scan of the chest abdomen pelvis was performed. Upon my review, I do not see any concerning findings for blunt aortic injury of the aortic root or the isthmus. His entire arterial system flow great vessel perspective appears intact. Certainly it is reasonable to follow this patient with echocardiography as needed and telemetry for blunt cardiac trauma, however I see no need for operative intervention nor serial radiographic evaluation given his presentation and initial imaging. Please re-consult as needed.[JS.1M]

Consult Orders
1. Consult Ophthalmology [209630008] ordered by Arensberg, Landon, MD at 01/13/24 1757

Ophthalmology Consult H&P

Patient :[SK.1T] Whiskey Ac Unktwentyfour[SK.2T];[SK.1T] 104 y.o. male[SK.2T] **MRN#**[SK.1T] 004120303[SK.2T]
Location:[SK.1T] 01 S/01 S[SK.2T] **Admit Date:**[SK.1T] 1/13/2024[SK.2T]
Admission Diagnosis:[SK.1T] Fall [W19.XXXA][SK.2T]

Service Consulted: Ophthalmology

Reason for Consult:[SK.1T]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

Orbital fracture[SK.1M]

History of Present Illness:[SK.1T]

35 y.o.male with no known medical history who presents as a level 2 fall from ladder. Per EMS, patient was cleaning g[SK.3C]u[SK.4M]tters a[SK.3C]nd[SK.5M] fell approximately 35ft. Imaging with IPH, SAH, SDH with associated mass effect L hemisphere[SK.3C]. A[SK.3M]dmitted to the SICU for close monitoring.[SK.3C] Ophthalmology consulted for right medial wall fracture. Pt does not follow commands and very uncooperative during exam.[SK.3M]

Patient History:[SK.1T]
History reviewed. No pertinent past medical history.
No past surgical history on file.

Social History

Tobacco Use	
• Smoking status:	Not on file
• Smokeless tobacco:	Not on file
Substance Use Topics	
• Alcohol use:	Not on file

History reviewed. No pertinent family history.[SK.2T]

Medications
Scheduled Meds:[SK.1T]

• levETIRAcetam	1,000 mg	Intravenous	Q12H SCH
• ondansetron	4 mg	IV Push	Once[SK.2T]

Continuous Infusions:[SK.1T]
- electrolyte-A
- sodium chloride[SK.2T]

PRN Meds:.[SK.1T]

No current facility-administered medications on file prior to encounter.

No current outpatient medications on file prior to encounter.[SK.2T]

Allergies[SK.1T]
Not on File[SK.2T]

ROS:[SK.1T] Pertinent items are noted in HPI.[SK.3M]

Exam:[SK.1T] **(very difficult exam)**[SK.3M]

Neuro:[SK.1T] uncooperative and does not follow commands[SK.3M]
VA[SK.1T]: unable[SK.3M]
Pupils:[SK.1T] 5-3[SK.3M] mm ou, brisk ou, negative RAPD ou
EOM: full[SK.1T] od to forced ductions,[SK.3M] deferred[SK.6M] os[SK.3M]
CVF:[SK.1T] unable[SK.7M]
Tp:[SK.1T] 17, 19[SK.3M]

SLE:
Ext/L/L:[SK.1T] RUL non-tense hematoma,[SK.3M] normal o[SK.1T]s[SK.3M]
C/S:[SK.1T] small ~1 mm conj abrasion vs conj lac od (iatrogenic from forced duction exam),[SK.3M] w/q o[SK.1T]s[SK.3M]
K: clear ou
AC: d[SK.1T]eep[SK.3M]/[SK.1T]formed[SK.3M] ou[SK.1T], no hyphema od[SK.8M]
Iris: r/f ou
Lens: clear ou

Dilated exam[SK.1T] deferred due to neuro-checks

Imaging:

CT max-face wo contrast -[SK.3M]

IMPRESSION:
Longitudinal fracture of the right temporal bone involving the tegmen mastoideum, anterior and posterior walls of the external auditory canal with hemomastoid and hemotympanum. No evidence of ossicular disruption or otic capsule involvement.

Fracture of the roof of the sphenoid sinus extending to the walls of the bilateral carotid canals. Sphenoid hemosinus noted.

Linear minimally displaced fracture of the left lateral cribriform plate.

Mildly displaced fractures of the bilateral nasal bones and inferior portion of the nasal septum.

Likely chronic fracture of the right lamina papyracea in the absence of adjacent hemosinus. Herniation of orbital fat is seen without herniation of extraocular muscle.[SK.3C]

Assessment and Recommendation

1[SK.1T]**.**[SK.3M] **Right**[SK.1T] **medial wall fracture, possibly old**[SK.3M]
- No clinical evidence of entrapment of rectus muscles. Negative oculocardiac reflex
- No indication for acute surgical intervention
- CT maxillofacial as above
- Precautions[SK.1T] to be[SK.3M] discussed with patient[SK.1T] when mental status improves[SK.3M]: No nose-blowing, sneeze/cough with mouth open, HOB elevated, no straws, no blowing/wind instruments x4 weeks

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

- Augmentin for 7 days[SK.1T] for[SK.3M] medial wall fracture
- Will arrange follow up with oculoplastic surgery at next available appointment for evaluation for possible repair[SK.1T]

***Please inform ophthalmology when dilated exam can be performed. Will assess visual acuity when able[SK.3M]**

2. Small conjunctival abrasion vs conjunctival laceration, right eye
-start erythromycin eye ointment QID right eye x4 days (ordered)
-start artificial tears QID right eye x4 days (ordered)[SK.4M]

Thank you for the consult. Staff available as needed.

Sam Karimaghaei, MD
Ophthalmology, PGY-2[SK.1T]

Chart Correction Addendum: Patient submitted a Request for Amendment of Health Information. Upon review of the chart, a mistake was discovered concerning the location where the patient's injury occurred. According to the Emergency Medical Services record, the patient was not at his place of residence when the injury occurred; therefore, "cleaning his gutters[SK.5C] a fell[SK.5M]" was corrected to "cleaning gutters[SK.5C] and fell[SK.5M]" in the History of Present Illness.

Consult Orders
1. Consult Otolaryngology [209630021] ordered by Arensberg, Landon, MD at 01/13/24 1828

Attestation signed by Boyette, Jennings R, MD at 1/16/2024 10:44 AM

I saw and examined the patient with the resident. We reviewed and discussed the patient's history, assessment, and current problems, and I am in agreement with the written resident note with the exceptions/additions noted below. I have personally formulated the plan.
CT reviewed. Facial nerve has been documented intact. Followup in 4-6 weeks in APRN clinic with audiogram. No surgery.
Jennings Boyette MD

Otolaryngology-Head and Neck Surgery Consult Note

Chief Complaint/Reason for consult: Facial Trauma

Consulting Team: Trauma

HPI:[OS.1T]

Mr. Lynn[OS.2T] is a[OS.1T] 33 y.o. male[OS.2T] presenting as a trauma after[OS.1T] fall from a ladder ~35ft[OS.2M] who sustained[OS.1T] multisystemic injuries including right Temporal bone fracture and nasal bone fractures. Patient being admitted to the SICU for monitoring. Limited history d/t mental status.[OS.2M]

GLUCOSE	155 (H)	01/13/2024

No results found for: "MG", "PHOS", "CA"[OS.2T]

Imaging:
CT maxface:[OS.1T]
Longitudinal fracture of the right temporal bone involving the tegmen mastoideum, anterior and posterior walls of the external auditory canal with hemomastoid and hemotympanum. No evidence of ossicular disruption or otic capsule involvement.Fracture of the roof of the sphenoid sinus extending to the walls of the bilateral carotid canals. Sphenoid hemosinus noted.Linear minimally displaced fracture of the left lateral cribriform plate. Mildly displaced fractures of the bilateral nasal bones and inferior portion of the nasal septum.Likely chronic fracture of the right lamina papyracea in the absence of adjacent hemosinus. Herniation of orbital fat is seen without herniation of extraocular muscle.[OS.1C]

ASSESSMENT:[OS.1T]
Mr. Lynn[OS.2T] is a[OS.1T] 33 y.o. male[OS.2T] trauma who sustained[OS.1T] multisystemic injuries including right Temporal bone with tegmen involvement[OS.1M]

CT Temporal bone:[OS.2M]
Nondisplaced fracture is seen in the right parietal bone extending into the squamous right temporal bone and mastoid.
Longitudinal temporal bone fracture is seen in the right mastoid extending into the lateral wall of the middle ear. There is dislocation of the right middle ear ossicles. Right hemo mastoid seen.
There is also disruption of the superior wall of the mastoid air cells.
Nondisplaced fracture seen involving the anterior wall of the external auditory canal extending into the fossa of right temporomandibular joint.
Nondisplaced fracture is seen involving the superior and lateral wall of the right sphenoid sinus extending into the medial wall of right carotid canal.[OS.2C]

PLAN:[OS.1T]
- Wick placed in right ear. Will need to be removed in 1 week

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

- Recommend Ciprodex drops BID for 2 weeks
- Will require audiology follow up in 6-8 months[OS.2M]
- Elevate head of bed
- Do not blow nose or use straw. Sneeze with mouth open.
-[OS.1T] Recommend antibiotics,[OS.2M] Augmentin BID for 7 days[OS.1T] would be appropriate.
- Will need facial nerve exam when following commands
- If persistent otorrhea on the right send for B2-transferrin to rule out CSF leak.[OS.2M]
- Will arrange follow up in clinic to discuss operability
- Will follow if admitted. No need to keep admitted from facial fracture standpoint.
- Please call with questions

Will discuss with staff on record[OS.1T].[OS.1M]

Longitudinal temporal bone fracture is seen in the right mastoid extending into the lateral wall of the middle ear. There is dislocation of the right middle ear ossicles. Right hemo mastoid seen.
There is also disruption of the superior wall of the mastoid air cells.
Nondisplaced fracture seen involving the anterior wall of the external auditory canal extending into the fossa of right temporomandibular joint.
Nondisplaced fracture is seen involving the superior and lateral wall of the right sphenoid sinus extending into the medial wall of right carotid canal.[OS.2C]

PLAN:[OS.1T]
- Wick placed in right ear. Will need to be removed in 1 week
- Recommend Ciprodex drops BID for 2 weeks
- Will require audiology follow up in 6-8 months[OS.2M]
- Elevate head of bed

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

- Do not blow nose or use straw. Sneeze with mouth open.
-[OS.1T] Recommend antibiotics,[OS.2M] Augmentin BID for 7 days[OS.1T] would be appropriate.
- Will need facial nerve exam when following commands
- If persistent otorrhea on the right send for B2-transferrin to rule out CSF leak.[OS.2M]
- Will arrange follow up in clinic to discuss operability
- Will follow if admitted. No need to keep admitted from facial fracture standpoint.
- Please call with questions

Will discuss with staff on record[OS.1T].[OS.1M]

Consult Orders
1. Consult Clinical Nutrition [209629980] ordered by Applebaum, Natalie J, MD at 01/13/24 1748

Nutrition[EC.1M] **Assessment**[EC.2C]

EMR reviewed. Spoke to pt's girlfriend at bedside this morning. NKFA but pt is lactose intolerant. She reports that pt has been dieting since Oct and has intentionally lost ~30#. Prior UBW ~260#. Spoke to RN.[EC.1M]

Diagnosis: 35 M 35 ft ladder. Pt was cleaning gutters and fell off his ladder.
PMH:[EC.2C] unknown
PSH: unknown[EC.1M]
Injuries
- SAH, SDH
- Nasal fractures
- Basilar skull fracture, R parietal and temporal
- Potential blunt aortic root injury
- R lamina per pre she fracture with orbital fat herniation[EC.1C]

Ht:[EC.2C] 6' Admit[EC.2M] Wt:[EC.2C] 220# (1/13)[EC.2M] BMI:[EC.2C] 29.8[EC.2M] IBW:[EC.2C] 178# (80.9kg)
Wt Hx: girlfriend reports ~30# intentional wt loss over the last ~3 months[EC.1M]
Current Wt:[EC.2C] 229# (1/14)[EC.1M]

Meds:[EC.2C] magnesium sulfate, others noted[EC.1M]
Labs:[EC.2C] Na 146, Cl 115, Ca 8.2, Glu 135[EC.1M]
I/Os:[EC.2C] 228.1/- UOP x2
Skin: Braden Scale 20 (1/13)[EC.1M]

Diet/TF order:[EC.2C] NPO[EC.1M]
Estimated Needs:[EC.2C] 2000-2200kcal (20-22kcal/kg) 135-145g pro (1.7-1.8g/kg*IBW) Fluid per MD[EC.1M]

Comments:[EC.2C]
Noted MD desiring to keep Na >145. For this reason, would recommend a free water restricted TF formula.

TF: Nutren 2.0 goal 40mL/hr providing 1920kcal, 81g pro, 662mL free water. Will need 60mL (30g) proteinex BID providing 240kcal, 60g pro.
Total: 2160kcal, 141g pro, 662mL free water[EC.1M]

Nutrition Prescription:[EC.2C]
TF: Nutren 2.0 goal 40mL/hr + 60mL proteinex BID
Flushes per MD
Na >145 per MD[EC.1M]

Monitoring and Evaluation:[EC.2C]
Goal:
Initiate nutrition
Na >145[EC.1M]

EGC
688-6052[EC.2M]

Chart Correction Addendum: Patient submitted a Request for Amendment of Health Information. Upon review of the chart, a mistake was discovered concerning the location where the patient's injury occurred. According to the Emergency Medical Services record, the patient was not at his place of residence when the injury occurred; therefore, **"**cleaning his gutters**"** was corrected to **"**cleaning gutters**"** in the Nutrition Assessment.

PM&R Consult Attending Attestation:

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

Mr. Sean Patrick Lynn was seen and examined independently on rounds earlier this evening, after discussing him with Dr. Zachary Dawes –PGY4. The patient's mother was present during my visit. I reviewed the patient's chart. During most of my examination, Mr. Lynn remained somnolent and he would only awaken and actively participate long enough for very limited examination. He appeared to be very restless during my visit and he was not following commands or answering questions.
I discussed his condition with his mother and I answered many of her questions. I verified the main clinical findings. I agree with Dr. Dawes' note and I contributed to Dr. Dawes' recommendations.

We will follow him.

Thank you for involving us in this patient's care.

Kevin M. Means, MD
PM&R Consult Attending
1/15/2024

UAMS
COLLEGE OF MEDICINE
DEPARTMENT OF PHYSICAL MEDICINE & REHABILITATION
UNIVERSITY OF ARKANSAS FOR MEDICAL SCIENCES

Patient :[ZD.1T] Sean Patrick Lynn[ZD.2T];[ZD.1T] 33 y.o. male[ZD.2T]
MRN#[ZD.1T] 004120303[ZD.2T]
Hospital Day:[ZD.1T] 1

No ref. provider found[ZD.2T]
Consult Attending:[ZD.1T] Kevin Means, M.D.[ZD.3M]
Consults Reason: Rehabilitation disposition and treatment

History of Present Illness[ZD.1T]

Sean Patrick Lynn[ZD.2T] is a[ZD.1T] 33 y.o. male[ZD.2T] with[ZD.1T] no known PMHx[ZD.3M] admitted to UAMS on[ZD.1T] 1/13/2024[ZD.1M] for[ZD.1T] injuries sustained after 35 ft fall from ladder[ZD.1M].[ZD.1T] Per chart review, pt fell 35 ft from ladder with associated LOC. Best GCS 14 w/i 24h. Injures listed below. NSY consulted for TBI, no intervention warranted. Pt admitted to ICU for neuro monitoring[ZD.1M].[ZD.3M]

Injury list[ZD.1T]

- TBI (L frontoparietal temporal SDH, L frontal hemorrhagic contusion, L tentorial SDH, scattered SAH)
- mildly displaced nasal bone fxs

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

- small fx L pterygoid plate
- small fx R lamina
- R temporal skull base fx
- R medial wall fx
- mediastinal hematoma (no aortic root injury per TTE report)[ZD.1M]
-
- Hospital course complicated by[ZD.1T] agitation, most recently started on seroquel and prn zyprexa. Pt seen at bedside today with medical team, RN and mother at bedside. Pt unable to participate in meaningful discussion, additional hx below obtained from Mom and medical staff.[ZD.3M]
-
- Today, patient s[ZD.1T]een OOB and pulling at IV lines. States "Please stop this" and "Leave me alone" when placed back in restraints. Does not engage in discussion or answer other questions. Was redirected back to bed after standing up.[ZD.3M]
-
  - Pain -[ZD.1T] reports of "neck pain" per RN report, imaging negative[ZD.3M]
  - Sleep -[ZD.1T] will sleep for short periods at a time (10 mins) and wake up frequently throughout the night[ZD.3M]
  - Appetite -[ZD.1T] tolerated liquid diet this AM[ZD.3M]
  - Mood -[ZD.1T] + irritability and restlessness, pulls at IV and restraints. No reports of combative or aggressive behavior. Can be difficult to redirect[ZD.3M]
  - Bladder -[ZD.1T] voids over commone[ZD.3M]
  - Cognition -[ZD.1T] unaware of where he is[ZD.3M]

o
o Medical Issues Reviewed:

- Labs:[ZD.1T] leukocytosis (9>15)[ZD.3M]
- Vitals:[ZD.1T] + bradycardia[ZD.1M] early in hospital course[ZD.3M]

Objective

Physical Exam:[ZD.1T]
BP 117/59 | Pulse (!) 42 | Temp 98 °F (36.7 °C) (Axillary) | Resp 19 | Ht 1.829 m (6') | Wt 104.2 kg (229 lb 11.5 oz) | SpO2 96% | BMI 31.16 kg/m²[ZD.2T]

General:[ZD.1T] up and ambulatory, restless appearing, no aggressive behavior[ZD.3M]
HEENT:[ZD.1T] + facial bruising[ZD.3M]
Chest: non-labored breathing; CTAB, no rw/r/r
Heart: RRR,
Abdomen:[ZD.1T] ND[ZD.3M]
Psych:[ZD.1T] intermittent irritability[ZD.3M]

Neuro:
MS:[ZD.1T] Awake, not engaged in conversation. Localizes to painful stimuli[ZD.3M]
Language: Fluent.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

Speech:[ZD.1T] Normal rate an dvolune[ZD.3M]

Moto[ZD.1T]**r**
Demonstrated functional use in all extremities and in tact fine motor with bilateral hands when pulling at IV tubing

Gait: stumbles with tandem gait, + swaying with static stance while eyes are open. Impaired safety awareness[ZD.3M]

Imaging:[ZD.1T]
CT head without contrast
Final Result
Stable appearance of previously seen left tentorial and left
frontoparietal temporal subdural hematomas. Stable hemorrhagic
contusion within the left temporal lobe. Stable rightward midline
shift. No evidence of herniation. Stable scattered left cerebral
convexity subarachnoid hemorrhage.

Mild cerebral edema with effacement of the perimesencephalic cisterns,
similar compared to prior examination.

Redemonstration of calvarial and maxillofacial fractures better
described on same day dedicated maxillofacial and temporal bone imaging.

I personally reviewed the image(s) and, if necessary, I edited the
report. I agree with the report as now presented.

Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:17:09

CT head without contrast
Final Result
Mild increase in left frontoparietal temporal subdural hematoma and

left frontal lobe hemorrhagic contusion. Stable left tentorial
subdural hematoma and scattered subarachnoid hemorrhage.

Confluent hemorrhagic contusion within the left temporal lobe is mildly
increased when compared to immediate prior. Stable mild mass effect
and midline shift without evidence of transtentorial herniation.

I personally reviewed the image(s) and, if necessary, I edited the
report. I agree with the report as now presented.

Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:18:05

CT temporal bones without contrast

Final Result

Longitudinal fracture of the right temporal bone traversing the tegmen
mastoideum and anterior and posterior walls of the external auditory
canal. No evidence of ossicular disruption or otic capsule involvement.

Unremarkable HRCT of the left temporal bone.

I personally reviewed the image(s) and, if necessary, I edited the
report. I agree with the report as now presented.

Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:28:27

CT angiogram head & neck w/3D reconstruction

Consult Notes (continued)

Final Result

Noncontrast CT head:

Multicompartmental intracranial hemorrhage with prominent hemorrhagic
contusions in the left temporal lobe, small left convexity subdural
hemorrhage, left tentorial subdural hemorrhage and small left convexity
subarachnoid hemorrhage causing mild mass effect with midline shift of
7 mm to the right. No evidence of descending transtentorial herniation.

CT angiogram head and neck:

Punctate focus of active contrast extravasation in the left temporal
lobe hemorrhagic contusion.

No large vessel occlusion, hemodynamically significant stenosis or
abrupt vessel cut off. No evidence of vascular injury. Specifically
no evidence of dissection of the internal carotid arteries in the
region of the sphenoid sinus roof fracture.

Findings were discussed with Dr. Jordan in the ED at 6:43 pm on
1/13/2024.

Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:43:39

CT chest abdomen and pelvis with contrast

Final Result

1. Mild retrosternal mediastinal stranding/hematoma noted.
2. Airspace opacities and ground-glass opacities in the dependent
portions of the bilateral lungs, may be secondary to aspiration.
Cannot exclude contusions in the setting of trauma.

I personally reviewed the image(s) and, if necessary, I edited the
report. I agree with the report as now presented.

Electronically Signed by: Joe Jose, Dr. on 01/13/2024 at 23:32:10

CT maxillofacial area without contrast

Final Result

Longitudinal fracture of the right temporal bone involving the tegmen
mastoideum, anterior and posterior walls of the external auditory canal
with hemomastoid and hemotympanum. No evidence of ossicular disruption
or otic capsule involvement.

Fracture of the roof of the sphenoid sinus extending to the walls of
the bilateral carotid canals. Sphenoid hemosinus noted.

Linear minimally displaced fracture of the left lateral cribriform
plate.

Mildly displaced fractures of the bilateral nasal bones and inferior
portion of the nasal septum.

Likely chronic fracture of the right lamina papyracea in the absence of
adjacent hemosinus. Herniation of orbital fat is seen without
herniation of extraocular muscle.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:39:22

CT cervical spine without contrast

Final Result

No acute cervical spine fracture or traumatic malalignment.

Findings were discussed with Dr. Jordan in the ED at 6:43 pm on
1/13/2024.

Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:44:02

X-ray chest AP portable

Final Result

Mild bibasilar atelectasis. No large pneumothorax.

I personally reviewed the image(s) and, if necessary, I edited the
report. I agree with the report as now presented.

Electronically Signed by: Joe Jose, Dr. on 01/14/2024 at 10:06:58

ED Ultrasound FAST WITH THORACIC

Final Result

EFAST_POCUS:

Exam Information:
Images are digitally stored for quality assurance review, retrievability, and archival purposes.:
Exam type: Diagnostic

Indication(s) for Exam:
The exam was performed with the following indications:: Blunt trauma

Consult Notes (continued)

Views Obtained:
The following spaces were examined as part of the FAST exam:: Pericardial, pleural, Morison's pouch, splenorenal, and retro-vesicular spaces were examined.

Findings:
Pericardial space: Fluid absent
Pericardial tamponade: Absent
Morison's pouch (RUQ): Fluid absent
RIGHT pleural space: Fluid absent
Perisplenic (LUQ): Fluid absent
LEFT pleural space: Fluid absent
Retrovesicular space: Fluid absent
RIGHT lung sliding: Lung sliding present
Left lung slide: Lung sliding present

Interpretation:
Abdomen: No pathologic free fluid
Pericardial space: No pathologic free fluid
Tamponade: No evidence of tamponade
Pleural fluid: No pathologic free fluid
Lung: Normal lung slide

Confirmatory Study:
What confirmatory study was done?: Xray

Sign/Submit:
Submit Exam For QA Review: Yes
Attending Physician Attestation:: I was present and directly participated in the limited ultrasound procedure, have reviewed the imaging and the above represents my personal interpretation as the attending physician

Assessment/Impression[ZD.1T]

Sean Patrick Lynn[ZD.2T] is a[ZD.1T] 33 y.o. male[ZD.2T] with[ZD.1T] no known PMHx[ZD.3M] admitted to UAMS on[ZD.1T] 1/13/2024[ZD.1M] for[ZD.1T] injuries sustained after 35 ft fall from ladder[ZD.1M].

Injury list[ZD.1T]

- TBI (L frontoparietal temporal SDH, L frontal hemorrhagic contusion, L tentorial SDH, scattered SAH)
- mildly displaced nasal bone fxs
- small fx L pterygoid plate
- small fx R lamina
- R temporal skull base fx
- R medial wall fx
- mediastinal hematoma (no aortic root injury per TTE report)[ZD.1M]
-
- Rehab Problems
- Memory dysfunction
- Cognitive dysfunction[ZD.1T]
- Impaired safety awareness[ZD.3M]
- Impaired mobility and ADLs
- Impaired functional mobility, balance, gait and endurance[ZD.1T]
-
- Now with moderate TBI and impairments listed above. Currently RLA V. PMR consulted for TBI management.[ZD.3M]
-

Recommendations

1. **Rehabilitation disposition**:[ZD.1T] Pt a good candidate for inpatient rehabilitation.[ZD.3M] Current Barriers below:[ZD.1T]
   - MCD status[ZD.1M] pending approval.
   - up trending WBC count
   - recently on IV hypertonic saline and IM zyprexa.
   - Pending OT / SLP assessment[ZD.3M]. Will need detailed cog and language eval when able.[ZD.4M]
   -
2. **Agitation**: First line of agitation management is environmental modification: Re-orient patient, ensure adequate pain control, limit to 2-3 visitors at a time, minimize stimuli: lights on during day, lights and TV off at night, minimize IV lines, catheters, etc. ASAP when medically appropriate, staff to continue to maintain a quiet environment with good communication to the patient about who you are, what your are doing, and give patient warning before procedures.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

- Early distraction by getting patient OOB to chair TID.
- Limit use of benzos and Haldol as it can cause paradoxical worsening of agitation and decrease cognitive TBI recovery.[ZD.1T]
- Seroquel added today, hold off on other medication adjustments for now and monitor response. If HR allows, can consider addition of propranolol and titrate as able.
- Nicotine patch may help with irritability given smoking status[ZD.3M]

o
o Thank you for this consult[ZD.1T], will continue to follow. Please call with additional questions.[ZD.3M]
o
o ZACHARY DAWES[ZD.2T]
o UAMS PMR PGY 4[ZD.1T]
o 01/14/24[ZD.2T]
o
o Pt[ZD.3M] discussed with attending physician, Dr[ZD.1T] Means[ZD.3M]
o
o Chart correction Addendum - Marital Status was corrected from "Married" to "significant other" in the social history as per the request submitted by the patient through a Request for Amendment form.

Consult Orders
1. Trauma Neuropsychology Consult [209715665] ordered by McBain, Sacha A, PhD at 01/17/24 1034

Trauma neuropsychology consult received/acknowledged. Patient asleep in bed and unable to be roused at time of visit. Staff present in the room described observing patient difficulties with expressive speech (confused/unintelligible at times), and hearing difficulties. Trauma neuropsychology to follow-up to assess orientation / cognition and language functioning at next available day on unit.[TB.1M]

1. Consult Urology [210083334] ordered by Tran, Marisa D., MD at 01/22/24 0952

01/22/2024
Patient: Sean Patrick Lynn
MRN: 004120303

Urology Consult Note

Reason for Consult:[SH.1T] traumatic foley removal[SH.1M]

A/P: 33 y.o.[SH.1T] otherwise healthy[SH.1M] male with[SH.1T] a[SH.1M] fall from height[SH.1C] 1/13/24 (~35 feet while cleaning out gutters)[SH.1M] with left temporal lobe hemorrhagic contusions, right temporal bone fracture, sphenoid and skull base fractures, SAH, SDH[SH.1C], and SIADH[SH.1M].[SH.1C] He has shown increasing agitation and has been non-cooperative.

Traumatic Foley Removal
-Replace foley cath and leave in place for 72 hours.
-Monitor for additional bleeding from urinary meatus or hematuria
-Urine in tubing currently clear
-Stat lock in place to secure foley, patient sedated and in BUE restraints now
-No acute urological issues at this time.
-Urology available for questions or concerns, appreciate consult.[SH.1M]

Mr. Lynn was seen and staffed by Dr[SH.1T] Machado[SH.1M] who agrees with the assessment and plan and who performed the substantive portion of MDM.

History of Present Illness:
33 y.o.[SH.1T] otherwise healthy[SH.1M] male with a[SH.1T] fall from height[SH.1C] 1/13/24 (~35 feet while cleaning out gutters)[SH.1M] with left temporal lobe hemorrhagic contusions, right temporal bone fracture, sphenoid and skull base fractures, SAH, SDH[SH.1C] and SIADH[SH.1M].[SH.1C] He has shown increasing agitation and has been non-cooperative over the last few days trying to elope, refusing lab and IVs. Earlier today he traumatically removed his foley catheter

resulting in bleeding from the urinary meatus. The nurse was able to replace the catheter without difficulty. Patient is now sedated and in BUE restraints as he is a risk to himself r/t his cognitive deficits from TBI.[SH.1M]

Review of Systems:
Comprehensive 14 system review was completed and found to be negative except as mentioned in HPI

Consult Notes (continued)

Recent Imaging:
X-ray chest AP portable

Result Date: 1/14/2024
Mild bibasilar atelectasis. No large pneumothorax. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Joe Jose, Dr. on 01/14/2024 at 10:06:58

CT temporal bones without contrast

Result Date: 1/14/2024
Longitudinal fracture of the right temporal bone traversing the tegmen mastoideum and anterior and posterior walls of the external auditory canal. No evidence of ossicular disruption or otic capsule involvement. Unremarkable HRCT of the left temporal bone. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:28:27

CT head without contrast

Result Date: 1/14/2024
Mild increase in left frontoparietal temporal subdural hematoma and left frontal lobe hemorrhagic contusion. Stable left tentorial subdural hematoma and scattered subarachnoid hemorrhage. Confluent hemorrhagic contusion within the left temporal lobe is mildly increased when compared to immediate prior. Stable mild mass effect and midline shift without evidence of transtentorial herniation. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:18:05

CT head without contrast

Result Date: 1/14/2024
Stable appearance of previously seen left tentorial and left frontoparietal temporal subdural hematomas. Stable hemorrhagic contusion within the left temporal lobe. Stable rightward midline shift. No evidence of herniation. Stable scattered left cerebral convexity subarachnoid hemorrhage. Mild cerebral edema with effacement of the perimesencephalic cisterns, similar compared to prior examination. Redemonstration of calvarial and maxillofacial fractures better described on same day dedicated maxillofacial and temporal bone imaging. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:17:09

ED Ultrasound FAST WITH THORACIC

Result Date: 1/14/2024
EFAST_POCUS: Exam Information: Images are digitally stored for quality assurance review, retrievability, and archival purposes.: Exam type: Diagnostic Indication(s) for Exam: The exam was performed with the following indications:: Blunt trauma Views Obtained: The following spaces were examined as part of the FAST exam:: Pericardial, pleural, Morison's pouch, splenorenal, and retro-vesicular spaces were examined. Findings: Pericardial space: Fluid absent Pericardial tamponade: Absent Morison's pouch (RUQ): Fluid absent RIGHT pleural space: Fluid absent Perisplenic (LUQ): Fluid absent LEFT pleural space: Fluid absent Retrovesicular space: Fluid absent RIGHT lung sliding: Lung sliding present Left lung slide: Lung sliding present Interpretation: Abdomen: No pathologic free fluid Pericardial space: No pathologic free fluid

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

Tamponade: No evidence of tamponade Pleural fluid: No pathologic free fluid Lung: Normal lung slide Confirmatory Study: What confirmatory study was done?: Xray Sign/Submit: Submit Exam For QA Review: Yes Attending Physician Attestation:: I was present and directly participated in the limited ultrasound procedure, have reviewed the imaging and the above represents my personal interpretation as the attending physician Electronically signed by Watkins, Adam on Sunday, January 14, 2024 at 7:17 AM

CT chest abdomen and pelvis with contrast

Result Date: 1/13/2024
1. Mild retrosternal mediastinal stranding/hematoma noted. 2. Airspace opacities and ground-glass opacities in the dependent portions of the bilateral lungs, may be secondary to aspiration. Cannot exclude contusions in the setting of trauma. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Joe Jose, Dr. on 01/13/2024 at 23:32:10

CT cervical spine without contrast

Result Date: 1/13/2024
No acute cervical spine fracture or traumatic malalignment. Findings were discussed with Dr. Jordan in the ED at 6:43 pm on 1/13/2024. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:44:02

CT angiogram head & neck w/3D reconstruction

Result Date: 1/13/2024
Noncontrast CT head: Multicompartmental intracranial hemorrhage with prominent hemorrhagic contusions in the left temporal lobe, small left convexity subdural hemorrhage, left tentorial subdural hemorrhage and small left convexity subarachnoid hemorrhage causing mild mass effect with midline shift of 7 mm to the right. No evidence of descending transtentorial herniation. CT angiogram head and neck: Punctate focus of active contrast extravasation in the left temporal lobe hemorrhagic contusion. No large vessel occlusion, hemodynamically significant stenosis or abrupt vessel cut off. No evidence of vascular injury. Specifically no evidence of dissection of the internal carotid arteries in the region of the sphenoid sinus roof fracture. Findings were discussed with Dr. Jordan in the ED at 6:43 pm on 1/13/2024. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:43:39

CT maxillofacial area without contrast

Result Date: 1/13/2024
Longitudinal fracture of the right temporal bone involving the tegmen mastoideum, anterior and posterior walls of the external auditory canal with hemomastoid and hemotympanum. No evidence of ossicular disruption or otic capsule involvement. Fracture of the roof of the sphenoid sinus extending to the walls of the bilateral carotid canals. Sphenoid hemosinus noted. Linear minimally displaced fracture of the left lateral cribriform plate. Mildly displaced fractures of the bilateral nasal bones and inferior portion of the nasal septum. Likely chronic fracture of the right lamina papyracea in the absence of adjacent hemosinus. Herniation of orbital fat is seen without herniation of extraocular muscle. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:39:22

Recent Imaging:
X-ray chest AP portable

Result Date: 1/14/2024
Mild bibasilar atelectasis. No large pneumothorax. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Joe Jose, Dr. on 01/14/2024 at 10:06:58

CT temporal bones without contrast

Result Date: 1/14/2024
Longitudinal fracture of the right temporal bone traversing the tegmen mastoideum and anterior and posterior walls of the external auditory canal. No evidence of ossicular disruption or otic capsule involvement. Unremarkable HRCT of the left temporal bone. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:28:27

CT head without contrast

Result Date: 1/14/2024
Mild increase in left frontoparietal temporal subdural hematoma and left frontal lobe hemorrhagic contusion. Stable left tentorial subdural hematoma and scattered subarachnoid hemorrhage. Confluent hemorrhagic contusion within the left temporal lobe is mildly increased when compared to immediate prior. Stable mild mass effect and midline shift without evidence of transtentorial herniation. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:18:05

CT head without contrast

Result Date: 1/14/2024
Stable appearance of previously seen left tentorial and left frontoparietal temporal subdural hematomas. Stable hemorrhagic contusion within the left temporal lobe. Stable rightward midline shift. No evidence of herniation. Stable scattered left cerebral convexity subarachnoid hemorrhage. Mild cerebral edema with effacement of the perimesencephalic cisterns, similar compared to prior examination. Redemonstration of calvarial and maxillofacial fractures better described on same day dedicated maxillofacial and temporal bone imaging. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:17:09

ED Ultrasound FAST WITH THORACIC

Result Date: 1/14/2024
EFAST_POCUS: Exam Information: Images are digitally stored for quality assurance review, retrievability, and archival purposes.: Exam type: Diagnostic Indication(s) for Exam: The exam was performed with the following indications:: Blunt trauma Views Obtained: The following spaces were examined as part of the FAST exam:: Pericardial, pleural, Morison's pouch, splenorenal, and retro-vesicular spaces were examined. Findings: Pericardial space: Fluid absent Pericardial tamponade: Absent Morison's pouch (RUQ): Fluid absent RIGHT pleural space: Fluid absent Perisplenic (LUQ): Fluid absent LEFT pleural space: Fluid absent

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

Retrovesicular space: Fluid absent RIGHT lung sliding: Lung sliding present Left lung slide: Lung sliding present Interpretation: Abdomen: No pathologic free fluid Pericardial space: No pathologic free fluid Tamponade: No evidence of tamponade Pleural fluid: No pathologic free fluid Lung: Normal lung slide Confirmatory Study: What confirmatory study was done?: Xray Sign/Submit: Submit Exam For QA Review: Yes Attending Physician Attestation:: I was present and directly participated in the limited ultrasound procedure, have reviewed the imaging and the above represents my personal interpretation as the attending physician Electronically signed by Watkins, Adam on Sunday, January 14, 2024 at 7:17 AM

CT chest abdomen and pelvis with contrast

Result Date: 1/13/2024
1. Mild retrosternal mediastinal stranding/hematoma noted. 2. Airspace opacities and ground-glass opacities in the dependent portions of the bilateral lungs, may be secondary to aspiration. Cannot exclude contusions in the setting of trauma. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Joe Jose, Dr. on 01/13/2024 at 23:32:10

CT cervical spine without contrast

Result Date: 1/13/2024
No acute cervical spine fracture or traumatic malalignment. Findings were discussed with Dr. Jordan in the ED at 6:43 pm on 1/13/2024. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:44:02

CT angiogram head & neck w/3D reconstruction

Result Date: 1/13/2024
Noncontrast CT head: Multicompartmental intracranial hemorrhage with prominent hemorrhagic contusions in the left temporal lobe, small left convexity subdural hemorrhage, left tentorial subdural hemorrhage and small left convexity subarachnoid hemorrhage causing mild mass effect with midline shift of 7 mm to the right. No evidence of descending transtentorial herniation. CT angiogram head and neck: Punctate focus of active contrast extravasation in the left temporal lobe hemorrhagic contusion. No large vessel occlusion, hemodynamically significant stenosis or abrupt vessel cut off. No evidence of vascular injury. Specifically no evidence of dissection of the internal carotid arteries in the region of the sphenoid sinus roof fracture. Findings were discussed with Dr. Jordan in the ED at 6:43 pm on 1/13/2024. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:43:39

CT maxillofacial area without contrast

Result Date: 1/13/2024
Longitudinal fracture of the right temporal bone involving the tegmen mastoideum, anterior and posterior walls of the external auditory canal with hemomastoid and hemotympanum. No evidence of ossicular disruption or otic capsule involvement. Fracture of the roof of the sphenoid sinus extending to the walls of the bilateral carotid canals. Sphenoid hemosinus noted. Linear minimally displaced fracture of the left lateral cribriform plate. Mildly displaced fractures of the bilateral nasal bones and inferior portion of the nasal septum. Likely chronic fracture of the right lamina papyracea in the absence of adjacent hemosinus. Herniation of orbital fat is seen without herniation of extraocular muscle. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:39:22

Winn, Kesley M, MD at 1/24/2024 1619

Version 1 of 1

Author: Winn, Kesley M, MD
Filed: 1/24/2024 4:58 PM
Editor: Winn, Kesley M, MD (Resident)

Service: Psychiatry
Date of Service: 1/24/2024 4:19 PM

Author Type: Resident
Status: Attested
Cosigner: Lea, Payton D, MD at 1/24/2024 8:16 PM

Consult Orders
1. Consult Psychiatry [210247400] ordered by Rezayev, Arthur, MD at 01/24/24 1130

Attestation signed by Lea, Payton D, MD at 1/24/2024 8:16 PM

I have seen and evaluated the patient and discussed their management with resident on 1/24/24. I have reviewed and agree with the above documentation, findings, and plan of care. I have personally reviewed pertinent labs and diagnostic studies, was present for the key elements of the encounter, and completed the MDM in its entirety.

Additional findings/impressions: Patient with agitation after experiencing traumatic brain injury over 10 days ago. He was readmitted to the SICU on 1/21 due to worsening agitation requiring use of Precedex and psychiatry consulted to assist with medication management. He is currently on numerous deliriogenic medications (benzodiazepines and barbiturates) that, while sedating, are likely contributing to his confusion and agitation. Recommend consolidating his medications to reduce polypharmacy and eliminate deliriogenic medications. Would preferably utilize IV Depakote as described below, however if there is a concern that this was the cause of his hyponatremia then scheduled IV Haldol could be used instead. Other non-pharmacologic recommendations provided below to assist in management of patients with TBI.

Updated diagnoses:
TBI
Agitation

Psychiatry Consult Note

Patient Name: Sean Patrick Lynn
MRN: 004120303
Date: 01/24/2024
Location: H4 - TSICU/CVICU

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

Hospital Day: 11

Subjective

Consult Reason/CC:[KW.1T] **agitation**[KW.1M]

Hx of Present Illness: Sean Patrick Lynn is a 33 y.o. male with[KW.1T] no known psychiatric history who is admitted to the SICU for agitation management s/p traumatic fall with[KW.1M] left temporal lobe hemorrhagic contusions, right t bone[KW.1C] fracture[KW.1M], sphenoid and skull base[KW.1C] fracture. Patient was de-escalated to the floor but required readmission to SICU on 1/21 d/t sustained agitation, attempted elopements, pulling out lines.

Patient unable to provide history as sedated and sleeping. Mother present who provided all history. She was emphasized she believes Mr. Lynn should have more autonomy in his current care and had trouble grasping his AMS d/t TBI. She believes most of his delirium is d/t polypharmacy and that if he were weaned off medications he would likely regain most capacity. Spent some time discussing his agitation is likely multi-factorial and may not resolve completely when medications are removed. She is in agreement with consolidation of medications with attempts to use less medications for better control of agitation.[KW.1M]

Psych ROS:[KW.1T]
- UTA. Mother denies[KW.1M]

Past Psychiatric Hx:[KW.1T]
- UTA. Mother denies any psych history[KW.1M]

Substance Use History:[KW.1T]
Mother denies[KW.1M]

Social Hx:[KW.1T]
Lives in LR with 8 yo daughter and girlfriend of 10 years. Works in construction. Chaos of early childhood with mom losing custody. Period of homelessness in early adulthood.[KW.1M]

Past Medical Hx:
History reviewed. No pertinent past medical history.

Family History:
History reviewed. No pertinent family history.

Past Surgical Hx:
History reviewed. No pertinent surgical history.

Medications:

Current Facility-Administered Medications:

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

• acetaminophen (Tylenol) tablet 975 mg, 975 mg, Feeding Tube, Q6H, Spallino, Christian, MD, 975 mg at 01/24/24 0948
• carboxymethylcellulose sodium (Refresh Plus) 0.5 % ophthalmic solution, 1 drop, Both Eyes, TID PRN, Pasman, Crystal, APRN
• ciprofloxacin-dexAMETHasone (Ciprodex) 0.3-0.1 % otic suspension, 4 drop, Right Ear, BID, Stephenson, Krista J., MD, 4 drop at 01/24/24 0808
• dexMEDEtomidine (Precedex) 400 mcg/NaCl 0.9 % 100 mL (4 mcg/mL) infusion (premix), 0.2-1.5 mcg/kg/hr, Intravenous, Continuous, Davis, Benjamin L, MD, Last Rate: 39.4 mL/hr at 01/24/24 1402, 1.5 mcg/kg/hr at 01/24/24 1402
• diazePAM (Valium) tablet 5 mg, 5 mg, Feeding Tube, Q8H, Rose, Tyler K, MD, 5 mg at 01/24/24 0948
• [Held by provider] divalproex (Depakote) enteric coated tablet 500 mg, 500 mg, Oral, Q8H, Beumeler, Britney M, APRN, CNP, 500 mg at 01/21/24 1025

Diagnostic Studies:
I have reviewed studies and pertinent findings noted below:[KW.1T]
none[KW.1M]

Vital Signs:
BP 120/67 | Pulse 75 | Temp 96.5 °F (35.8 °C) (Axillary) | Resp 15 | Ht 1.829 m (6') | Wt 104 kg (229 lb 4.5 oz) | SpO2 100% | BMI 31.10 kg/m²

Mental Status Exam:
Appearance: 33 y.o.[KW.1T] CM[KW.1M] wearing[KW.1T] hospital gown[KW.1M] with[KW.1T] fair[KW.1M] attention to grooming and hygiene[KW.1T], bruising on R eye, sleeping[KW.1M]

Suicide Risk Assessment

The following risk factors for suicide were identified:[KW.1T] Current diagnosis of TBI, Impulsivity, Significant anxiety or panic, Ongoing significant medical illness, Family turmoil or chaos and Change in treatment[KW.1M].

The following protective factors for suicide were identified:[KW.1T] Responsibility to family/pets/loved ones and No prior history of self-harm or suicide attempts[KW.1M].

Suicidal thoughts inquiry:[KW.1T] UTA[KW.1M].

After assessing risk factors vs. protective factors and inquiring about suicidal thoughts, it is my current clinical judgment that the patient's current risk of suicidality is[KW.1T] UTA[KW.1M].

Assessment

Assessment: Sean Patrick Lynn is a 33 y.o. male with[KW.1T] no known psychiatric history who is admitted to the SICU for agitation management s/p traumatic fall with[KW.1M] left temporal lobe hemorrhagic contusions, right t bone[KW.1C]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

fracture[KW.1M], sphenoid and skull base[KW.1C] fracture. Patient was de-escalated to the floor but required readmission to SICU on 1/21 d/t sustained agitation, attempted elopements, pulling out lines. Multiple medications have been utilized (Valium, Ativan, propranolol, Haldol, Zyprexa, Depakote, phenobarbital, Seroquel) to attempt to control agitation d/t delirium with little success at this point outside of Precedex and physical restraints. Patient continues to require ICU-level care for Precedex. Depakote and Seroquel were held d/t concern for medication-induced SIADH. With Na trending up now and at 133, would recommend restarting Depakote as a means to control agitation after TBI. Further med recs below. Would avoid deliriogenic medications, as they can achieve sedation but worsen downstream delirium and agitation. Psychiatry will continue to follow along.[KW.1M]

Diagnoses (In DSM-5 Format):[KW.1T]
Delirium
TBI[KW.1M]

Recommendations

Recommendations:

Pharmacologic Recommendations:[KW.1T]
- Consider increasing p[KW.1M]ropranolol[KW.1T] to 30mg q6H FT
- Consider restarting D[KW.1M]epakote[KW.1T] 500mg IV q8H
- If concern for hyponatremia with Depakote, could consider using Haldol 2.5mg IV BID instead
- Haldol 10mg or[KW.1M] Olanzapine[KW.1T] 10mg IV q6h[KW.1M] PRN[KW.1T] for agitation[KW.1M]
- Avoid[KW.1T] deliriogenic medications (phenobarbitol, Valium, Ativan)[KW.1M] that can worsen confusion and cause paradoxical agitation

Non-Pharmacologic Recommendations:
- Refusing care/lab draws/hitting at staff:
  - Allow more physical distance during interactions
  - Inform patient beforehand that close proximity will be needed for certain activities (labs, vitals, etc.)
- Restlessness/hyperactivity/confusion at night
  - Minimize overnight interruptions
  - Reduce daytime naps by turning on lights and opening blinds
  - Review medications that may be reducing nighttime sleepiness or increasing daytime fatigue
  - Initiate physical therapy or activities to stimulate patient during the day
- Not listening/misunderstanding/non-compliance with requests
  - Be specific in language and reduce use of sarcasm, idioms, and medical jargon
  - Adjust speech content to estimated intelligence of patient
  - Do not lie or intentionally decieve
- Tearfulness/pacing/yelling
  - Monitor patient's emotions while interacting with staff
  - Consider pharmacotherapy to address mood
  - Review whether patient could be experiencing withdrawal from caffeine, nicotine, or other medications
- Irritability/paranoia
  - Be selective in room position on unit to reduce stimulation
  - Limit the number of unnecessary visitors (e.g. trainees)
  - Review necessity of lab draws/vitals and tailor schedule to fit with patient

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Consult Notes (continued)

- Exit seeking behaviors
  - Selecting a room that is not near an exit
  - Consider monitoring device on open units
  - Pay attention if patients misperceive conversations with others as applying to them (e.g., telling another patient their ride is on the way)
- Purposeless behaviors/restlessness/pulling at lines
  - Facilitate activities to assist in preserving motor skills/dexterity while also providing distraction
  - Work with PT/OT on appropriate activities to provide physical activity as well as potential outlet of energy or anxiety
- Disorientation
  - Repeatedly introduce yourself, even if patient has met you multiple times across multiple days
  - Provide written information on reason for hospitalization, medications, and treatments

- Discussed above management recommendations with primary provider

We appreciate this consult. Psychiatry will[KW.1T] continue to follow. Please call with any questions.

Editor: Hester, D Micah, PhD (Ethicist)

CLINICAL ETHICS SERVICE CONSULT NOTE

The Clinical Ethics Consultation Service is available every day of the year, 24/7, to any patient, family member, surrogate/guardian, or member of the healthcare team. The service collaborates to address ethical issues that arise in the course of patient care. Recommendations are advisory and do not count as legal advice. Ethics consults are not billed in any form. Anyone can reach Ethics by calling the pager number at the bottom of this note.

Sean Patrick Lynn is a 33 y.o. year old male, admitted on 1/13/2024 5:11 PM, and currently in 419/H4-419. The attending physician for this patient is Kimbrough, Mary K, MD.

Consult Notes (continued)

I was asked to provide an ethics consultation for Sean Patrick Lynn. The stated ethical issue that prompted my involvement was[DH.1T] a concern about the patient and his mother wanting the patient to leave AMA, even though he is still suffering acute issues from his TBI.[DH.1M].
Role of requestor: Resident
Requesting Service: SICU

SUMMARY OF CIRCUMSTANCES

Patient Values & Preferences

Advanced Directives: No
POLST: No
Code status: Full Code

Decision Making Capacity: Unknown

Clinical Ethics Meetings
Care Team Meeting was held: No
Family Meeting was held: No[DH.1T]
A meeting is not planned at this time.[DH.1M].

PERTINENT DETAILS and ASSESSMENT OF ETHICAL ISSUES[DH.1T]

Mr. Lynn suffered a TBI and other traumatic injuries after a fall. After having moved units several times, he was back in the SICU, agitated and wanting to leave. His mother concurred with him. The team, however, did not think the discharge was in his best medical/health interests.

Ethically, patients with capacity can make their own decisions about their health care, so long as they do not put others at danger. However, Mr. Lynn's capacity is questionable, at best, and thus his decision to leave may not be a capacitated decision. His mother, however, also believed he should be allowed to leave, and not other persons were sought out to be a potential surrogate.

Now, when surrogates determine to take patients out of the hospital against medical advice (AMA), they must meet a higher bar of scrutiny (ethically, speaking, at least), since that decision puts a vulnerable patient at a medical risk that the physicians do not believe is in the patient's interests medically.[DH.1M]

RECOMMENDATION or RESOLUTION[DH.1T]

While ethically it remains concerning to allow Mr Lynn to leave at this time, Arkansas has no law (and UAMS, no policy) that covers so-called "medical holds," which means that the ability to hold a patient who wants to leave AMA can only happen in a very limited set of conditions where the team can show a significant risk of imminent harm could befall the incapacitated patient should they leave the hospital. The team is unable to make such a claim, and thus, while it is understandably disturbing to the team, there are few options other than to let Mr. Lynn go, after signing AMA paperwork. As of the writing of this note, it is indicated in the social work and resident notes that that paperwork has been signed and Mr. Lynn will be leaving this afternoon.[DH.1M]

This patient[DH.1T] is[DH.1M] a good candidate for psycho-social support.

A standard ROTEM resulted on 1/13/2024: 5:16 PM.

· FIBRINOGEN FUNCTION: 12 mm

o[NB.1T] FIBTEM A10 IS NOT DECREASED (>10mm) suggesting adequate fibrin cross-linking[NB.1M]

· PLATELET FUNCTION; FIBTEM A10 = 12 mm, EXTEM A10 = 52 mm

o[NB.1T] FIBTEM A10 IS >/=10mm[NB.1M]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Op/Procedure Notes (continued)

AND

o[NB.1T] EXTEM A10 IS NOT DECREASED (>40mm)[NB.1M]

o[NB.1T] This constellation of FIBTEM A10 and EXTEM A10 values suggest normal platelet function[NB.1M]

· CLOTTING TIME; INTEM CT = 172 seconds, EXTEM CT = 82 seconds

.[NB.1T] INTEM CT IS NORMAL suggesting clotting factors are adequate for hemostasis[NB.1M]

.[NB.1T] EXTEM CT IS NORMAL suggesting clotting factors are adequate for hemostasis[NB.1M]

· FIBRINOLYSIS; EXTEM ML = 7 %

.[NB.1T] EXTEM ML is NOT ELEVATED (<15%) suggesting normal fibrinolysis[NB.1M]

Overall, ROTEM suggests:

· No treatment is needed

This note does not constitute transfusion recommendations, which must be made on clinical grounds at the discretion of the attending physician caring for this patient.

See Media Tab in Chart Review for ROTEM tracing.

Gray, Emily, CCC-SLP at 1/15/2024 1126

Version 2 of 2

Author: Gray, Emily, CCC-SLP | Service: Speech Language Pathology | Author Type: Speech and Language Pathologist
Filed: 9/4/2024 8:06 AM | Date of Service: 1/15/2024 11:26 AM | Status: Addendum
Editor: Gray, Emily, CCC-SLP (Speech and Language Pathologist)

Procedure Orders
1. Clinical Swallow Eval and Treat [209641613] ordered by Kindy, Erin, APRN, CNP at 01/14/24 0759

Pre-procedure Diagnoses
1. Oropharyngeal dysphagia

Post-procedure Diagnoses
1. Oropharyngeal dysphagia

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Op/Procedure Notes (continued)

Procedures
1. SLP CLINICAL SWALLOW EVALUATION - CPT 92610 [SLP7 (Custom)]

SPEECH-LANGUAGE PATHOLOGY:
CLINICAL SWALLOW EVALUATION

Pt seen in[EG.1T] hospital room/bedside[EG.1M] for[EG.1T] swallowing[EG.1M] procedure. The Speech-Language Pathologist wore the following PPE:[EG.1T] gloves and surgical mask[EG.1M]. At the time of this procedure, the patient's COVID-19 status was[EG.1T] not tested[EG.1M].

Patient Name:[EG.1T] Sean Patrick Lynn[EG.2T]
Date of Birth:[EG.1T] 6/24/1990[EG.2T]
MRN:[EG.1T] 004120303[EG.2T]
Date of Evaluation:[EG.1T] 1/15/2024
SLP Eval Start Time: 0850
SLP Eval Stop Time: 0910[EG.2T]

Referral and History:
This[EG.1T] 33 y.o. male[EG.2T] was referred for a clinical dysphagia exam by[EG.1T] Erin Kindy, APRN[EG.1M] secondary to[EG.1T] fall from 30 feet resulting in TBI, facial fxs, and skull fxs. Informally, pt appears to be ~RLA IV. Pt's may have some expressive and language deficits, but it is difficult to fully assess. Pt has varying degrees of alertness with moments of somnolence then very active/restless. Mother present at bedside. Pt was unable to answer orientation questions or other intake questions. He was unable to complete oral hygiene; clinician cleansed oral cavity.[EG.1M]

P[EG.1T]er Dr. Arensberg 1/13/24: "[EG.1M]HISTORY OF MECHANISM OF INJURY: Fall from 30 feet
Activation Level: Level 2 Trauma Team Activation
Date of Injury: 1/13/2024
Time of Injury- 1630
35 M 35 ft ladder. Pt was cleanin[EG.1C]g[EG.3M] gutters and fell off[EG.1C] a[EG.3M] ladder. + LOC. On arrival is altered. On 15L nonrebreather. Unknown PMH. Motor function is decreased and there is blood present within the R ear canal. Dried blood in BL nares and externally. R Superior periorbital hematoma without lacerations. He is confused, does not answer questions, makes noise.
SCENE INFORMATION
Scene Blood Pressure: 120/70
LOC: Yes
Hemodynamically: stable
Intubated: No
Transport: EMS
Injuries
- SAH, SDH
- Nasal fractures
- Basilar skull fracture, R parietal and temporal
- Potential blunt aortic root injury
- R lamina per pre she fracture with orbital fat herniation[EG.1C]"[EG.1M]

Past Medical History:[EG.1T] History reviewed. No pertinent past medical history.[EG.2T]
Past Surgical History:[EG.1T] History reviewed. No pertinent surgical history.[EG.2T]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Op/Procedure Notes (continued)

Onset date of symptoms:[EG.1T] 1/13/24[EG.1M]
Consent for intervention given by:[EG.1T] Patient[EG.1M]

Prior Level of Swallowing Function:[EG.1T] unable to assess[EG.1M]

Pertinent Information:
Respiratory Status[EG.1T]: Oxygen Delivery: Room air
CXR results 1/13/24: "[EG.1M]*Mild bibasilar atelectasis. No large pneumothorax.*[EG.1C]"[EG.1M]

Level of Alertness:[EG.1T] Alert only with cues and Lethargic[EG.1M]

Behavioral/Cognition:[EG.1T] Restless, impulsive, cognitive-communication deficits[EG.1M]

Current Diet:[EG.1T] NPO: except ice chips[EG.1M]

Ability to Manage Secretions: {[EG.1T] Appears adequate[EG.1M]

Dentition/ oral hygiene:[EG.1T] Unable to adequately assess[EG.1M]

Pain
Current Visit Pain:[EG.1T] 0/10[EG.1M]

Patient Positioning:[EG.1T] Upright in bed[EG.1M]

Vision for feeding:[EG.1T] Unable to assess[EG.1M]

Barriers to Learning:[EG.1T] Cognition[EG.1M]

Oral Mechanism Examination:[EG.1T]
Pt was unable to participate in an oral motor exam. Informally, no impairments with lingual and labial strength and ROM.[EG.1M]

Vocal Quality-Cranial Nerve X (Vagus Nerve):
Phonation of /a/ for several seconds (strong/loud):[EG.1T] Unable to complete MPT; subjectively no voice abnormalities detected when pt offered speech[EG.1M]

Potential for Expectorating Material:
Cough:[EG.1T] Unable to assess[EG.1M]
Throat Clear:[EG.1T] Unable to assess[EG.1M]

Results of Swallow Examination:[EG.1T]
SLP cleansed oral cavity with toothbrush and toothpaste. Pt was unable to swish and spit water to remove toothpaste from oral cavity; pt swallowed water instead. SLP adhered to ENT and ophthalmology no straw recs.[EG.1M]
Various liquid/food consistencies were presented including:[EG.1T] pureed, thin liquid and regular solid[EG.1M] via[EG.1T] spoon and cup[EG.1M] with the following results:
Oral phase:
Active acceptance of bolus.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Op/Procedure Notes (continued)

Adequate labial seal with spoon and[EG.1T] cup edge[EG.1M] without anterior loss of bolus.[EG.1T]
Unremarkable post-swallow oral residue[EG.1M].
Pharyngeal phase:
Laryngeal elevation present up on palpation.
No subtle or overt s/s of aspiration with any other trials/consistencies.
Vocal quality remained clear without any changes in respiratory status.

Compensations Used during study/ Response:[EG.1T]
None[EG.1M]

Clinical Impressions:
Patient[EG.1T] Sean Patrick Lynn[EG.2T] presents with[EG.1T] **suspected acute mild oropharyngeal dysphagia, mostly due to cognitive and behavioral factors related to TBI. Pt likely will be impulsive and will have varying degrees of alertness. A full liquid diet is recommended, but pt should only be fed if pt is fully alert and participating.**
Pt's risk of aspiration is elevated; cognitive status will be the biggest factor for aspiration risk.[EG.1M] .

Prognosis is[EG.1T] good[EG.1M].

Recommendations:
Recommended Diet:[EG.1T] Full liquid diet (IDDSI 0)[EG.1M] , then subsequently upgrade diet[EG.1T] per SLP recs[EG.1M] .
Swallowing/Feeding Techniques:[EG.1T]
- Sit upright with PO intake
- Oral hygiene before meals
- Small bites and sips
- Eliminate distractions during meals
- NO STRAWS (per ENT and ophtho)[EG.1M]

Patient Positioning:[EG.1T]
- Upright in chair
- Upright in bed[EG.1M]

Mealtime Set-Up Instructions:[EG.1T]
- Needs non-distracting environment (turn off TV, limit visitors, limit talking)
- Remove straw
- Check that food is consistent with diet ordered[EG.1M]

Supervision with Meals:[EG.1T]
- 1:1 Constant supervision, do not leave patient alone with food
- Eating only with trained medical staff or family[EG.1M]

Medication Route:[EG.1T]
- One at a time with thin liquids or crushed in puree. MAKE SURE PT IS FULLY ALERT BEFORE PROVIDING PO MEDS[EG.1M]

Oral Care:[EG.1T]
- Meticulous oral hygiene at least 3-4 times daily to remove biofilm from oral cavity[EG.1M]

Follow-up recommendations include:[EG.1T]
- Skilled Speech Therapy for direct swallowing treatment 2-3 times per week for a total of 2-3 sessions.[EG.1M]

Dysphagia treatment techniques will include:[EG.1T]
- Ongoing swallow eval in tx[EG.1M]

Recommended referral/consultations include:[EG.1T]
- N/A[EG.1M]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Op/Procedure Notes (continued)

Results/Recommendations Discussed with, or copies sent to:[EG.1T] Patient, Family/caregiver, Ordering Physician and Nurse/Nursing staff[EG.1M]

FUNCTIONAL DEFICIT:[EG.1T] Swallowing: 4 out of 7[EG.1M]

Patient / Family Education:
Patient / Family participated in goal setting:[EG.1T] Yes[EG.1M]
Education:[EG.1T] With patient completed
With family/caregiver completed
With staff completed[EG.1M]

Objective:

Encounter Problems

Encounter Problems (Active)

SWALLOWING

Dates: Start: 01/15/24

LTG-Safe swallow function

Dates: Start: 01/15/24 Expected End: 01/29/24
Description: LTG-Patient will establish safe swallow function for management of own secretions/po trials with 100% accuracy

STG-Tolerate P.O. therapeutic trials

Dates: Start: 01/15/24 Expected End: 01/29/24
Description: STG-Patient will tolerate P.O. therapeutic trials without s/s aspiration with 90% accuracy

Thank you for allowing Speech Pathology Services to participate in the care of your patient. If you have questions or concerns, please call vocera by name.

Speech-Language Pathologist:[EG.1T] Emily Gray, CCC-SLP[EG.2T]

Chart Correction Addendum: Patient submitted a Request for Amendment of Health Information. Upon review of the chart, a mistake was discovered concerning the location where the patient's injury occurred. According to the Emergency Medical Services record, the patient was not at his place of residence when the injury occurred; therefore, **"**cleaning his gutters**"** was corrected to **"**cleaning gutters**"** in the Referral and History.[EG.3C]

Nursing Progress Note

Langston, Jacob, RN at 1/14/2024 1018

Version 1 of 1

Author: Langston, Jacob, RN | Service: — | Author Type: Registered Nurse
Filed: 1/14/2024 10:26 AM | Date of Service: 1/14/2024 10:18 AM | Status: Signed
Editor: Langston, Jacob, RN (Registered Nurse)

Due to agitation/confusion I am unable to keep some monitoring equipment (pulse ox, EKG leads, BP cuff) or SCDs on *continuously.* Equipment intermittently replaced as patient allows. See assessment flowsheets for further details. Attempted relief of agitation and confusion by reminding patient of his surroundings and promoting a calming and comfortable environment. Restraints de-escalated as patient cooperation permits -- see restraint flowsheet.

Patient relatively calm without sedation at this time, but becomes suddenly agitated with or without stimulation.

Kindy APRN notified of difficulty in maintaining monitoring equipment and SCDs.[JL.1M]

Editor: Patterson, Jason, RN (Registered Nurse)

Pt able to spontaneously void after (the pt) pulling out foley overnight. Urine is pink/red, some blood noted around the meatus. No frank blood noted or evidence of continued bleeding.[JP.1M] Urology on board and following as well.[JP.2M] Will continue to monitor pt for changes, pt otherwise hemodynamically stable.[JP.1M] Also of note, right upper arm PIV is reddened, swollen and warm to the touch. Precedex infusing in said PIV. Infusion stopped and PIV d/c'd 2/2 infiltration.[JP.3M]

0905: Pt girlfriend came to visit pt. Pt became markedly more agitated with girlfriend and was somehow able to pull dobhoff out. Tube feeds stopped, and attempts to redirect the pt were unsuccessful. New dobhoff placed and confirmed by auscultation. Abdominal xray ordered to confirm placement as well. I will resume tube feeds and med admin once placement verified by xray.[JP.4M]

0955: Pt voided another 700mls. Urine still a little pink tinged from trauma of pulling foley out this morning, but much improved in color and concentration. I will continue to monitor for bleeding and evidence of obstruction. Pt hemodynamically stable.[JP.5M]

1005: Per Dr. Margolick, decrease noxious stimuli including ekg leads, frequent b/p checks, pulse ox to possibly help with agitation. Pt to have swallow eval by SLP. Discontinue dobhoff if pt able to swallow. Pt stable and more cooperative at this time.[JP.6M]

1250: Pt able to pass swallow eval, clear liquids ordered. Dobhoff tube d/c'd as per order. Pt tolerated well. All restraints are now d/c'd as well. Pt assisted to recliner with minimal help. So far, pt is redirectable and cooperating with staff. We will continue to monitor pt for changes in mentation and hemodynamics. Pt also able to pass medium bowel movement as w[JP.7M]ell.

1410: Pt ambulating around room, and to toilet for BMs. Pt still able to follow commands and redirectable when needed. Pt hemodynamically stable. will continue to monitor.[JP.8M]

management of pain
Outcome: Progressing

Goal: Patient and/or family will verbalize through teach back method understanding of causes of pain, effective treatment modalities: how to take pain medication, side effects, management of pain medications, and when to notify provider or nurse regarding pain
Outcome: Progressing

Problem: Alteration in cardiac output
Goal: Improve and maintain optimal cardiac output and hemodynamic stability
Description:
Outcome: Progressing

Goal: Patient/family will verbalize via teach back method the signs and symptoms to report to health care provider
Outcome: Progressing

Goal: Patient/family will verbalize via teach back method knowledge of prescribed therapeutic regimen
Outcome: Progressing

Problem: Alteration in neurosensory function
Goal: Achieves stable or improved neurological status
Outcome: Progressing

Goal: Patient/family will verbalize via teach back method knowledge of the prescribed therapeutic regimen
Outcome: Progressing

Problem: Alteration in Ventilation - Critical Care
Goal: Achieves optimal ventilation and oxygenation - Critical Care
Outcome: Progressing

Goal: Oral health is maintained or improved
Outcome: Progressing

Problem: Alteration in elimination and nutrition - Gastrointestinal function
Goal: Returns to baseline bowel function
Outcome: Progressing

Goal: Nausea and vomiting will be minimized or absent
Outcome: Progressing

Goal: Maintains adequate nutritional intake
Outcome: Progressing

Problem: Alteration in elimination: Genitourinary function
Goal: Patient will maintain adequate urinary output without evidence of retention

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 2 of 4) (continued)

Outcome: Progressing

Goal: Patient will remain free from catheter associated urinary tract infection
Outcome: Progressing

Goal: Patient/family will verbalize by teach back method understanding of actions to take to optimize genitourinary function
Outcome: Progressing

Problem: Alteration in hematologic function
Goal: Patient maintains hematologic stability
Outcome: Progressing

Goal: Patient/family verbalize via teachback method understanding of bleeding risk and actions to decrease risk
Outcome: Progressing

Problem: Alteration in mobility: Musculoskeletal function
Goal: Patient mobility will return to safest and most optimal level of function
Outcome: Progressing

Goal: Patient will maintain proper alignment and circulation of affected body part
Outcome: Progressing

Goal: Patient and/or family will verbalize via teachback method activities to ensure safety and optimum mobility
Outcome: Progressing

Problem: Alteration in coping: anxiety or other psychosocial/spirit
Goal: Patient will demonstrate effective coping strategies and ability to effectively weigh alternatives and participate in decision-making related to treatment and care
Outcome: Progressing

Goal: Patient will demonstrate the ability to refrain from verbally or physically hostile, aggressive, and/or threatening behaviors.
Outcome: Progressing

Problem: Restraints
Goal: Attempt alternatives before physical restraints are applied
Outcome: Progressing

Goal: Physical Restraints are only applied when all other measures fail and MD order
Outcome: Progressing

Goal: Will not experience any adverse outcome from restraint use
Outcome: Progressing

Goal: Patient/Care Partner(s) understand purpose and use of restraints

Editor: Deloach, Joseph P, MD (Resident)

Trauma Surgery Note:
Notified this morning that patient wanted to leave AMA. Patient likely does not have capacity to make this decision. He is unable to tell me his date of birth, the year, or explain his injuries or why he is in the hospital. His words are jumbled, unclear, and sometimes incomprehensible. He was recently on a precedex ggt and in restraints 2/2 agitation and pulling lines and foley catheter. He has made great improvement over the last 24 hours and is no longer in restraints or on a precedex drip; however, he is not medically stable for discharge from a TBI standpoint. He has been evaluated by PT/OT who have recommended acute rehab for TBI pending insurance clearance. He is accompanied by his mother who says insurance does not start until 2/1 and wants him to leave today as she believe he is capable of making that decision.

Psychiatry has been following but signed off yesterday. They were called today to evaluate for capacity but recommended hospital risk committee and ethics evaluation. The ADON has spoken to risk as of this time. I spoke with the ethics team. All have agreed that the patient cannot be on a psych hold and can leave against medical advice. The CMO has agreed with the above.

I spoke extensively with the patient and his mother and made it abundantly clear that I do NOT recommend he leave the hospital for the safety of himself and others; however, he and his mother have decided to leave. They signed AMA paperwork at 1245 (see media tab).[JD.1M]

Purushothaman, Rangarajan, MD at 1/14/2024 0549

Version 1 of 1

Author: Purushothaman, Rangarajan, MD | Service: Interventional Radiology | Author Type: Resident
Filed: 1/14/2024 10:29 AM | Date of Service: 1/14/2024 5:49 AM | Status: Attested
Editor: Purushothaman, Rangarajan, MD (Resident) | Cosigner: Kalkwarf, Kyle J, MD at 1/14/2024 12:34 PM

Attestation signed by Kalkwarf, Kyle J, MD at 1/14/2024 12:34 PM

SURGICAL CRITICAL CARE FACULTY ATTESTATION
I independently saw and examined this patient on the day of the note. I also confirmed the HPI, interval events, past medical/surgical history, physical exam, laboratory results, and diagnostic imaging. I agree with the note as written above, with the following additions, corrections, or clarifications:

NEURO
Altered mental status (GCS 13) with agitation but protecting airway. Not able to pass a dobhoff, even with high dose precedex, so he remains on that until he is less agitated
TBI on keppra, CT stable.

HEME
At risk for bleeding 2/2 TBI - SCDs, hold LMWH until 24 hours after stable TBI

NUTRITION
NPO for now because not able to swallow safely and dobhoff placement failed.

I spent 35 minutes of discontinuous critical care time with this patient on the day of the note, exclusive of procedures and educational activities, including teaching. This patient is critically ill with a chance of imminent or life-threatening deterioration that involves highly complex decision making. The patient requires frequent assessments in the intensive care unit to minimize the risk of mortality, morbidity, organ dysfunction, or organ damage.
Kyle J. Kalkwarf, MD

-[KA.1C] Remains confused. Intermittently asks for family members.[KA.1M]
-[KA.1C] Moving all extremities purposefully but did not follow command this AM.[KA.1M]
-[KA.1C] No CSF leak noted from R ear.
- In Posey vest due to agitation.[KA.1M]

A:[KA.1T] 33 year old male[KA.1M] with L temporal contusions and R temporal fractures after fall from ladder.[KA.1C]

P:[KA.1T]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

- Q1h neuro checks.
- Repeat CT at noon or STAT for changes in neurological exam.[KA.1M]
- Recommend Na goal of 145.
- CSF leak precautions: Elevate HOB>45, NO nose blowing, closed mouth sneezes, wind instruments, straws, or incentive spirometry.
- TBI protocol:
- Elevated HOB>30.
- Maintain euvolemia.
- Avoid hypo/hyperthermia, cooling measures as indicated.
- Avoid tight cervical collars and endotracheal tube ties, maintain head and neck neutral.
- Keppra 1g BID for 7 days then stop if no seizures.
- Hgb>7.
- correct coagulopathy.
- OK for chemical DVT ppx 24h after stable CTH.[KA.1C]

Open Joint:[RP.1T] no[RP.1M]
Knee Dislocation:[RP.1T] no[RP.1M]
Neuro:[RP.1T] Spontaneous eye opening, moves all 4 extremities. not oriented to time, place or person[RP.1M]
Motor: Grossly Intact
Sensation: Grossly Intact

Radiology:
X-ray chest AP portable

Result Date: 1/14/2024
Mild bibasilar atelectasis. No large pneumothorax. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Joe Jose, Dr. on 01/14/2024 at 10:06:58

CT temporal bones without contrast

Result Date: 1/14/2024
Longitudinal fracture of the right temporal bone traversing the tegmen mastoideum and anterior and posterior walls of the external auditory canal. No evidence of ossicular disruption or otic capsule involvement. Unremarkable HRCT of the left temporal bone. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:28:27

CT head without contrast

Result Date: 1/14/2024
Mild increase in left frontoparietal temporal subdural hematoma and left frontal lobe hemorrhagic contusion. Stable left tentorial subdural hematoma and scattered subarachnoid hemorrhage. Confluent hemorrhagic contusion within the left temporal lobe is mildly increased when compared to immediate prior. Stable mild mass effect and midline shift without evidence of transtentorial herniation. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:18:05

CT head without contrast

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

Result Date: 1/14/2024
Stable appearance of previously seen left tentorial and left frontoparietal temporal subdural hematomas. Stable hemorrhagic contusion within the left temporal lobe. Stable rightward midline shift. No evidence of herniation. Stable scattered left cerebral convexity subarachnoid hemorrhage. Mild cerebral edema with effacement of the perimesencephalic cisterns, similar compared to prior examination. Redemonstration of calvarial and maxillofacial fractures better described on same day dedicated maxillofacial and temporal bone imaging. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/14/2024 at 09:17:09

CT chest abdomen and pelvis with contrast

Result Date: 1/13/2024
1. Mild retrosternal mediastinal stranding/hematoma noted. 2. Airspace opacities and ground-glass opacities in the dependent portions of the bilateral lungs, may be secondary to aspiration. Cannot exclude contusions in the setting of trauma. I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented. Electronically Signed by: Joe Jose, Dr. on 01/13/2024 at 23:32:10

CT cervical spine without contrast

Result Date: 1/13/2024
No acute cervical spine fracture or traumatic malalignment. Findings were discussed with Dr. Jordan in the ED at 6:43 pm on 1/13/2024. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:44:02

CT angiogram head & neck w/3D reconstruction

Result Date: 1/13/2024
Noncontrast CT head: Multicompartmental intracranial hemorrhage with prominent hemorrhagic contusions in the left temporal lobe, small left convexity subdural hemorrhage, left tentorial subdural hemorrhage and small left convexity subarachnoid hemorrhage causing mild mass effect with midline shift of 7 mm to the right. No evidence of descending transtentorial herniation. CT angiogram head and neck: Punctate focus of active contrast extravasation in the left temporal lobe hemorrhagic contusion. No large vessel occlusion, hemodynamically significant stenosis or abrupt vessel cut off. No evidence of vascular injury. Specifically no evidence of dissection of the internal carotid arteries in the region of the sphenoid sinus roof fracture. Findings were discussed with Dr. Jordan in the ED at 6:43 pm on 1/13/2024. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:43:39

CT maxillofacial area without contrast

Result Date: 1/13/2024
Longitudinal fracture of the right temporal bone involving the tegmen mastoideum, anterior and posterior walls of the external auditory canal with hemomastoid and hemotympanum. No evidence of ossicular disruption or otic capsule involvement. Fracture of the roof of the sphenoid sinus extending to the walls of the bilateral carotid canals. Sphenoid hemosinus noted. Linear minimally displaced fracture of the left lateral cribriform plate. Mildly displaced fractures of the bilateral nasal bones and inferior portion of the nasal septum. Likely chronic fracture of the right lamina papyracea in the absence of adjacent hemosinus. Herniation of orbital fat is seen without herniation of extraocular muscle. Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:39:22

SURGICAL CRITICAL CARE FACULTY ATTESTATION
I've seen and examined this patient and have independently confirmed the HPI, interval events, past medical/surgical history, physical exam, laboratory results, and diagnostic imaging with the resident or APRN on the day of their note above. I agree with the note as written above, with the following additions, corrections, or clarifications:

NEURO
TBI - best medical management for now. Elevate HOB, minimize pressure on neck, avoid IJ central access, keppra x7d, maintain normonatremia. Patient too altered and pulling out IVs. Will hold off on 3% and attempt to replace orally. Agitated - treating with antipsychotics.

HEME
At risk for bleeding 2/2 coagulopathy/anticoagulation - start DVT ppx, head CT stable.

I spent 35 minutes of discontinuous critical care time with this patient on the day of the note above. This patient is critically ill and requires frequent assessments in the intensive care unit to minimize the risk of mortality, morbidity, organ dysfunction, or organ damage. This time is exclusive of procedures or educational activities.

Jordan Greer, MD

Name:[WG.1C] Mr. Lynn 33 y.o. male[WG.1T]
MRN:[WG.1C] 004120303[WG.1T]

Date of Service:[WG.1C] 01/15/2024[WG.1T]
ICU day#[WG.1C] 2[WG.1T]

SICU DAILY PROGRESS NOTE

SUBJECTIVE:[WG.1C]

Precedex stopped dute to concerns of bradycardia. Overnight[WG.2M] agitated requiring restraints,[WG.1C] and[WG.2M] zyprexa.[WG.1C] Sleepy when examined at bedside this morning.[WG.2M] Not cooperative during exam. Restraints and iv pulled off by patient.[WG.3M] Later, was able to walk the hall with with PT, carry out some conversation but appeared confused. Intermittent agitation requiring prn zyprexa[WG.4M]

OBJECTIVE:[WG.1C]

Temp: [36.7 °C (98 °F)-36.9 °C (98.4 °F)] 36.8 °C (98.2 °F)
Pulse: [42-109] 54
Resp: [14-26] 14

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

BP: (89-153)/(49-106) 140/73[WG.1T]

Exam:

Gen: NAD, agitated,[WG.1C] confused[WG.4M]
HEENT: right periorbital ecchymosis
CV: Regular rate, no chest wall tenderness
Pulm: Respirations unlabored, no increased WOB
Abd: S/NT/ND
Extr: MAEW, skin is warm and dry,
Neuro: NFD GCS 12
Incision: None

Imaging:[WG.1C]

Last CT head 1/14/24 2am:[WG.4M] Stable appearance of previously seen left tentorial and left frontoparietal temporal subdural hematomas. Stable hemorrhagic contusion within the left temporal lobe. Stable rightward midline shift. No evidence of herniation. Stable scattered left cerebral convexity subarachnoid hemorrhage.[WG.4C]

ASSESSMENT:[WG.1C]

33 y.o. male[WG.1T] hospital day #[WG.1C]2[WG.1T], fall from height - with left temporal lobe hemorrhagic contusions, right t bone #, sphenoid and skull base # admitted for SICU for q1 neuromonitoring.

Attestation signed by Greer, Jordan W., MD at 1/18/2024 12:58 PM

SURGICAL CRITICAL CARE FACULTY ATTESTATION
I've seen and examined this patient and have independently confirmed the HPI, interval events, past medical/surgical history, physical exam, laboratory results, and diagnostic imaging with the resident or APRN on the day of their note above. I agree with the note as written above, with the following additions, corrections, or clarifications:

NEURO
TBI - best medical management for now, surgical intervention per NSGT. Elevate HOB, minimize pressure on neck, avoid IJ central access, keppra x7d, maintain normonatremia. Salt tabs as patient is not keeping an IV in place due to agitation
Agitation - increase antipsychotics

HEME
At risk for bleeding 2/2 coagulopathy/anticoagulation - on DVT ppx, stable ct head, ROTEM prn

I spent 35 minutes of discontinuous critical care time with this patient on the day of the note above. This patient is critically ill and requires frequent assessments in the intensive care unit to minimize the risk of mortality, morbidity, organ dysfunction, or organ damage. This time is exclusive of procedures or educational activities.

Jordan Greer, MD

Name:[WG.1C] Mr. Lynn 33 y.o. male[WG.1T]

Date of Service:[WG.1C] 01/16/2024[WG.1T]
ICU day#[WG.1C] 3[WG.1T]

SICU DAILY PROGRESS NOTE

SUBJECTIVE:[WG.1C]
Patient slept well last night, no overnight zyprexa needed. Would get agitated sometimes with ECG procedure. Pulled out iv and all monitors. Switched to q1h vital monitoring overnight, and back on to continuous monitor this morning. Tolerated clear liquid diet and po medication well. Upon examination this morning, patient sleeping comfortably in bed.[WG.1M]

OBJECTIVE:[WG.1C]

Temp: [36.6 °C (97.8 °F)-37.5 °C (99.5 °F)] 37.5 °C (99.5 °F)
Pulse: [50-120] 58

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

Resp: [16-30] 19
BP: (121-152)/(57-78) 130/68[WG.1T]

Exam:

Gen: NAD, agitated, confused
HEENT: right periorbital ecchymosis
CV: Regular rate, no chest wall tenderness
Pulm: Respirations unlabored, no increased WOB
Abd: S/NT/ND
Extr: MAEW, skin is warm and dry,
Neuro: NFD GCS 12
Incision: None

Imaging:

Last CT head 1/14/24 2am: Stable appearance of previously seen left tentorial and left frontoparietal temporal subdural hematomas. Stable hemorrhagic contusion within the left temporal lobe. Stable rightward midline shift. No evidence of herniation. Stable scattered left cerebral convexity subarachnoid hemorrhage.

ASSESSMENT:[WG.1C]

33 y.o. male[WG.1T] hospital day #[WG.1C]3[WG.1T], fall from height - with left temporal lobe hemorrhagic contusions, right t bone #, sphenoid and skull base # admitted for SICU for q1 neuromonitoring.

ASSESSMENT/PLAN[SN.1T]

Mr. Lynn[SN.2T] is a[SN.1T] 33 y.o. male[SN.2T] with[SN.1T] right temporal bone and orbital/skull base fractures. Ophtho and NSGY following. Facial nerve function grossly intact, right ear wick removed. Temporal bone fracture extends to TMJ[SN.1M]

-[SN.1T] No acute ENT intervention
- Soft, no chew diet for 4-6 weeks for TMJ fracture[SN.1M]
- Recommend Ciprodex drops BID for[SN.1C] 5 days[SN.1M]
- Will require audiology follow up in 6-8[SN.1C] weeks[SN.1M]
- Elevate head of bed
- Do not blow nose or use straw. Sneeze with mouth open.
- Recommend antibiotics, Augmentin BID for 7 days would be appropriate.
- If persistent otorrhea on the right send for B2-transferrin to rule out CSF leak.[SN.1C] No otorrhea on exam today[SN.1M]
-[SN.1C] Defer orbital and skull base fractures to ophtho/nsgy[SN.1M]
- Please call with questions[SN.1C]

Patient Active Problem List

Diagnosis

- Impaired functional mobility, balance, gait, and endurance
- Cognitive impairment
- Irritability
- Traumatic brain injury (HCC)[SN.2T]

Will discuss with[SN.1T] staff[SN.1M]

Attestation signed by Margolick, Joseph F, MD at 1/21/2024 5:31 PM

I reviewed and confirmed the HPI and ROS. I examined the patient, and confirm the findings by the resident physician. I have reviewed and discussed the chart, tests, labs, diagnoses, evaluation, and treatment plan with the resident physician. I approve the plan with additions, exceptions and alterations as noted. Please call if any questions or concerns.

Euvolemic hyponatremia. Likely SIADH. Free water restriction. He is agitated and pulling out IVs. Will not allow for a urine lyte sample or hypertonic saline. Other major issue is hyperactive delirium which we are trying to manage pharcologically.

Version 1 of 1

Author: Chacko, Joseph Anthony, MD | Service: Ophthalmology | Author Type: Resident
Filed: 1/17/2024 9:26 AM | Date of Service: 1/17/2024 8:58 AM | Status: Signed
Editor: Chacko, Joseph Anthony, MD (Resident)

Ophthalmology Progress Note

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

Date of Service:[JC.1T] 1/17/2024[JC.2T]
Patient:[JC.1T] Sean Patrick Lynn[JC.2T]
MRN:[JC.1T] 004120303[JC.2T]
Attending Physician:[JC.1T] Margolick, Joseph F, MD[JC.2T]
LOS:[JC.1T] LOS: 4 days[JC.2T]

Subjective:[JC.1T]
Mr. Lynn is doing ok this morning. He states that he can't hear too well. He denies acute vision loss or eye pain. He denies diplopia. He is unable to tell me whether he normally uses glasses.[JC.1M]

Exam:
Neuro:[JC.1T] waxing and waning mental status[JC.1M], confused[JC.2M]
nearVAsc: difficult to assess due to current mental status; pt would point to multiple lines on Snellen chart in both eyes and say "58404"; at least 20/400 OU by OKN drum[JC.1M]
Pupils:[JC.1T] 2.5 --> 2[JC.1M] mm ou,[JC.1T] sluggish[JC.1M] ou, no RAPD ou
EOM: full ou
CVF: full ou
Tp:[JC.1T] 17[JC.1M],[JC.1T] 19 mmHg[JC.1M]

SLE:[JC.1T] new photo in chart[JC.1M]
Ext/L/L:[JC.1T] R periorbital ecchymosis and mild lid edema OD[JC.1M]
C/S:[JC.1T] temp subconj heme OD, no conj lac noted[JC.1M]
K: clear ou
AC: d/q ou
Iris: r/f ou
Lens: clear ou

DFE: (Patient dilated with tropicamide 1% and phenylephrine 2.5%[JC.1T] at 8:50AM 1/17/24[JC.1M], drops last 4-6 hours)
Optic disc: pink, sharp ou; c/d[JC.1T] 0.3[JC.2M] ou
Vessels: normal caliber ou
Vitreous: clear ou
Macula: flat ou
Periphery: flat[JC.1T] and attached[JC.2M] ou[JC.1T] as far as I can see, limited by cooperation[JC.2M]

CT max face w/o contrast:
'[JC.1M]IMPRESSION:
Longitudinal fracture of the right temporal bone involving the tegmen mastoideum, anterior and posterior walls of the external auditory canal with hemomastoid and hemotympanum. No evidence of ossicular disruption or otic capsule involvement.

Fracture of the roof of the sphenoid sinus extending to the walls of the bilateral carotid canals. Sphenoid hemosinus noted.

Linear minimally displaced fracture of the left lateral cribriform plate.

Mildly displaced fractures of the bilateral nasal bones and inferior

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

portion of the nasal septum.

Likely chronic fracture of the right lamina papyracea in the absence of adjacent hemosinus. Herniation of orbital fat is seen without herniation of extraocular muscle.[JC.1C],[JC.1M]
[JC.1C]

Assessment/Plan[JC.1T]

*[JC.1M] **Right medial wall fracture**
-[JC.1C] stop erythromycin ointment
- can continue ATs TID prn OU
-[JC.3M] No clinical evidence of entrapment of rectus muscles. Negative oculocardiac reflex[JC.1C].[JC.1M]
- No indication for acute surgical intervention
- CT maxillofacial as above
- Precautions to be discussed with patient when mental status improves: No nose-blowing, sneeze with mouth open, HOB elevated, no straws, no[JC.1C] horned[JC.1M]/wind instruments x 4 weeks
- Augmentin[JC.1C] x[JC.1M] 7 days for medial wall fracture[JC.1C]
- return precautions

Ophthalmology to schedule outpatient follow-up with Oculoplastics at discharge.

Please contact Ophthalmology when mental status improves to recheck visual acuity prior to discharge.[JC.1M]

Staff available.

Version 2 of 2

Author: Arensberg, Landon, MD
Filed: 1/18/2024 11:18 AM
Editor: Arensberg, Landon, MD (Resident)
Service: Surgery-Trauma
Date of Service: 1/18/2024 5:15 AM
Author Type: Resident
Status: Attested Addendum
Cosigner: Margolick, Joseph F, MD at 1/21/2024 5:30 PM

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

Attestation signed by Margolick, Joseph F, MD at 1/21/2024 5:30 PM

I reviewed and confirmed the HPI and ROS. I examined the patient, and confirm the findings by the resident physician. I have reviewed and discussed the chart, tests, labs, diagnoses, evaluation, and treatment plan with the resident physician. I approve the plan with additions, exceptions and alterations as noted. Please call if any questions or concerns.

Euvolemic hyponatremia. Likely SIADH. Free water restriction. He is agitated and pulling out IVs. Will not allow for a urine lyte sample or hypertonic saline. Other major issue is hyperactive delirium which we are trying to manage pharcologically.

Joseph Margolick MD FRCSC
Assistant Professor
Trauma/Critical Care/Acute Care Surgery
214-620-3504

Progress Note
Hospital Day:[LA.1C] 5[LA.1T]
POD:

Subjective:[LA.1C]
More agitated today per nursing staff. Nursing staff reports he has not been drinking or urinating much. Hyponatremic on labs, will work up today. 200cc on bladder scan[LA.2M]

Objective:

Vitals:[LA.1C]
Temp: [97.6 °F (36.4 °C)-99.5 °F (37.5 °C)] 98.4 °F (36.9 °C)
Pulse: [62-67] 67
Resp: [16-22] 21
BP: (122-166)/(70-100) 135/84[LA.1T]

LD	IU/L	227[BB.1T]

Assessment/Plan:[BB.1C]
33 y.o. male[BB.1T] hospital day #[BB.1C]7[BB.1T], fall from height with left temporal lobe hemorrhagic contusions, right temporal bone fracture, sphenoid and skull base fractures, SAH, SDH. Transferred to progressive 1/16.[BB.1C] Currently having issues with his motor restlessness and agitation that is interfering with care. Patient non-aggressive.[BB.1M]

Injuries
- SAH, SDH
- Nasal fractures
- Basilar skull fracture, R parietal and temporal
- R medial orbit fx
- R lamina per pre she fracture with orbital fat herniation[BB.1C]
-hyponatremia[BB.1M]

Active Problems:[BB.1T]
Principal Problem:
Traumatic brain injury (HCC)

Active Problems:
Impaired functional mobility, balance, gait, and endurance

Cognitive impairment

Irritability

Multiple closed fractures involving skull and facial bones (HCC)[BB.2T]

Plan
Neuro/pain: GCS[BB.1T] 14[BB.1M], MMPC[BB.1T], continue salt tabs, increase depakote today[BB.1M]
CV: HDS
Pulm: pulmonary toilet
FEN/GI:Diet:[BB.1T] full liquids[BB.1M] replace electrolytes as needed, bowel regimen

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

Renal: no issues
ID: no issues
Endo: no issues
Heme: BID lovenox for DVT ppx,
Activity: as tolerated, WBS:[BB.1T] full[BB.1M]
Dispo:[BB.1T] patient without funding for rehab, home when agitation and restlessness improved and Na stable[BB.1M]

I have spent >25 minutes In care of coordination of services, review of imaging and assessment and plan formulation of patient.

SURGICAL CRITICAL CARE FACULTY ATTESTATION
I've seen and examined this patient and have independently confirmed the HPI, interval events, past medical/surgical history, physical exam, laboratory results, and diagnostic imaging with the resident or APRN on the day of their note above. I agree with the note as written above, with the following additions, corrections, or clarifications:

NEURO
TBI - completed keppra ppx, hyponatremia - severe agitation and unable to obtain urine studies or treat. Patient lacks capacity and continues to try and elope. Will give zyprexa, phenobarb, and ativan PRN. Will add precedex as needed for safety of patient and staff. Placed on 72 hour hold due to lack of capacity and potential elopement with mother. Patient at high risk for seizure and further brain injury given hyponatremia. Workup for SIADH underway, could be psychogenic polydipsia. Propranol, seroquel, depakote as able, limit restraints
Altered mental status - multifactorial, wean sedation as tolerated, monitor

HEME
At risk for bleeding 2/2 coagulopathy/anticoagulation - BID LVX, monitor labs daily

I spent 55 minutes of discontinuous critical care time with this patient on the day of the note above. This patient is critically ill and requires frequent assessments in the intensive care unit to minimize the risk of mortality, morbidity, organ dysfunction, or organ damage. This time is exclusive of procedures or educational activities.

Jordan Greer, MD

Activity: as tolerated, WBS: full
Dispo:[BB.1C] Patient to transfer to ICU for monitored sedation, neuro checks, Na treatment

Spoke with mother at length about the patients pending transfer to ICU. She voiced concerns about possibility of using restraints and sedation. I explained to her that is it a matter of patient and staff safety as we are unable to provide the level of care he requires on F4.[BB.1M]

I have spent >[BB.1C]50[BB.1M] minutes In care of coordination of services, review of imaging and assessment and plan formulation of patient.

SURGICAL CRITICAL CARE ATTENDING ATTESTATION

I've seen and examined this patient on 1/22/24 and have independently confirmed the HPI, interval events, past medical/surgical history, physical exam, laboratory results, and diagnostic imaging with Dr. Rezayev and I agree with their note as written above, with the following additions, corrections, or clarifications.

ICU diagnoses/plan:

Altered mental status - multifactorial, wean sedation as tolerated, monitor

Hyponatremia - correct and monitor

At high risk for hemodynamic instability - continue monitoring in ICU

Postoperative observation - continue in ICU for at least another day

This patient is critically ill and requires frequent assessments in the intensive care unit under my direct care as an attending intensivist to minimize the risk of mortality, morbidity, organ dysfunction, and/or organ damage. I personally spent > 35 minutes of discontinuous critical care time with this patient on the date noted above. This time is exclusive of procedures or educational activities.

Benjamin Davis, MD
Trauma, Critical Care, and Acute Care Surgery

Name:[AR.1C] Mr. Lynn 33 y.o. male[AR.1T]
MRN:[AR.1C] 004120303[AR.1T]

Date of Service:[AR.1C] 01/22/2024[AR.1T]
ICU day#[AR.1C] 9[AR.1T]

SICU DAILY PROGRESS NOTE

SUBJECTIVE:[AR.1C]
Became agitated, pulled out foley catheter traumatically, consulted urology, received sedation and 20 french foley catheter, consulted neuropsychology, holding seroquel due to SIADH, increased 3% to 45, maintaining precedex 1.5[AR.2M]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

OBJECTIVE:[AR.1C]

Temp: [96 °F (35.6 °C)-98.4 °F (36.9 °C)] 97.5 °F (36.4 °C)
Pulse: [49-66] 53
Resp: [13-19] 13
BP: (103-137)/(60-89) 127/77[AR.1T]

Exam:

Gen: NAD, confused
HEENT: right periorbital ecchymosis
CV: Regular rate, no chest wall tenderness
Pulm: Respirations unlabored, no increased WOB
Abd: S/NT/ND
Extr: MAEW, skin is warm and dry,
Neuro:
- GCS 14 E4V4M6
- Intermittently follows commands
- Responds to some questions
- Does not answer orientation questions
- Spontaneously antigravity in all four extremities, does not participate in segmental examination

Imaging:

Last CT head 1/14/24 2am: Stable appearance of previously seen left tentorial and left frontoparietal temporal subdural hematomas. Stable hemorrhagic contusion within the left temporal lobe. Stable rightward midline shift. No evidence of herniation. Stable scattered left cerebral convexity subarachnoid hemorrhage.

ASSESSMENT:[AR.1C]

33 y.o. male[AR.1T] hospital day #[AR.1C]9[AR.1T], fall from height - with left temporal lobe hemorrhagic contusions, right t bone #, sphenoid and skull base # admitted to SICU for close monitoring

Attestation signed by Lopes Cancado Machado, Bruno, MD at 1/23/2024 7:44 AM

I saw the patient and have reviewed the notes, assessments and/or procedures performed by APRN Hankins. I concur with her documentation of the patient

Urology Progress Note

A/P: Mr. Lynn is a[SH.1T] 33 y.o. otherwise healthy male with a fall from height 1/13/24 (~35 feet while cleaning out gutters) with left temporal lobe hemorrhagic contusions, right temporal bone fracture, sphenoid and skull base fractures, SAH, SDH, and SIADH. He has shown increasing agitation and has been non-cooperative[SH.1C] r/t impaired cognition[SH.1M].[SH.1C]

Traumatic foley removal
-2nd event in 24hr period.
-passing occasional clots, urine amber this AM, no active bleeding from meatus
-Irrigate foley PRN
-Keep foley for 72 hrs.
-Due to impaired cognition, strength, and ability to get out of restraints he might benefit from 1:1 or a sitter/family at bedside to help redirect and prevent additional harm to self from removal of invasive lines.[SH.1M]
-Urology available for questions or concerns,[SH.1C]

Mr. Lynn was seen and staffed by Dr[SH.1T] Machado[SH.1M] who performed the substantive portion of the MDM.

S:[SH.1T] Nurse at bedside reports continued agitation and confusion, he remains sedated. Currently in 4 point restraints with mittens. Overnight he was able to free himself from restraints and pulled out IV x2 and foley catheter (2nd event). He later broke the Posey vest restraint. Foley catheter was replaced 20F without difficulty, nurse put shorts on pt to help deter additional attempts at self foley removal.[SH.1M]

Attestation signed by Fullen, Chrystal T, PsyD at 1/24/2024 4:01 PM

I was in the area at the time of this appointment and readily available for supervision, as needed. I agree with the content of this note including relevant findings and the plan of care as documented.

Trauma neuropsychology follow-up visit 1015am-1045am.
HPI per 1/13/24 H&P indicated patient fall from ladder, +LOC, GCS 12-13.
Imaging on 1/[TB.1C]14 (1/13 comparison):
"[TB.1M]*IMPRESSION:*
Stable appearance of previously seen left tentorial and left frontoparietal temporal subdural hematomas. Stable hemorrhagic contusion within the left temporal lobe. Stable rightward midline shift. No evidence of herniation. Stable scattered left cerebral convexity subarachnoid hemorrhage.

Mild cerebral edema with effacement of the perimesencephalic cisterns, similar compared to prior examination.[TB.1C]"

Patient was asleep/somnolent at time of visit. Patient mother was in the room and requested that examiner permit patient to sleep. Patient's mother expressed understanding of language based deficits, and indicated observing language deficits, and the relation to brain regions impacted by patient's TBI. Additional psychoeducation regarding cognitive status variability and frontally related deficits also provided. Resource and contact information for mental health and TBI resouces provided.

Patient's mother expressed concerns regarding several aspects of patient's care / wellness. Issues discussed and addressed:

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

She indicated concern for psychological trauma associated with use of restraints, adding that he has a trauma history which would likely be exacerbated by restraints and wanting to know why trauma psychology has not yet met with the patient. Writer expressed understanding of family concerns, and indicated that limiting restraint as much as safely allowed, and ultimate removal of restraints, a goal of the treatment team. Gathered information from patient's mother for used in behavior management recommendations (Recommendations listed below). Writer indicated reason for trauma psychology not having seen patient yet likely related to patient's current stage of recovery, but would follow up with trauma psychology to confirm. (Writer spoke with trauma psychology after the visit; trauma related counseling confirmed to be premature due to acuity, will communicate this to family).

Patient's mother expressed concerns around medical care, discharge, and definition of "medically stable" . Writer indicated limitations in their role and need to defer to medical treatment team members in this respect. She also expressed concerns regarding billing/financial costs for the medical care, and transparency regarding treatment decision. Writer indicated they would ensure case management was informed of their desire to discuss their financial concerns. (Records from today, after visit, indicate CM engaging with family). Questions regarding psychiatric referral / medications were presented. Writer differentiated role from psychiatry and indicated they would look into whether psychiatric referral was made. (Records indicate consult for psychiatry has been ordered).

Patient's mother indicated concern that son's mental status was not as impaired as perceived by providers. Examiner explored patient's mothers concerns, acknowledging complexity of situation and added that cognitive status can fluctuate with brain injury and/or other medical conditions (I.e., h[TB.1M]yponatremia[TB.1C]). Writer to continue following patient's case and assess cognitive functioning on next available day and to the extent presentation permits.

Plan: Trauma neuropsychology to continue to follow. Will assess and monitor cognitive status / PTA and provide recommendations to facilitate cognitive functioning. Will work in collaboration and/or facilitate psychiatry consult service as able. Will inform patient that intensivist will likely be best source of information regarding criteria for "medically stable."

Regarding agitation management: patient was asleep during visit and thus indications of agitation could not be assessed. Recommendations below are based on information obtained by patient's mother versus direct interaction with patient.[TB.1M]

When he becomes frustrated or stressed, consider the following:[TB.1T]

1[TB.1M]. Ask for permission before engaging in hands-on care to improve buy-in.[TB.1T]
2. Note that language deficits are likely and patient may struggle with both expressive and receptive language as a result
3. Explain rationale for care, including reinforcing plan of discharging once medically stable. (per patient's mother, patient motivation to leave AMA may be related to distrust of medical system and concerns of financial burden).
4.[TB.1M] Use redirection. Encourage the patient to attend to other sensory information/discuss interests.[TB.1T] (per patient's mother, patient is very involved in playing cards, and is co-author of book she has in the room. Cards are also present in the room)

5[TB.1M]. Do take breaks (max 5 minutes), particularly when frustration and irritability begin to increase.[TB.1T]

6[TB.1M]. Tailoring use of restraints to her/him in-the-moment presentation. As a reminder, we want to use the least restrictive restraints in order to keep her/him and others safe.[TB.1T]

McBain, Sacha A, PhD at 1/24/2024 1348

Version 1 of 1

Author: McBain, Sacha A, PhD | Service: Psychiatry | Author Type: Psychologist
Filed: 1/24/2024 4:31 PM | Date of Service: 1/24/2024 1:48 PM | Status: Signed
Editor: McBain, Sacha A, PhD (Psychologist)

Time In: 13:38
Time Out: 14:20

Met with Ms. Laura Lynn, Mr. Lynn's mother at bedside after reports from Dr. Baer (see Timothy Baer, 1/24/24) regarding her concerns that trauma psychology had not yet been involved in Mr. Lynn's care. Upon entering the room, Ms. Lynn was observed to be attempting to provide Mr. Lynn with rationale regarding his restraints and current hospitalization. Briefly engaged Mr. Lynn who repeatedly requested restraints and NG tube be removed. He was noted to doze off during this interaction with unclear level of comprehension. Requested that visit with Ms. Lynn continue outside of the room to prioritize Mr. Lynn's rest and minimize stimulation. Ms. Lynn expressed concerns regarding restraints and Mr. Lynn's desire to have catheter removed. Discussed rationale for restraints to promote Mr. Lynn's safety given current confusion and agitation. She expressed desire to be able to effectively communicate this rationale with Mr. Lynn and to understand expectations regarding when restraints can be expected to be removed (e.g., what improvements need to occur in order for this to happen). Discussed concerns regarding NG tube and tube feeds, specifically Ms. Lynn's concerns regarding the nutritional content of the tube feeds and Mr. Lynn's statements that he is "starving." Provide strategies to support adjustment to injury and hospitalization including provide rationale, reassurance, and comfort when Mr. Lynn becomes restless/agitated or confused with any aspect of his care. Reinforced Ms. Lynn's ability to provide these things to Mr. Lynn. Advised her that psychology and psychiatry will continue to be involved in his care. Discussed impressions and recommendations with SICU team.

Recommendations
- Continue to reinforce Ms. Lynn's efforts to support Mr. Lynn through providing rationale (e.g., this tube is to feed you; it isn't safe to take the restraints off right now), reassurance (e.g., I'm here with you), and redirection.
- Continue to focus on education and expectations with Ms. Lynn regarding Mr. Lynn's current medical and cognitive status and milestones of recovery (e.g., decision making regarding restraints).
- Discussed cognitive assessment with Neuropsychology when deemed appropriate.
- Discussed agitation management with Psychiatry CL team; Psychology will continue to be available to support behavioral management and coordination with family.[SM.1M]

NA	131	01/25/2024[AR.1T]

Left temporal hemorrhagic contusions, SAH, SDH with associated mass effect L hemisphere
- GCS: 14 E4V4M6
-Sedation/Pain: Tylenol 975mg oral q6 prn, diazepam 5 mg q8h, trazodone 100 mg nightly prn, haloperidol 5 mg q4h prn
- on keppra 1g BID for 7 days (1/13/24-1/20/24)
- Depakote 500 mg q8h for headache[AR.1C] held[AR.4M]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

- Precedex drip at 1.5
- propranolol 10mg q6h started 1/15/24[AR.1C]

Appreciate psychiatry recommendations:[AR.1M]

- Consider increasing propranolol to 30mg q6H FT
- Consider restarting Depakote 500mg IV q8H
- If concern for hyponatremia with Depakote, could consider using Haldol 2.5mg IV BID instead
- Haldol 10mg or Olanzapine 10mg IV q6h PRN for agitation
- Avoid deliriogenic medications (phenobarbitol, Valium, Ativan) that can worsen confusion and cause paradoxical agitation[AR.1C]

- Restarted Depakote 1/25
- Valium discontinued
- Phenobarbital discontinued
- Ativan discontinued
- Minimizing irritants including ekg leads, q4h vitals
- No foley replaced[AR.3M]

Cardiovascular/Heme:[AR.1C]

Author: Hankins, Shannon, APRN, CNP | Service: Urology | Author Type: Advanced Practice Registered Nurse
Filed: 1/25/2024 6:58 AM | Date of Service: 1/25/2024 6:50 AM | Status: Attested
Editor: Hankins, Shannon, APRN, CNP (Advanced Practice Registered Nurse) | Cosigner: Lopes Cancado Machado, Bruno, MD at 1/25/2024 11:05 AM

Attestation signed by Lopes Cancado Machado, Bruno, MD at 1/25/2024 11:05 AM

I saw the patient and have reviewed the notes, assessments and/or procedures performed by APRN Hankins. I concur with her documentation of the patient.

Urology Progress Note

A/P: Mr. Lynn is a 33 y.o.[SH.1T] otherwise healthy male with a fall from height 1/13/24 (~35 feet while cleaning out gutters) with left temporal lobe hemorrhagic contusions, right temporal bone fracture, sphenoid and skull base fractures, SAH, SDH, and SIADH. He has shown increasing agitation and has been non-cooperative r/t impaired cognition.

Traumatic foley removal
-[SH.1C]3rd event overnight, with one additional event of displacement into the prostatic urethra yesterday.
-Recommend leave foley out for now, if he is able to void on his own then would not replace. Given the frequency of his traumatic removal may be best to CIC vs replacing foley again. Will monitor his status today.[SH.1M]
-Urology available for questions or concerns,
[SH.1C]

Mr. Lynn was seen and staffed by Dr[SH.1T] Machado[SH.1M] who performed the substantive portion of the MDM.

S:[SH.1T] awake pulling against restraints this AM. Per nurse pulled foley partially out yesterday evening but then completely removed overnight. No foley in place at this time. He continues to pull at lines despite sedation and restraints[SH.1M]

Diagnostic Studies:
I have reviewed studies and pertinent findings noted below:[KW.1T]

none[KW.1M]

Mental Status Exam:
Appearance: 33 y.o. CM wearing hospital gown with fair attention to grooming and hygiene, bruising on R eye, sleeping[KW.1C], not waking for interview[KW.1M]

Assessment

Assessment:[KW.1T] Sean Patrick Lynn[KW.2T] is a[KW.1T] 33 y.o. male[KW.2T] with[KW.1T] no known psychiatric history who is admitted to the SICU for agitation management s/p traumatic fall with left temporal lobe hemorrhagic contusions, right t bone fracture, sphenoid and skull base fracture. Patient was de-escalated to the floor but required readmission to SICU on 1/21 d/t sustained agitation, attempted elopements, pulling out lines. Multiple medications have been utilized (Valium, Ativan, propranolol, Haldol, Zyprexa, Depakote, phenobarbital, Seroquel) to attempt to control agitation d/t delirium with little success at this point outside of Precedex and physical restraints. Patient continues to require ICU-level care for Precedex. Depakote and Seroquel were held d/t concern for medication-induced SIADH.[KW.1C] Wo[KW.1M]uld recommend restarting Depakote as a means to control agitation after TBI[KW.1C] with monitoring Na levels. Ongoing delirium likely multifactorial: TBI, use of deliriogenic meds, possible infection with WBC 18k, likely outside of window for substance w/d[KW.1M]. Further med recs below. Would avoid deliriogenic medications, as they can achieve sedation but worsen downstream delirium and agitation. Psychiatry will continue to follow along.[KW.1C]

Diagnoses (In DSM-5 Format)[KW.1T]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

Delirium
TBI[KW.1C]

Recommendations

Recommendations:[KW.1T]

- Con[KW.1C]t[KW.1M] propranolol to[KW.1C] 2[KW.1M]0mg q6H FT
- Con[KW.1C]t[KW.1M] Depakote 500mg IV q8H
- Olanzapine[KW.1C] 5[KW.1M]mg IV q6h PRN for agitatio[KW.1C]n[KW.1M]
- Avoid deliriogenic medications (phenobarbitol, Valium, Ativan) that can worsen confusion and cause paradoxical agitation[KW.1C]

We appreciate this consult. Psychiatry will[KW.1T] continue to follow. Please call with any questions.
Patient seen and staffed with Dr. Tripathi.[KW.1M]

Clinical Notes (group 3 of 4) (continued)

Attestation signed by Margolick, Joseph F, MD at 1/27/2024 1:18 PM

I reviewed and confirmed the HPI and ROS. I examined the patient, and confirm the findings by the resident physician. I have reviewed and discussed the chart, tests, labs, diagnoses, evaluation, and treatment plan with the resident physician. I approve the plan with additions, exceptions and alterations as noted. Please call if any questions or concerns.

Much more awake today. Cooperative. Walking the hallway. Still confused and not oriented to place and time. Mixing up words. Phrases and sentences do not make sense. He does not have capacity for medical decision making at this time.

Minimizing tubes and drains (ie., foley and unused IVs). SIADH treated with free water restriction. No longer needs hypertonic saline.

- Responds to some questions
- Does not answer orientation questions
- Spontaneously antigravity in all four extremities, does not participate in segmental examination

Imaging:

Last CT head 1/14/24 2am: Stable appearance of previously seen left tentorial and left frontoparietal temporal subdural hematomas. Stable hemorrhagic contusion within the left temporal lobe. Stable rightward midline shift. No evidence of herniation. Stable scattered left cerebral convexity subarachnoid hemorrhage.

ASSESSMENT:[CS.1C]

33 y.o. male[CS.2T] hospital day #[CS.1C]13[CS.2T], fall from height - with left temporal lobe hemorrhagic contusions, right t bone #, sphenoid and skull base # admitted to SICU for close monitoring

PLAN:
Neuro/Pain:[CS.1C]
Lab Results

Component	Value	Date
NA	128	01/25/2024[CS.2T]

Left temporal hemorrhagic contusions, SAH, SDH with associated mass effect L hemisphere
- GCS: 14 E4V4M6[CS.1C], **confused but redirectable**[CS.6M]
-Sedation/Pain: Tylenol 975mg oral q6 prn, trazodone 100 mg nightly prn, **haloperidol 5 mg q4h prn**
- on keppra 1g BID for 7 days (1/13/24-1/20/24)
- **Depakote 500 mg q8h** for headache held
- **Precedex drip at 1.5**[CS.1C] **turned off**[CS.3M]
- propranolol 10mg q6h started 1/15/24

Appreciate psychiatry recommendations:
- Cont propranolol to 20mg q6H FT
- Cont Depakote 500mg IV q8H
- Olanzapine 5mg IV q6h PRN for agitation[CS.1C] (holding for now)[CS.3M]
- Avoid deliriogenic medications (phenobarbitol, Valium, Ativan) that can worsen confusion and cause paradoxical

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

agitation

- Restarted Depakote 1/25
- Valium discontinued
- Phenobarbital discontinued
- Ativan discontinued
- Minimizing irritants including ekg leads, q4h vitals
- No foley replaced

Winn, Kesley M, MD at 1/26/2024 0741

Version 1 of 1

Author: Winn, Kesley M, MD
Filed: 1/26/2024 2:44 PM
Editor: Winn, Kesley M, MD (Resident)
Service: Psychiatry
Date of Service: 1/26/2024 7:41 AM
Author Type: Resident
Status: Attested
Cosigner: Tripathi, Samidha, MD at 1/26/2024 3:54 PM

Attestation signed by Tripathi, Samidha, MD at 1/26/2024 3:54 PM

I have seen and evaluated the patient with Dr. Winn and I agree with the resident's documentation, assessment, and plan.

Delirium due to general medical condition
No agitation per RN, stable overnight. Labs _ leucocytosis and hyponatremia. On VPA x 1 day.
If behavioral control remains stable, decrease VPA to 500 mg once on Sat then stop.
Would recommend minimizing typical antipsychotic use, use SGA like olanzzapine sparingly, utilize non-pharmacological measures to manage agitation (as mentioned in Dr. McBain's note), treatment potential causes of encephalopathy like metabolic and infectious process. May continue propranolol 20 mg TID for now but this too can be discontinued as the acute agitation resolves.

Psychiatry will sgn off. Please page with qs or concerns.

Samidha Tripathi, M.D.
Associate Professor
Department of Psychiatry

Psychiatry Follow-Up Note

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

Patient Name:[KW.1C] Sean Patrick Lynn[KW.2T]
MRN:[KW.1C] 004120303[KW.2T]
Date:[KW.1C] 01/26/2024[KW.2T]
Location:[KW.1C] H4 - TSICU/CVICU[KW.2T]
Hospital Day:[KW.1C] 13[KW.2T]

Subjective

Interval Hx[KW.1C]
Started Depakote.[KW.1M] Precedex stopped. Patient agitation seems to have improved[KW.3M], though pulled out 3xPIVs overnight[KW.4M].[KW.3M]

Patient[KW.1C] sitting up in chair today talking to nurse sitting in room. Patient alert but somewhat disoriented. He seemed to be able to understand most lines of questioning but had difficulty with hearing interviewer. As for speech production, he would provide irrelevant responses to some questioning. When asked where he lives, he responded "6 houses people pay me for." Likely a reference to owning 6 rent houses. Later referred to these as "6 caves" and "6 toys." Unable to[KW.3M] state exactly why he's in the hospital, stating "eclipse." Asked to discharge today and was understanding when told he requires further care.[KW.4M]

ROS: UTA

Assessment

Assessment:[KW.1C] Sean Patrick Lynn[KW.2T] is a[KW.1C] 33 y.o. male[KW.2T] with no known psychiatric history who is admitted to the SICU for agitation management s/p traumatic fall with left temporal lobe hemorrhagic contusions, right t bone fracture, sphenoid and skull base fracture. Patient was de-escalated to the floor but required readmission to SICU on 1/21 d/t sustained agitation, attempted elopements, pulling out lines. Multiple medications have been utilized (Valium, Ativan, propranolol, Haldol, Zyprexa, Depakote, phenobarbital, Seroquel) to attempt to control agitation d/t delirium with little success at this point outside of Precedex and physical restraints. Depakote and Seroquel were held d/t concern for medication-induced SIADH. Ongoing delirium likely multifactorial: TBI, use of deliriogenic meds, possible infection with WBC[KW.1C] 29[KW.4M]k, likely outside of window for substance w/d.[KW.1C] Patient agitation

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Clinical Notes (group 3 of 4) (continued)

improving at this time with cognitive deficits still in place - delirium vs. aphasia vs. other. Recommend continuing Depakote at this time and weaning off starting tomorrow if patient agitation remains under control.[KW.4M]

Diagnoses (In DSM-5 Format)
Delirium
TBI

Recommendations

Recommendations:

- Cont propranolol to 20mg q6H FT
- Cont Depakote 500mg IV q8H[KW.1C], recommend to start weaning off tomorrow with agitation improving[KW.4M]
- Olanzapine 5mg IV q6h PRN for agitation
- Avoid deliriogenic medications (phenobarbitol, Valium, Ativan) that can worsen confusion and cause paradoxical agitation

We appreciate this consult. Psychiatry will[KW.1C] sign off at this time. Please re-consult with further questions.[KW.4M]

Attestation signed by Davis, Benjamin L, MD at 1/27/2024 6:13 PM

ATTENDING SURGEON ATTESTATION

I saw and examined this patient on 1/27/24 and confirm the findings in the note above. I have reviewed and discussed the chart, tests, labs, diagnoses, evaluation, and treatment plan with the resident/APNs. This patient has a constellation of comorbidities and acute problems that constitute significant & severe risk to life and/or limb. The highest complexity of care (exclusive of critical care) is required to avoid loss of life and/or limb. I approve the plan with additions, exceptions and alterations as noted:

See my other note for further details.

Benjamin Davis, MD
Trauma, Surgical Critical Care, and Acute Care Surgery

Assessment/Plan:
Principal Problem:
Traumatic brain injury (HCC)
Active Problems:
Impaired functional mobility, balance, gait, and endurance
Cognitive impairment
Irritability
Multiple closed fractures involving skull and facial bones (HCC)
Neurobehavioral sequelae of traumatic brain injury (HCC)
Delirium due to general medical condition

LOS: 14 days[EB.1T]
Daily: continued BID Chem10, continue salt tabs[EB.1M]

Neuro/pain GCS 15, MMPC
Resp[EB.1T] on room air[EB.1M]
CV:[EB.1T] Hgb stable[EB.1M]

Editor: Davis, Benjamin L, MD (Physician)

On morning rounds Mr. Lynn appeared physically robust but asked the same question (when can I go home?) repeatedly, despite repeated exhortations that he needs eunatremia and TBI rehab. He was told by his nurse and at least THREE physicians today, on multiple occasions that going home isn't safe. As was his mother, as this was in her presence every single time. She stated her intention to leave with him. We attempted to place a 72 hour hold but then learned he'd already had one this admission, and a second one isn't possible. We asked psych to weigh in but ultimately, it is clear that the patient himself does not have capacity, but determination about his mother's decision making capabilty was outside their realm of expertise since she is not a patient. They recommended risk and ethics (see separate notes, particularly the very thoughtful note by Dr. Micah Hester). I also discussed the case with CMO of the day (and via CMO, hospital council). All of the above concurred that Arkansas has no statute and UAMS has no policy dictating the terms under which a patient may be placed on medical hold. It was made clear to me the police would be no help without a 72 hour psych hold, which, as stated above, was impossible.

Short of medically or physically restraining the patient, which would put both the patient and staff at further risk above and beyond the risk of him leaving, I instructed the residents and RNs to let them go without interference. They were told multiple times and in no uncertain terms that this is a very bad idea and that if they insisted on leaving UAMS, they should go directly to another healthcare facility.[BD.1M]

SICU Update

Patient attempted to elope, was redirected by mother and hospital staff and guided back to hospital room. Administered zyprexa, phenobarbital, and ativan.[AR.1M] 4 mg ativan ordered to have available at bedside, only 2 mg administered. Additional phenobarbital ordered to have at bedside if needed.[AR.2M] Patient resting comfortably in room with eyes closed. Starting 3% hypertonic saline infusion and obtaining chemistries for workup of hyponatremia. Will avoid restraints at this time to prevent worsening of agitation.[AR.1M]

Speech-Language Pathology
Progress Note

Pt seen in[EG.1T] hospital room/bedside[EG.1M] for[EG.1T] swallowing[EG.1M] procedure. The Speech-Language Pathologist wore the following PPE:[EG.1T] gloves and surgical mask[EG.1M].[EG.1T] Although, SLP did have to remove her mask for pt to attempt lip reading.[EG.1M] At the time of this procedure, the patient's COVID-19 status was[EG.1T] not tested[EG.1M].

Patient Name: Sean Patrick Lynn
DOB: 6/24/1990
MRN: 004120303

Date of service: 1/17/2024
SLP Treatment Start Time: 0925
SLP Treatment Stop Time: 0935
Intervention provided:[EG.1T] Dysphagia Therapy[EG.1M]

Subjective:

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Allied Health Progress Notes (continued)

Current Visit Pain:[EG.1T] 0/10[EG.1M]
Session #:[EG.1T] 2[EG.1M]
Patients goal of session:[EG.1T] did not state goals[EG.1M]
Patient c/o:[EG.1T] did not state complaints

Pt received asleep in bed, ophthalmology recently dilated eyes. Pt roused to touch. Pt repeatedly reported that he could not hear. Temporal bone fx noted per ENT with plans for audiology exam in 6-8 weeks. Swallow session was limited; pt was not appropriate for a language evaluation 2/2 limited participation with SLP. When SLP would ask orientation questions or bio info questions, pt would respond with empty responses like "It doesn't matter" or "I'll figure it out later."[EG.1M]

Objective:

Encounter Problems

- Encounter Problems (Active)
  - SWALLOWING
    Dates: Start: 01/15/24
    - LTG-Safe swallow function
      Dates: Start: 01/15/24 Expected End: 01/29/24
      Description: LTG-Patient will establish safe swallow function for management of own secretions/po trials with 100% accuracy[EG.1T]
      1/17/24: unchanged[EG.1M]
    - STG-Tolerate P.O. therapeutic trials
      Dates: Start: 01/15/24 Expected End: 01/29/24
      Description: STG-Patient will tolerate P.O. therapeutic trials without s/s aspiration with 90% accuracy[EG.1T]
      1/17/24: Pt deferred nearly everything on his tray but was agreeable to consuming applesauce for ongoing swallow eval. SLP placed spoon in applesauce. Pt utilized spoon x1 without issue but then removed spook and drank applesauce from container until fully consumed. No s/s of aspiration. Pt did not want to drink any liquids.[EG.1M]

Assessment:[EG.1T]

Unchanged swallowing function. Improved agitation/restlessness. Language and cognition is likely unchanged, although I think language deficits are more apparent now that pt is lest restless.[EG.1M]
Barriers to learning/progress:[EG.1T] Cognitive-linguistic and hearing impairments[EG.1M]

Plan:[EG.1T]

Continue per plan of care[EG.1M]

Recommendations:[EG.1T]

Continue full liquid diet; per ENT, no chew diet is recommended. Pt technically can upgrade to puree, however, SLP was unable to fully educate him on his options today due to language comprehension and hearing impairments. It is likely pt will not enjoy a pureed tray, and therefore consume less PO intake.
Swallowing strategies:
-Sit fully upright
-Oral hygiene before meals
-Small sips via cup edge- no straws

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Allied Health Progress Notes (continued)

-Small bites

Language evaluation as able
Speak to pt on pt's left side as temporal bone fx was on right. Hopefully hearing will be better on this side.

Discharge[EG.1M] **Recommendations:**[EG.1T]
Inpatient acute rehab[EG.1M]

Thank you for allowing Speech Pathology Services to participate in the care of your patient. If you have questions or concerns, please call vocera by name.

Activity Tolerance[AB.1T]
Fair[AB.1M]

Key	Endurance Scale
Good	Tolerates normal activity using mod. to max. resistive activity and position changes with no sign of fatigue, palpitation, dyspnea or pain. Standing tolerance 30+ mins.
Good -	Tolerates normal activity using mod. resistive activity and position change with only occasional or minimal fatigue, no palpitation, dyspnea or pain increase. Standing tolerance 10 mins.
Fair +	Tolerates light resistive to mod. resistive activity and position change with infrequent rest periods (20-30 mins. work period) and minimal fatigue noted: longer time or more resistance causes fatigue, palpitation, dyspnea or pain. Standing tolerance 10 minutes.
Fair	Tolerates light resistive activity for short to mod. length of time (10-15 mins.); needs occasional rest periods; longer time or more resistance causes fatigue, palpitation, dyspnea, or pain. Standing tolerance 10 minutes.
Fair -	Comfortable at rest; tolerates light non-resistive activity for short durations (5-10 mins.); needs frequent rest periods; longer time or addition of resistance increases fatigue, palpitation, dyspnea or pain. Standing tolerance 5 minutes.
Poor +	Comfortable at rest; tolerates non-resistive activity for short durations (2-4 mins.); needs frequent rest periods; longer time or addition of resistance increases fatigue, dyspnea, or pain. Standing tolerance is 2-4 minutes.
Poor	Comfortable at rest; light non-resistive activity of brief duration causes fatigue, palpitations, dyspnea, or pain. Standing tolerance of 1-2 minutes only.
Poor -	Symptoms may be present at rest; if any physical activity is undertaken distress is increased. Standing tolerance is less than 1 minute.

Coordination
Gross Motor Coordination:[AB.1T] right upper and left upper intact[AB.1M]
Fine Motor Coordination:[AB.1T] right upper and left upper intact[AB.1M]

AM- PAC
AMPAC Daily Activity Raw Score (of 24): 18 points, AMPAC Percentage of Limitation : 46.65%

At the end of the session,[AB.1T] patient was left in bed with call light within reach, Sitter at bedside[AB.1M].

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Allied Health Progress Notes (continued)

During this session, the[AB.1T] therapist[AB.1M] wore the following PPE:[AB.1T] gloves and surgical mask[AB.1M]. The[AB.1T] patient did not[AB.1M] wear a surgical mask during session.

Clinical Impression

Problem List:[AB.1T] decreased ADLs, decreased functional transfers, decreased balance for standing level self care, decreased safety awareness, decreased activity tolerance and decreased mobility[AB.1M]
Patient Response to Treatment:[AB.1T] Tolerated well without adverse reactions and Cooperative and motivated[AB.1M]
Summary Assessment:[AB.1T] Patient demonstrating dec independence with self-care and mobility due to above deficits. Pt would benefit from continued OT services through LOS and Acute Rehab at discharge.[AB.1M]
Rehab Potential:[AB.1T] Excellent (75-100%)[AB.1M]
Patient Instructions:[AB.1T] OT POC, discharge planning, transfer education[AB.1M]
Supplies/Equipment Issued:[AB.1T] N/A[AB.1M]

Goals

Encounter Problems

Encounter Problems (Active)

OT Long Term Goals
Dates: Start: 01/17/24

LTG-ADL MET
Dates: Start: 01/17/24 Expected End: 01/31/24
Description: LTG-Patient will perform ADL MET at level 2 - Sitting: self-bathing, shaving, grooming, dressing; unlimited sitting; ambulation at a slow pace in room as tolerated.

LTG-Dynamic standing balance
Dates: Start: 01/17/24 Expected End: 01/31/24
Description: LTG-Patient will increase dynamic standing balance to supervision with LRD.

LTG -HEP
Dates: Start: 01/17/24 Expected End: 01/31/24
Description: Patient/Caregiver to perform HEP with independence

OT Misc Goal
Dates: Start: 01/17/24 Expected End: 01/31/24
Description: Patient will be oriented x 4 without cue.

LTG-Follow instructions
Dates: Start: 01/17/24 Expected End: 01/31/24
Description: LTG-Patient will be able to follow multi-step instructions 100% of the time without cue.

Encounter Problems (Resolved)
There are no resolved problems.

Plan

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Allied Health Progress Notes (continued)

Treatment Plan established with Patient/Caregiver:[AB.1T] Yes[AB.1M]
OT Interventions:[AB.1T] ADL Training, IADL Training, Adaptive Equipment Training, Compensatory Strategy, Energy Conservation, Functional Mobility/Transfers, Patient/Family Education, Positioning, Strengthening and Home Exercise Program[AB.1M]
Therapy Frequency:[AB.1T] 3-5 times per week[AB.1M]
Therapy Predicted Duration:[AB.1T] 2 weeks, then reassess if needed[AB.1M]

Speech Language/Pathology[EG.1T]

SLP attempted swallow tx and cog/lang eval this AM. Pt was quite agitated and not redirectable per staffing report prior to SLP. RN reports pt just received zyprexa. PCT reported that pt consumed all of breakfast tray without s/s of aspiration. SLP updated flowsheet to reflect oral intake. Due to recently consuming all of breakfast and receiving IM xyprexa. SLP will hold both tx and eval for the AM and re-attempt later as schedule permits.[EG.1M]

Thank you for allowing Speech Pathology Services to participate in the care of your patient. If you have questions or concerns, please call vocera by name.[EG.1T]

Speech-Language Pathology[EG.1T] Language[EG.1M] Evaluation

Pt seen in[EG.1T] hospital room/bedside[EG.1M] for[EG.1T] speech/language/cognitive[EG.1M] procedure. The Speech-Language Pathologist wore the following PPE:[EG.1T] gloves and surgical mask[EG.1M]. At the time of this procedure, the patient's COVID-19 status was[EG.1T] not tested[EG.1M].

Patient Name: Sean Patrick Lynn
MRN: 004120303
Date of Evaluation: 1/18/2024

SLP Eval Start Time: 1335
SLP Eval Stop Time: 1345[EG.1T]

Per Dr. Arensberg 1/18/24: "[EG.1M]*33 y.o. male hospital day #5, fall from height with left temporal lobe hemorrhagic contusions, right temporal bone fracture, sphenoid and skull base fractures, SAH, SDH. Transferred to progressive 1/16.*
Injuries
- SAH, SDH
- Nasal fractures
- Basilar skull fracture, R parietal and temporal
- R medial orbit fx
- R lamina per pre she fracture with orbital fat herniation[EG.1C]*"*[EG.1M]

General Information
Medical Diagnosis: Principal Problem:
Traumatic brain injury (HCC)
Active Problems:
Impaired functional mobility, balance, gait, and endurance
Cognitive impairment
Irritability
Multiple closed fractures involving skull and facial bones (HCC)

Past Medical History: History reviewed. No pertinent past medical history.
Past Surgical History: History reviewed. No pertinent surgical history.

Pain
Current Visit Pain:[EG.1T] 0/10[EG.1M]

Assessment[EG.1T]
SLP administered portions of the WAB, revised bedside 2/2 severity of language deficits. Pt was unable to follow or

mimic any 1-step commends, answer any yes/no questions, complete confrontational naming tasks, repeat after clinician at single word level, or write name. SLP suspects that pt hears better out of left ear than right ear, but due to comprehension deficits, it is difficult to fully assess. Pt is talkative, but his speech does not always make sense. For example, when provided with a pen and paper, he was unable to read the content and repetitively asked "but how much does it cost?" Pt is not at his baseline and would benefit from intensive language therapy to rehab these deficits.[EG.1M]

Current Liquid Diet: Thin/regular
Feeding: Able to feed self

Primary Mode of Expression: Verbal
Expression of Basic Needs: <20% accuracy
Repetition: Impaired
Words: <20% accuracy
Naming: Impairment
Confrontational Naming: <20% accuracy

Body Parts: <20% accuracy
Following Commands: Exceptions to WFL
Following Commands-one step: <20% accuracy

Aphasia Type: Mixed
Aphasia Severity: Moderate/Severe
Prognosis: Good
Prognosis Considerations: Access to care, Age, Co-Morbidities, Family/Community Support, Financial Resources, Medical Diagnosis, Medical Prognosis, Participation Level, Potential, Previous Level of Function, Severity of Impairments

Functional Deficits
Spoken Lang Comp Functional Deficit: 1
Spoken Language Expression Functional Deficit: 1

Plan
Education/Instruction : With patient ongoing, With staff completed
Understanding of Inst/Education: Pt/family expressed understanding
Results/Recommendation discussed with:: Patient, Nurse/Nursing staff
Services: Skilled SLP services to address the above deficits
Treatment/Interventions: Speech/Language/Voice Therapy, Education/Training
Frequency: 3-5 times per week
Duration: 3-4 weeks
Discharge Recommendation : Inpatient Rehab
Interdisciplinary Referral: PMR

Speech-Language Pathology
Progress Note

Pt seen in[EG.1T] hospital room/bedside[EG.1M] for[EG.1T] swallowing[EG.1M] procedure. The Speech-Language Pathologist wore the following PPE:[EG.1T] gloves and surgical mask[EG.1M]. At the time of this procedure, the patient's COVID-19 status was[EG.1T] not tested[EG.1M].

Patient Name: Sean Patrick Lynn
DOB: 6/24/1990
MRN: 004120303

Date of service: 1/19/2024
SLP Treatment Start Time: 1030
SLP Treatment Stop Time: 1048
Intervention provided:[EG.1T] Dysphagia Therapy[EG.1M]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Allied Health Progress Notes (continued)

Subjective:

Current Visit Pain:[EG.1T] 0/10[EG.1M]
Session #:[EG.1T] 4[EG.1M]
Patients goal of session:[EG.1T] pt did not verbalize goals[EG.1M]
Patient c/o:[EG.1T] no complaints
Sitte[EG.1M]r[EG.1T] and RN[EG.1M] present[EG.1T]

Pt received asleep in bed and was difficult to rouse. Pt roused to cold wet washcloth to face and neck. Limited session 2/2 pt participation. Pt continues with poor language comprehension. SLP attempted to informally assess reading single words for communication. Unsure of how much pt understood. He did not read words aloud or respond to the words. Focus of today's session was swallowing as pt was too lethargic to participate in any of the language goals.[EG.1M]

STG-Will complete confrontation naming
Dates: Start: 01/18/24 Expected End: 02/01/24
Description: STG-Patient will complete confrontation naming with 70% accuracy[EG.1T]
1/19/24: See above[EG.1M]

SWALLOWING
Dates: Start: 01/15/24

LTG-Safe swallow function
Dates: Start: 01/15/24 Expected End: 01/29/24
Description: LTG-Patient will establish safe swallow function for management of own secretions/po trials with 100% accuracy[EG.1T]
1/19/24: Unchanged[EG.1M]

STG-Tolerate P.O. therapeutic trials
Dates: Start: 01/15/24 Expected End: 01/29/24
Description: STG-Patient will tolerate P.O. therapeutic trials without s/s aspiration with 90% accuracy[EG.1T]
1/19/24: Pt was able to tolerate mixed consistencies (pill + thin liquid via cup edge) x5 and thin liquids via cup edge x2 during session to determine if pt still required meds crushed in puree. Difficult to fully assess oral cavity as pt is unable to follow commands at this time, however, no obvious pocketing of meds. Pt did not present with any s/s of aspiration mixed consistencies or thin liquids.[EG.1M]

Assessment:[EG.1T]

Improved[EG.1M] swallowing function. Improved agitation/restlessness. Language and cognition is unchanged[EG.1C] .[EG.1M]
Barriers to learning/progress: Cognitive-linguistic and hearing impairments

Plan:

Continue per plan of care

Recommendations:

Continue full liquid diet; per ENT, no chew diet is recommended. Pt technically can upgrade to puree, however, SLP was unable to fully educate him on his options today due to language comprehension and hearing impairments. It is likely pt will not enjoy a pureed tray, and therefore consume less PO intake.
Swallowing strategies:
-Sit fully upright
-Oral hygiene before meals
-Small sips via cup edge- no straws
-Small bites[EG.1C]
Meds one at a time with thin liquids.[EG.1M]
Speak to pt on pt's left side as temporal bone fx was on right. Hopefully hearing will be better on this side.[EG.1C]
Reduce stimulation: for example take blood pressure then take temperature. Do not attempt both at the same to avoid agitation.[EG.1M]

Discharge Recommendations:

Inpatient acute rehab

Thank you for allowing Speech Pathology Services to participate in the care of your patient. If you have questions or

Editor: Shaw, Carmen, RD (Registered Dietitian)

Follow-Up[CS.1M]
Pt seen on team rounds this morning.[CS.1C] He pulled our DHT last night but has since been replaced. SLP eval on hold due to sedation. TF running at goal rate.[CS.1M]

Pt is a 33/M admitted after a 35 ft fall from a ladder. Pt was cleaning his gutters and fell off his ladder. Injuries: SAH, SDH, nasal fractures, basilar skull fracture, R parietal and temporal, potential blunt aortic root injury, R lamina per pre she fracture with orbital fat herniation[CS.1C]. +SIADH[CS.1M]

Ht: 6' Admit Wt: 220# (1/13) BMI: 29.8 IBW: 178# (80.9kg)
Wt Hx: girlfriend reports ~30# intentional wt loss over the last ~3 months
Current Wt: 2[CS.1C]29[CS.1M]# (1/2[CS.1C]4[CS.1M])

Meds:[CS.1C] Glycolax, senna, others noted[CS.1M]
Labs:[CS.1C] Na 133 Ca 8.1[CS.1M]
I/Os:[CS.1C] 5003/2615
+BM (1/21)[CS.1M]
Nutr regimen: [CS.1C]Nutren 2.0 goal 45ml/hr[CS.1M]

Est Needs: 2000-2200kcal (20-22kcal/kg) 135-145g pro (1.7-1.8g/kg*IBW) Fluid per MD

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Allied Health Progress Notes (continued)

Comments: Nutren 2.0 goal rate of 45ml/hr to provide 2160kcal, 91g protein and 756ml free water. Add 40ml Proteinex tid.
(Total: 2400kcal/150g protein)

Nutr Rx:
1. [CS.1C]**Continue**[CS.1M] **Nutren 2.0@ goal rate of 45ml/hr.**
2.[CS.1C] **Continue**[CS.1M] **40ml Proteinex tid**[CS.1C]**.**
3. Bowel management[CS.1M]

Monitor/Goals:
Initiate nutrition (met)[CS.1C]
Tolerate TF at goal rate
Bowel management

Speech Language/Pathology[EG.1T]

SLP attempted swallow and lang tx this afternoon. Upon attempt, mother notified RN that pt is needing to have a BM. SLP will re-attempt as schedule permits.[EG.1M]

Thank you for allowing Speech Pathology Services to participate in the care of your patient. If you have questions or concerns, please call vocera by name.[EG.1T]

Speech-Language Pathology
Progress Note

Pt seen in[EG.1T] hospital room/bedside[EG.1M] for[EG.1T] swallowing[EG.1M] procedure. The Speech-Language Pathologist wore the following PPE:[EG.1T] gloves and surgical mask[EG.1M]. At the time of this procedure, the patient's COVID-19 status was[EG.1T] not tested[EG.1M].

Patient Name: Sean Patrick Lynn
DOB: 6/24/1990
MRN: 004120303

Date of service: 1/25/2024
SLP Treatment Start Time: 1200
SLP Treatment Stop Time: 1223
Intervention provided:[EG.1T] Dysphagia Therapy[EG.1M]

Subjective:
Current Visit Pain:[EG.1T] 0/10[EG.1M]
Session #:[EG.1T] 5[EG.1M]
Patients goal of session:[EG.1T] to get DHT out[EG.1M]
Patient c/o:[EG.1T] DHT
RN p[EG.1M]resent[EG.1T]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Allied Health Progress Notes (continued)

Pt was made NPO this week 2/2 agitation requiring sedating meds. Pt was not re-intubated or have any neurological events. DHT was placed but has also been a significant source of agitation for pt. SLP provided an ongoing swallowing assessment in therapy per team recommendation. Pt answers yes to all questions, including "were you born in 1940?" When asked when his birthday was pt responded with "what do you mean?" Pt's main request was to get DHT out today, so SLP only focused on swallowing. Oral cavity was cleansed by SLP prior to presentation of PO trials. With RN present, restraints were removed so pt could self feed. He repeatedly attempted to pull DHT. SLP spoke with APRN midway through session to recommend orders for DHT removal to reduce DHT-related agitation.[EG.1M]

Objective:

Encounter Problems

Encounter Problems (Active)

SWALLOWING
Dates: Start: 01/15/24

LTG-Safe swallow function
Dates: Start: 01/15/24 Expected End: 01/29/24
Description: LTG-Patient will establish safe swallow function for management of own secretions/po trials with 100% accuracy[EG.1T]
1/25/24: Progressing[EG.1M]

STG-Tolerate P.O. therapeutic trials
Dates: Start: 01/15/24 Expected End: 01/29/24
Description: STG-Patient will tolerate P.O. therapeutic trials without s/s aspiration with 90% accuracy[EG.1T]
1/25/24: Pt was able to self-feed with assistance and cues. On multiple occasions attempted to pour/administer liquids and purees via nasal passage instead of mouth. He would ask "nose or mouth?" when given a cup of water or container of applesauce. There was little carryover since this happened more than once. Oral phase was judged to be WFL. No subtle or overt s/s of aspiration noted.[EG.1M]

Assessment:[EG.1T]
Improved swallowing function.[EG.1C] Agitation/restlessness persists.[EG.1M] Language and cognition[EG.1C] remains[EG.1M] unchanged.
Barriers to learning/progress: Cognitive-linguistic and hearing impairments

Plan:[EG.1C]
Re-initiate full liquid diet; continue with language care plan[EG.1M]

Recommendations:[EG.1C]
Re-order[EG.1M] full liquid diet; per ENT, no chew diet is recommended. Pt technically can upgrade to puree, however, SLP was unable to fully educate him on his options today due to language comprehension and hearing impairments. It is likely pt will not enjoy a pureed tray, and therefore consume less PO intake.
Swallowing strategies:
-Sit fully upright
-Oral hygiene before meals
-Small sips via cup edge- no straws
-Small bites
Meds[EG.1C] **crushed in puree**[EG.1M]**.**

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Allied Health Progress Notes (continued)

Speak to pt on pt's left side as temporal bone fx was on right. Hopefully hearing will be better on this side.
Reduce stimulation: for example take blood pressure then take temperature. Do not attempt both at the same to avoid agitation.

Discharge Recommendations:

Inpatient acute rehab

Thank you for allowing Speech Pathology Services to participate in the care of your patient. If you have questions or concerns, please call vocera by name.[EG.1C]

Narrative:
eGFR has been calculated using CKD-EPI Creatinine Equation (2021) which is recommended by the National Kidney Foundation.

GFR Categories in Chronic Kidney Disease (CKD)

Category	GFR	Interpretation:
G1	90 or greater	Normal or high*
G2	60-89	Mild decrease*
G3a	45-59	Mild to moderate decrease
G3b	30-44	Moderate to severe decrease
G4	15-29	Severe decrease
G5	14 or less	Kidney failure

*In the absence of evidence of kidney damage, neither GFR category G1 nor G2 fulfill the criteria for CKD Kidney Int Suppl 2013;3:1-150

High Sensitivity Troponin I-Timed Series (Normal) Resulted: 01/13/24 1753, Result status: Final result

Ordering provider: Takasugi, Jordan M, MD 01/13/24 1720 Order status: Completed
Filed by: LAB, BACKGROUND USER 01/13/24 1753 Collected by: Ernst, Nathan, RN 01/13/24 1716
Resulting lab: UAMS LABORATORY
Narrative:
The High Sensitivity Troponin I was measured on the Beckman DXi with results expressed in units of ng/L; different from the previous Troponin I test which used units of ng/mL. Over all reference interval is 17.5 ng/L. Troponin results should be interpreted in conjunction with the patient's symptoms, history, and results of other diagnostic tests.

HIGH SENSITIVITY TROPONIN I- HOUR 1 (Final result)

Status: **Completed**

Order placed as a reflex to High Sensitivity Troponin I-Timed Series ordered on 01/13/24 at 1800
Ordering user: Interface, Lab Instrument Results In 01/13/24 1829
Authorized by: Watkins, Adam S, MD
Frequency: Routine Once 01/13/24 1920 - 1 occurrence
Quantity: 1
Instance released by: Interface, Lab Instrument Results In (auto-released) 1/13/2024 6:29 PM
Ordering provider: Redding, Nathan, MD
Ordering mode: Standard
Class: Unit Collect
Lab status: Final result

Specimen Information

ID	Type	Source	Collected By
24U013CH00804	Blood	—	Waters, Charles, RN 01/13/24 1945

HIGH SENSITIVITY TROPONIN I- HOUR 1 Resulted: 01/13/24 2024, Result status: Final result

Ordering provider: Redding, Nathan, MD 01/13/24 1829
Filed by: LAB, BACKGROUND USER 01/13/24 2024
Resulting lab: UAMS LABORATORY
Order status: Completed
Collected by: Waters, Charles, RN 01/13/24 1945
Narrative:
The High Sensitivity Troponin I was measured on the Beckman DXi with results expressed in units of ng/L; different from the previous Troponin I test which used units of ng/mL. Over all reference interval is 17.5 ng/L. Troponin results should be interpreted in conjunction with the patient's symptoms, history, and results of other diagnostic tests.

Components

Component	Value	Reference Range	Flag	Lab
HS Troponin I, 1hr	6.6	<19.8 ng/L	—	UAMS LAB
Delta HS TNI, 1hr	>2.6	ng/L	—	UAMS LAB

Narrative:
eGFR has been calculated using CKD-EPI Creatinine Equation (2021) which is recommended by the National Kidney Foundation.

GFR Categories in Chronic Kidney Disease (CKD)

Category	GFR	Interpretation:
G1	90 or greater	Normal or high*
G2	60-89	Mild decrease*
G3a	45-59	Mild to moderate decrease
G3b	30-44	Moderate to severe decrease
G4	15-29	Severe decrease
G5	14 or less	Kidney failure

*In the absence of evidence of kidney damage, neither GFR category G1 nor G2 fulfill the criteria for CKD Kidney Int Suppl 2013;3:1-150

Narrative:
eGFR has been calculated using CKD-EPI Creatinine Equation (2021) which is recommended by the National Kidney Foundation.

GFR Categories in Chronic Kidney Disease (CKD)

Category	GFR	Interpretation:
G1	90 or greater	Normal or high*
G2	60-89	Mild decrease*
G3a	45-59	Mild to moderate decrease
G3b	30-44	Moderate to severe decrease
G4	15-29	Severe decrease
G5	14 or less	Kidney failure

*In the absence of evidence of kidney damage, neither GFR category G1 nor G2 fulfill the criteria for CKD Kidney Int Suppl 2013;3:1-150

Components

Component	Value	Reference Range	Flag	Lab
Sodium	122	135 - 145 mmol/L	L	UAMS LAB
Potassium	4.0	3.5 - 5.1 mmol/L	—	UAMS LAB
Chloride	94	98 - 107 mmol/L	L	UAMS LAB
CO2	19	22 - 32 mmol/L	L	UAMS LAB
Anion Gap Comment: Anion Gap calculated as Na-(Cl+HCO3).	9	3 - 11	—	UAMS LAB
BUN	13	6 - 20 mg/dL	—	UAMS LAB
Creatinine	0.7	0.6 - 1.3 mg/dL	—	UAMS LAB
eGFR	>90.0	mL/min/1.73 square meters	—	UAMS LAB
Glucose	107	70 - 110 mg/dL	—	UAMS LAB
Calcium	8.6	8.6 - 10.2 mg/dL	—	UAMS LAB
Phosphorus	3.3	2.5 - 4.5 mg/dL	—	UAMS LAB
Magnesium	1.7	1.6 - 2.6 mg/dL	—	UAMS LAB

Narrative:
eGFR has been calculated using CKD-EPI Creatinine Equation (2021) which is recommended by the National Kidney Foundation.

GFR Categories in Chronic Kidney Disease (CKD)

Category	GFR	Interpretation:
G1	90 or greater	Normal or high*
G2	60-89	Mild decrease*
G3a	45-59	Mild to moderate decrease
G3b	30-44	Moderate to severe decrease
G4	15-29	Severe decrease
G5	14 or less	Kidney failure

*In the absence of evidence of kidney damage, neither GFR category G1 nor G2 fulfill the criteria for CKD Kidney Int Suppl 2013;3:1-150

Narrative:
eGFR has been calculated using CKD-EPI Creatinine Equation (2021) which is recommended by the National Kidney Foundation.

GFR Categories in Chronic Kidney Disease (CKD)

Category	GFR	Interpretation:
G1	90 or greater	Normal or high*
G2	60-89	Mild decrease*
G3a	45-59	Mild to moderate decrease
G3b	30-44	Moderate to severe decrease
G4	15-29	Severe decrease
G5	14 or less	Kidney failure

*In the absence of evidence of kidney damage, neither GFR category G1 nor G2 fulfill the criteria for CKD Kidney Int Suppl 2013;3:1-150

Components

Component	Value	Reference Range	Flag	Lab
Sodium	131	135 - 145 mmol/L	L	UAMS LAB
Potassium	4.0	3.5 - 5.1 mmol/L	—	UAMS LAB
Chloride	100	98 - 107 mmol/L	—	UAMS LAB
CO2	25	22 - 32 mmol/L	—	UAMS LAB
Anion Gap Comment: Anion Gap calculated as Na-(Cl+HCO3).	6	3 - 11	—	UAMS LAB
BUN	10	6 - 20 mg/dL	—	UAMS LAB
Creatinine	0.6	0.6 - 1.3 mg/dL	—	UAMS LAB
eGFR	>90.0	mL/min/1.73 square meters	—	UAMS LAB
Glucose	105	70 - 110 mg/dL	—	UAMS LAB
Calcium	8.6	8.6 - 10.2 mg/dL	—	UAMS LAB
Phosphorus	3.4	2.5 - 4.5 mg/dL	—	UAMS LAB
Magnesium	1.8	1.6 - 2.6 mg/dL	—	UAMS LAB

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Labs (group 3 of 3) (continued)

Resulting lab: UAMS LABORATORY
Narrative:
eGFR has been calculated using CKD-EPI Creatinine Equation (2021) which is recommended by the National Kidney Foundation.

GFR Categories in Chronic Kidney Disease (CKD)

Category	GFR	Interpretation:
G1	90 or greater	Normal or high*
G2	60-89	Mild decrease*
G3a	45-59	Mild to moderate decrease
G3b	30-44	Moderate to severe decrease
G4	15-29	Severe decrease
G5	14 or less	Kidney failure

*In the absence of evidence of kidney damage, neither GFR category G1 nor G2 fulfill the criteria for CKD Kidney Int Suppl 2013;3:1-150

EFAST_POCUS:

Exam Information:
Images are digitally stored for quality assurance review, retrievability, and archival purposes.:
Exam type: Diagnostic

Indication(s) for Exam:
The exam was performed with the following indications:: Blunt trauma

Views Obtained:
The following spaces were examined as part of the FAST exam:: Pericardial, pleural, Morison's pouch, splenorenal, and retro-vesicular spaces were examined.

Findings:
Pericardial space: Fluid absent
Pericardial tamponade: Absent
Morison's pouch (RUQ): Fluid absent
RIGHT pleural space: Fluid absent
Perisplenic (LUQ): Fluid absent
LEFT pleural space: Fluid absent
Retrovesicular space: Fluid absent
RIGHT lung sliding: Lung sliding present
Left lung slide: Lung sliding present

Interpretation:
Abdomen: No pathologic free fluid
Pericardial space: No pathologic free fluid
Tamponade: No evidence of tamponade
Pleural fluid: No pathologic free fluid
Lung: Normal lung slide

Confirmatory Study:
What confirmatory study was done?: Xray

Sign/Submit:
Submit Exam For QA Review: Yes
Attending Physician Attestation:: I was present and directly participated in the limited ultrasound procedure, have reviewed the imaging and the above represents my personal interpretation as the attending physician

Performed: 01/13/24 1724 - 01/13/24 1724
Resulting lab: SPEECHQ

Filed by: Interface, Rad Results In 01/14/24 1009

Accession number: 52941187

Narrative:
EXAM DESCRIPTION:
XR CHEST AP PORTABLE

CLINICAL INDICATION/ HISTORY :
33 y/o Mwith no known history presenting with Trauma, fall from 30 ft.

TECHNIQUE:
AP portable supine radiograph of the chest.

COMPARISON:
None available.

FINDINGS:
Left costophrenic angle not included within the field view. No abnormal tracheal deviation. Cardiomediastinal silhouette is normal in size and morphology.

Low lung volume. Mild bibasilar atelectasis is present. No area of focal consolidation in the lungs.

No large pleural effusion.

Impression:
Mild bibasilar atelectasis. No large pneumothorax.

I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented.

Order status: Completed
Filed by: Interface, Rad Results In 01/13/24 1846
Accession number: 52941182

Narrative:
EXAM DESCRIPTION:
CT CERVICAL SPINE WO CONTRAST

CLINICAL INDICATION:
Neck trauma; Trauma

HISTORY:
Neck trauma; Trauma

COMPARISON:
None.

TECHNIQUE:
Submillimeter axial CT scan through the cervical spine without contrast. Sagittal and coronal reformats were performed.

FINDINGS:
The cervical vertebral bodies are normal in height. Vertebral alignment is maintained. The craniovertebral junction is intact. No acute fracture or traumatic malalignment of the cervical. Multilevel mild degenerative changes are noted most prominent at the C6-7 fight formation causing mild spinal canal stenosis.

The prevertebral soft tissues appear unremarkable. There is no evidence apical pneumothorax. Multiple airspace opacities in the lung apices may represent pulmonary contusions in the setting of trauma.

Partially imaged right temporal bone fracture better assessed on maxillofacial CT. Intracranial findings are described in the CT angiogram study.

Impression:
No acute cervical spine fracture or traumatic malalignment.

Findings were discussed with Dr. Jordan in the ED at 6:43 pm on 1/13/2024.

Electronically Signed by: Prashanth Reddy Damalcheruvu, M.D. on 01/13/2024 at 18:44:02

Narrative:

EXAM DESCRIPTION:
CT MAXILLOFACIAL AREA WO CONTRAST

CLINICAL INDICATION:
Facial trauma, blunt; injury/trauma

HISTORY:
Facial trauma, blunt; injury/trauma

COMPARISON:
None.

TECHNIQUE:
Submillimeter axial CT scan through the maxillofacial region without contrast. Sagittal, coronal and 3D reformats were performed.

FINDINGS:
There are mildly displaced fractures of the bilateral nasal bones. There is fracture of the inferior portion of the nasal septum.

There is linear undisplaced fracture through the roof of the sphenoid sinus. This involves the bilateral carotid canals. There is hemosinus of the sphenoid sinus.

There is linear minimally displaced fracture of the left lateral cribriform plate.

Chronic fracture of the right lamina papyracea is noted with herniation of orbital fat. No herniation of extraocular muscles.

There is a longitudinal fracture of the right temporal bone. The fracture traverses the tegmen mastoideum. There is fracture of the anterior and posterior walls of the external auditory canal. No evidence of ossicular disruption or otic capsule involvement is noted.

There is mild fluid in the right maxillary sinus.

Right supraorbital and preseptal soft tissue swelling is seen. The globes appear unremarkable. The mandible appears intact.

There is deviation of the nasal septum to the left. No septal spur or inferior turbinate hypertrophy.

Multiple compartment intracranial hemorrhages are described in the CT angiogram study.

Impression:
Longitudinal fracture of the right temporal bone involving the tegmen mastoideum, anterior and posterior walls of the external auditory canal with hemomastoid and hemotympanum. No evidence of ossicular disruption or otic capsule involvement.

Fracture of the roof of the sphenoid sinus extending to the walls of the bilateral carotid canals. Sphenoid hemosinus noted.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Imaging (continued)

Linear minimally displaced fracture of the left lateral cribriform plate.

Mildly displaced fractures of the bilateral nasal bones and inferior portion of the nasal septum.

Likely chronic fracture of the right lamina papyracea in the absence of adjacent hemosinus. Herniation of orbital fat is seen without herniation of extraocular muscle.

CT CHEST ABDOMEN PELVIS W

HISTORY:
33 y/o M with Polytrauma, blunt

COMPARISON:
None available.

TECHNIQUE:
CT CHEST ABDOMEN PELVIS W
Contiguous mm/submillimeter axial CT images were acquired through the chest, abdomen and pelvis. Axial images were reconstructed and reviewed. Sagittal and coronal reconstructions were also available for review. Intravenous contrast was administered.

Other:

FINDINGS:
CT VASCULAR:

Aorta and other vasculature: No evidence of transection or dissection. No periaortic hematoma.

Active contrast extravasation: None

NON ANGIOGRAPHIC FINDINGS:

CHEST:

Supraclavicular and axillary region: The visualized supraclavicular region is normal. No fracture in the visualized clavicles, scapulae,

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Imaging (continued)

or upper extremities.

Mediastinum and hila: Mild retrosternal mediastinal stranding/hematoma noted. No mass or lymphadenopathy.

Airways: The tracheobronchial tree is patent.

Lung parenchyma: No pneumothorax, or hemothorax. Airspace opacities and ground-glass opacities in the dependent bilateral lungs.

Pleural space: No pleural effusion.

ABDOMEN AND PELVIS:
Liver: No evidence of hepatic laceration. No perihepatic hematoma or ascites. No focal lesion.

Gallbladder and bile ducts: Well distended, without calcified gallstone. No wall thickening or pericholecystic fluid. No intrahepatic or extrahepatic biliary ductal dilatation.

Spleen: Unremarkable. No laceration or hematoma.

Pancreas: Unremarkable. No laceration or hematoma.

Adrenal glands: Unremarkable. No laceration or hematoma.

Kidneys: No renal laceration or perinephric hematoma. Symmetric enhancement and excretion into nondilated collecting systems, without contrast extravasation to suggest collecting system injury.

Ureters: Nondistended without evidence of injury.
Bladder: The bladder is well distended, without focal wall thickening.

Esophagus, stomach: No esophageal thickening or dilatation.
Small and large bowel (includes omentum and mesentery): No mesenteric or bowel wall hematoma. The stomach, small, and large bowel are unremarkable. Multiple subcentimeter diffuse mesenteric lymph nodes likely reactive.

Vessels: The abdominal aorta is nonaneurysmal, without traumatic abnormality or periaortic hematoma. No abnormality in the inferior vena cava or visualized deep veins.

Lymph nodes: No suspicious intraabdominal mass or lymphadenopathy.

Free fluid/ collections: No free air.

Reproductive organs: Unremarkable.

MUSCULOSKELETAL AND SOFT TISSUE:
No traumatic osseous abnormality. Left L5 pars defect.

Impression:
1. Mild retrosternal mediastinal stranding/hematoma noted.
2. Airspace opacities and ground-glass opacities in the dependent portions of the bilateral lungs, may be secondary to aspiration. Cannot exclude contusions in the setting of trauma.

Narrative:

EXAM DESCRIPTION:
CT ANGIOGRAM HEAD & NECK W/3D RECONSTRUCTION

CLINICAL INDICATION:
Head trauma, moderate-severe

HISTORY:
Head trauma, moderate-severe

COMPARISON:
None.

TECHNIQUE:
Submillimeter axial CT scan through the head and neck without and with contrast. Post-contrast images were acquired in the arterial phase. Sagittal, coronal, MIP and 3D reformats were obtained

FINDINGS:
CT brain:
There are hemorrhagic contusions in the left temporal lobe. There is small subdural hemorrhage in the left temporal and frontal convexity. There is also trace subdural hemorrhage along the left tentorium. Small left convexity subarachnoid hemorrhage is noted. There is mild mass effect with midline shift of 7 mm to the right. No evidence of descending transtentorial herniation.

The gray-white matter differentiation is maintained. No acute territorial infarct is seen.

There is no intracranial space-occupying lesion, mass effect or midline shift. No hydrocephalus or extraaxial fluid collection.

Mild right frontal and supraorbital soft tissue swelling is noted.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Imaging (continued)

CT angiogram head: There is a focus of active contrast extravasation in the left temporal lobe hemorrhagic contusion.. Distal cervical and intracranial segments of the internal carotid arteries are normal in caliber. The A1 segment of the right ACA is hypoplastic. The anterior cerebral arteries are otherwise normal in caliber. Both middle cerebral arteries normal in caliber.

The vertebral arteries, the basilar artery and both posterior cerebral arteries are normal in caliber.

The posterior communicating arteries are hypoplastic. The anterior communicating artery is present..

CT angiogram neck: The left vertebral artery arises directly from the arch of the aorta. The aortic arch and proximal arch vessels are patent. The common carotid arteries are normal in caliber. There is no stenosis at the carotid bifurcations. There is tortuosity of the cervical ICAs without vascular stenosis.

Both vertebral arteries are normal in caliber.

Neck soft tissues: No acute findings in the included soft tissues of the neck..

Lung apices: Scattered airspace opacities in the bilateral upper lungs may represent pulmonary contusions in the setting of trauma..

Impression:
Noncontrast CT head:

Multicompartmental intracranial hemorrhage with prominent hemorrhagic contusions in the left temporal lobe, small left convexity subdural hemorrhage, left tentorial subdural hemorrhage and small left convexity subarachnoid hemorrhage causing mild mass effect with midline shift of 7 mm to the right. No evidence of descending transtentorial herniation.

CT angiogram head and neck:

Punctate focus of active contrast extravasation in the left temporal lobe hemorrhagic contusion.

No large vessel occlusion, hemodynamically significant stenosis or abrupt vessel cut off. No evidence of vascular injury. Specifically no evidence of dissection of the internal carotid arteries in the region of the sphenoid sinus roof fracture.

Findings were discussed with Dr. Jordan in the ED at 6:43 pm on 1/13/2024.

Multiple contiguous axial CT images were obtained through the temporal bones. Sagittal and coronal obliques were performed through the temporal bones.

FINDINGS:
Right temporal bone:

Nondisplaced fracture seen involving the right parietal bone which extends into the squamous portion of the right temporal bone and mastoid with involvement of the tegmen mastoid.

Longitudinal temporal bone fracture is seen in the right mastoid extending into the lateral wall of the middle ear.

There is no disruption of the ossicles. No otic capsule involvement.
No involvement of the facial nerve.
Mild hemomastoid and hemotympanum.

Nondisplaced fracture seen involving the superior and lateral walls of the right sphenoid sinus which extends into the medial wall of the right carotid canal.

Intracranial findings are better detailed on dedicated CT head imaging.

Left temporal bone:

The external auditory canal, tympanic membrane, thin osseous labyrinth are intact. No evidence of erosion of the ossicles, scutum, tegmen or tympani. Mastoid air cells are well pneumatized and clear. No suspicious osseous lesion or fracture is seen. The course of the facial nerve is visualized and within normal limits.

Impression:
Longitudinal fracture of the right temporal bone traversing the tegmen mastoideum and anterior and posterior walls of the external auditory canal. No evidence of ossicular disruption or otic capsule involvement.

Unremarkable HRCT of the left temporal bone.

I personally reviewed the image(s) and, if necessary, I edited the report. I agree with the report as now presented.

Resulting lab: SPEECHQ
Narrative:
EXAM DESCRIPTION:
CT HEAD WO CONTRAST

HISTORY:
33 y/o M with Repeat trauma head cut

COMPARISON:
Same day CTA head and neck imaging available for comparison.

TECHNIQUE:
Sub mm thick slices were obtained through the brain without intravenous contrast administration. Sagittal and coronal reconstructions were performed. Axial 5 mm thick slices were reviewed.

FINDINGS:
Large confluent hemorrhagic contusion within the left temporal lobe is slightly increased when compared to immediate prior.
Mildly increased left frontoparietal temporal subdural hematoma.
Stable appearing left tentorial subdural hematoma which measures 5 mm in maximum thickness.
Stable scattered subarachnoid hemorrhage within the left cerebral convexity.

Stable effacement of the perimesencephalic cisterns, likely due to diffuse mild cerebral edema.
5 mm of rightward midline shift, similar in appearance to prior exam.
No evidence of herniation.

Redemonstration of calvarial and maxillofacial fractures better described on same day dedicated maxillofacial and temporal bone imaging.
There is opacification of the bilateral maxillary and sphenoid sinuses.
Opacification of the right mastoid air cells.

Impression:
Mild increase in left frontoparietal temporal subdural hematoma and left frontal lobe hemorrhagic contusion. Stable left tentorial subdural hematoma and scattered subarachnoid hemorrhage.

Confluent hemorrhagic contusion within the left temporal lobe is mildly increased when compared to immediate prior. Stable mild mass effect and midline shift without evidence of transtentorial herniation.

Echocardiography Examination

Name: SEAN LYNN
MR#: 004120303 Admission Number: 10000056626191
Study Date: 01/13/2024 Study Time: 06:45 PM
Date Of Birth: 06/24/1990 Age: 104 years
Height: 72 in. (182.9 cm) Weight: 220 lbs. (99.79 kg)
BSA: 2.22 m2 Gender: Male
Blood Pressure: 144 mmHg / 85 mmHg Rhythm:

Indications
aortic root injury

Procedure Staff
Ordering Physician: ADAM S WATKINS
Reading Physician: Tushar Tarun, Dr.
Echo Sonographer: Bryanna Wilson-Spear, Sonographer Remarks: please see tech comments

Conclusions:
1. Left ventricle: Normal LV wall thickness; normal LV internal dimensions; no regional abnormalities. Normal LV systolic function, estimated LVEF 64%; normal diastolic function.
2. Pericardium: No pericardial effusion
3. Aortic root: Normal aortic root dimension when indexed to BSA. No gross abnormalities identified.
4. Aortic valve: Likely trileaflet valve; no stenosis; no regurgitation
Comparison: None

Findings:
1. Left ventricle: Normal LV wall thickness; normal LV internal dimensions; no regional abnormalities. Normal LV systolic function, estimated LVEF 64%; normal diastolic function.
2. Right ventricle: Normal size; normal systolic function.
3. Left atrium: Normal size.
4. Right atrium: Normal size.
5. Interatrial septum: No evidence of right to left shunt with Color Doppler

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Cardiology (continued)

6. Aortic root: Normal aortic root dimension when indexed to BSA. No gross abnormalities identified.

7. Valves:
a) Aortic valve: Normal trileaflet valve; no stenosis; no regurgitation
b) Mitral valve: Normal valve leaflets; no stenosis; no regurgitation
c) Tricuspid valve: Not well visualized; no stenosis; trivial regurgitation
d) Pulmonic valve: Not well visualized; no stenosis; no regurgitation

8. Hemodynamics:
a) Cannot estimate RV systolic pressure/PA systolic pressure due to poor Doppler signal
9. IVC: Normal size; normal respiratory variation.

10. Pericardium: No pericardial effusion
Findings

Image Quality: Technically Difficult

Exam Details
Procedure Ordered: Transthoracic Echo
Type of Referral: Inpatient Referral
Procedure Components: Complete 2D imaging, Complete Spectral Doppler, Color Doppler
Procedure Status: STAT study
Image Quality: Technically Difficult
Facility Location: Bedside

Measurements

Anatomy	Label	Value	Normal Value
Aorta	AoRoot, 2D	3.7 cm	(2.7cm - 3.7cm)
Aortic Valve	AV PGmax	8 mmHg	
Aortic Valve	AV PGmean	4 mmHg	
Aortic Valve	AV Vmax, Caliper	1.37 m/s	(1m/s - 1.7m/s)
Aortic Valve	AVA D (continuity eq. VTI)	2.9 cm squared	
Aortic Valve	LVOT Vmax / AV Vmax	0.81	
Interventricular septum	IVSd, 2D	0.9 cm	(0.6cm - 1.1cm)
Left Ventricle	LVDd, 2D	5.7 cm	(4.2cm - 5.9cm)
Left Ventricle	LVDs, 2D	2.8 cm	(2.2cm - 3.5cm)
Left Ventricle	LVPWd, 2D	0.9 cm	(0.6cm - 1cm)
Pulmonic Valve	PV Vmax, Caliper	1.22 m/s	(0.6m/s - 0.9m/s)

Filed by: Interface, Lab In Hlseven 07/02/24 1203
Resulting lab: UAMS MUSE
Order status: Completed
Collected by: 01/15/24 1543
Lab Technician: 00DN

Narrative:
Ventricular Rate- 64 BPM
Atrial Rate- 64 BPM
P-R Interval- 138 ms
QRS Duration- 100 ms
Q-T Interval- 400 ms
QTC Calculation(Bazett)- 412 ms
P Axis- 43 degrees
T Axis- 35 degrees

Diagnosis
Baseline artifact, interpretation may be affected
Sinus rhythm
When compared with ECG of 14-JAN-2024 17:57,
Poor data quality in current ECG precludes serial comparison but No significant change was found

Questionnaire

Question	Answer
Flow Rate	6 L/Min
Indications for O2 therapy	Other (specify)
Weaning instructions	Wean O2 to maintain saturation range of 95%-100%

Medication Administrations

acetaminophen (Tylenol) suppository 325 mg [209641619]

Ordering Provider: McConnell, Zachary A, MD
Status: Discontinued (Past End Date/Time)
Ordered On: 01/14/24 0824
Starts/Ends: 01/14/24 0824 - 01/15/24 1010
Ordered Dose (Remaining/Total): 325 mg (—/—)
Route: Rectal
Frequency: Every 4 hours PRN
Ordered Rate/Order Duration: — / —
Admin Instructions: – Maximum daily dose for most patients in acute care is 4,000 mg/day.
– Maximum recommended dose of acetaminophen for patients with hepatic dysfunction (Child-Pugh class B or C) = 3,000 mg dose limit per 24 hours.

(No admins scheduled or recorded for this medication in the specified date/time range)

acetaminophen (Tylenol) tablet 975 mg [209670210]

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Medication Administrations (continued)

Ordering Provider: McConnell, Zachary A, MD
Ordered On: 01/15/24 1010
Ordered Dose (Remaining/Total): 975 mg (—/—)
Frequency: Every 6 hours
Admin Instructions: – Maximum daily dose for most patients in acute care is 4,000 mg/day.

Status: Discontinued (Past End Date/Time)
Starts/Ends: 01/15/24 1045 - 01/23/24 0037
Route: Oral
Ordered Rate/Order Duration: — / —
– Maximum recommended dose of acetaminophen for patients with hepatic dysfunction (Child-Pugh class B or C) = 3,000 mg dose limit per 24 hours.

Discharge instructions (Active)

Electronically signed by: **Deloach, Joseph P, MD on 01/27/24 1311** Status: **Active**
Ordering user: Deloach, Joseph P, MD 01/27/24 1311
Ordering provider: Deloach, Joseph P, MD
Authorized by: Kimbrough, Mary K, MD
Ordering mode: Standard
Frequency: Routine 01/27/24 -
Class: Clinic Performed
Quantity: 1
Order comments: Pain Management: Alternate taking Tylenol (acetaminophen) and/or Advil/Motrin (ibuprofen) around the clock for the first few days to have a base layer of pain control. Activity If at all possible, have someone with you to help you. Going up stairs is not a problem. Listen to your body and rest when you are tired. Do not lift anything heavier than a gallon of milk, or 10lbs. Do not drive a motor vehicle; operate machinery or power tools while taking pain medications. Diet You may resume your at-home diet as directed immediately. Always try to take pain medications with food or milk to prevent nausea. Follow Up None necessary Seek medical attention for a fever of 101.5F or higher (it is not uncommon to have a low-grade fever after surgery), unusual chest pain, or increased work of breathing. Call 911 in an emergency. You have left against medical advice. You are highly advised to seek medical care immediately and it is felt that you are not medically ready to discharge.

OT

OT Eval & Treat (Discontinued)

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Question	Answer
Swallow study indications:	Delirium protocol – aspiration risk
Procedure/Treatment Restrictions	No contraindications. Speech Pathologist may order/perform FEES or VFSS as indicated.

Resulted: 01/15/24 1126, Result status: Edited Result - FINAL

Clinical Swallow Eval and Treat

Ordering provider: Kindy, Erin, APRN, CNP 01/14/24 0759 Order status: Completed
Filed by: Gray, Emily, CCC-SLP 09/04/24 0806
Narrative:
Gray, Emily, CCC-SLP 9/4/2024 8:06 AM
SPEECH-LANGUAGE PATHOLOGY:
CLINICAL SWALLOW EVALUATION
Pt seen in hospital room/bedside for swallowing procedure. The Speech-Language Pathologist wore the following PPE: gloves and surgical mask. At the time of this procedure, the patient's COVID-19 status was not tested.

Patient Name: Sean Patrick Lynn
Date of Birth: 6/24/1990
MRN: 004120303
Date of Evaluation: 1/15/2024
SLP Eval Start Time: 0850
SLP Eval Stop Time: 0910

Referral and History:
This 33 y.o. male was referred for a clinical dysphagia exam by Erin Kindy, APRN secondary to fall from 30 feet resulting in TBI, facial fxs, and skull fxs. Informally, pt appears to be ~RLA IV. Pt's may have some expressive and language deficits, but it is

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Other Orders (group 12 of 12) (continued)

difficult to fully assess. Pt has varying degrees of alertness with moments of somnolence then very active/restless. Mother present at bedside. Pt was unable to answer orientation questions or other intake questions. He was unable to complete oral hygiene; clinician cleansed oral cavity.

Per Dr. Arensberg 1/13/24: "HISTORY OF MECHANISM OF INJURY: Fall from 30 feet
Activation Level: Level 2 Trauma Team Activation
Date of Injury: 1/13/2024
Time of Injury- 1630
35 M 35 ft ladder. Pt was cleaning gutters and fell off a ladder. + LOC. On arrival is altered. On 15L nonrebreather. Unknown PMH. Motor function is decreased and there is blood present within the R ear canal. Dried blood in BL nares and externally. R Superior periorbital hematoma without lacerations. He is confused, does not answer questions, makes noise.
SCENE INFORMATION
Scene Blood Pressure: 120/70
LOC: Yes
Hemodynamically: stable
Intubated: No
Transport: EMS
Injuries
- SAH, SDH
- Nasal fractures
- Basilar skull fracture, R parietal and temporal
- Potential blunt aortic root injury
- R lamina per pre she fracture with orbital fat herniation"

Past Medical History: History reviewed. No pertinent past medical history.
Past Surgical History: History reviewed. No pertinent surgical history.

Onset date of symptoms: 1/13/24
Consent for intervention given by: Patient

Prior Level of Swallowing Function: unable to assess

Pertinent Information:
Respiratory Status: Oxygen Delivery: Room air
CXR results 1/13/24: "Mild bibasilar atelectasis. No large pneumothorax."

Level of Alertness: Alert only with cues and Lethargic

Behavioral/Cognition: Restless, impulsive, cognitive-communication deficits

Current Diet: NPO: except ice chips

Ability to Manage Secretions: { Appears adequate

Dentition/ oral hygiene: Unable to adequately assess

Pain
Current Visit Pain: 0/10

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Other Orders (group 12 of 12) (continued)

Patient Positioning: Upright in bed

Vision for feeding: Unable to assess

Barriers to Learning: Cognition

Oral Mechanism Examination:
Pt was unable to participate in an oral motor exam. Informally, no impairments with lingual and labial strength and ROM.

Vocal Quality-Cranial Nerve X (Vagus Nerve):
Phonation of /a/ for several seconds (strong/loud): Unable to complete MPT; subjectively no voice abnormalities detected when pt offered speechPotential for Expectorating Material:
Cough: Unable to assess
Throat Clear: Unable to assess

Results of Swallow Examination:
SLP cleansed oral cavity with toothbrush and toothpaste. Pt was unable to swish and spit water to remove toothpaste from oral cavity; pt swallowed water instead. SLP adhered to ENT and ophthalmology no straw recs.
Various liquid/food consistencies were presented including: pureed, thin liquid and regular solid via spoon and cup with the following results:
Oral phase:
Active acceptance of bolus.
Adequate labial seal with spoon and cup edge without anterior loss of bolus.
Unremarkable post-swallow oral residue.
Pharyngeal phase:
Laryngeal elevation present up on palpation.
No subtle or overt s/s of aspiration with any other trials/consistencies.
Vocal quality remained clear without any changes in respiratory status.

Compensations Used during study/ Response:
None

Clinical Impressions:
Patient Sean Patrick Lynn presents with suspected acute mild oropharyngeal dysphagia, mostly due to cognitive and behavioral factors related to TBI. Pt likely will be impulsive and will have varying degrees of alertness. A full liquid diet is recommended, but pt should only be fed if pt is fully alert and participating.
Pt's risk of aspiration is elevated; cognitive status will be the biggest factor for aspiration risk. .

Prognosis is good.

Recommendations:
Recommended Diet: Full liquid diet (IDDSI 0) , then subsequently upgrade diet per SLP recs .
Swallowing/Feeding Techniques:
Sit upright with PO intake
Oral hygiene before meals

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Other Orders (group 12 of 12) (continued)

Small bites and sips
Eliminate distractions during meals
NO STRAWS (per ENT and ophtho)
Patient Positioning:
Upright in chair
Upright in bed
Mealtime Set-Up Instructions:
Needs non-distracting environment (turn off TV, limit visitors, limit talking)
Remove straw
Check that food is consistent with diet ordered
Supervision with Meals:
1:1 Constant supervision, do not leave patient alone with food
Eating only with trained medical staff or family
Medication Route:
One at a time with thin liquids or crushed in puree. MAKE SURE PT IS FULLY ALERT BEFORE PROVIDING PO MEDS
Oral Care:
Meticulous oral hygiene at least 3-4 times daily to remove biofilm from oral cavity
Follow-up recommendations include:
Skilled Speech Therapy for direct swallowing treatment 2-3 times per week for a total of 2-3 sessions.
Dysphagia treatment techniques will include:
Ongoing swallow eval in tx
Recommended referral/consultations include:
N/A

Results/Recommendations Discussed with, or copies sent to:
Patient, Family/caregiver, Ordering Physician and Nurse/Nursing staff

FUNCTIONAL DEFICIT: Swallowing: 4 out of 7

Patient / Family Education:
Patient / Family participated in goal setting: Yes
Education: With patient completed
With family/caregiver completed
With staff completed

Encounter Problems

Encounter Problems (Active)

SWALLOWING

Dates: Start: 01/15/24

LTG-Safe swallow function

Dates: Start: 01/15/24 Expected End: 01/29/24
Description: LTG-Patient will establish safe swallow function for management of own secretions/po trials with 100% accuracy

STG-Tolerate P.O. therapeutic trials

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Other Orders (group 12 of 12) (continued)

Dates: Start: 01/15/24 Expected End: 01/29/24
Description: STG-Patient will tolerate P.O. therapeutic trials without s/s aspiration with 90% accuracy

Thank you for allowing Speech Pathology Services to participate in the care of your patient. If you have questions or concerns, please call vocera by name.

Speech-Language Pathologist: Emily Gray, CCC-SLP

Chart Correction Addendum: Patient submitted a Request for Amendment of Health Information. Upon review of the chart, a mistake was discovered concerning the location where the patient's injury occurred. According to the Emergency Medical Services record, the patient was not at his place of residence when the injury occurred; therefore, “cleaning his gutters” was corrected to “cleaning gutters” in the Referral and History.
Emily Anne Gray
9/4/24

Pre-procedure diagnoses:
Oropharyngeal dysphagia
Post-procedure diagnoses:
Oropharyngeal dysphagia
Acknowledged by
Kimbrough, Mary K, MD on 09/04/24 1110
Kindy, Erin, APRN, CNP on 01/30/25 1612

Clinical Swallow Eval and Treat Resulted: 01/15/24 1126, Result status: Final result

Ordering provider: Kindy, Erin, APRN, CNP 01/14/24 0759 Order status: Completed
Filed by: Gray, Emily, CCC-SLP 01/15/24 1142
Narrative:
Gray, Emily, CCC-SLP 1/15/2024 11:42 AM
SPEECH-LANGUAGE PATHOLOGY:
CLINICAL SWALLOW EVALUATION
Pt seen in hospital room/bedside for swallowing procedure. The Speech-Language Pathologist wore the following PPE: gloves and surgical mask. At the time of this procedure, the patient's COVID-19 status was not tested.

Patient Name: Sean Patrick Lynn
Date of Birth: 6/24/1990
MRN: 004120303
Date of Evaluation: 1/15/2024
SLP Eval Start Time: 0850
SLP Eval Stop Time: 0910

Referral and History:
This 33 y.o. male was referred for a clinical dysphagia exam by Erin Kindy, APRN secondary to fall from 30 feet resulting in TBI, facial fxs, and skull fxs. Informally, pt appears to be ~RLA IV.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Other Orders (group 12 of 12) (continued)

Pt's may have some expressive and language deficits, but it is difficult to fully assess. Pt has varying degrees of alertness with moments of somnolence then very active/restless. Mother present at bedside. Pt was unable to answer orientation questions or other intake questions. He was unable to complete oral hygiene; clinician cleansed oral cavity.

Per Dr. Arensberg 1/13/24: "HISTORY OF MECHANISM OF INJURY: Fall from 30 feet
Activation Level: Level 2 Trauma Team Activation
Date of Injury: 1/13/2024
Time of Injury- 1630
35 M 35 ft ladder. Pt was cleaning his gutters and fell off his ladder. + LOC. On arrival is altered. On 15L nonrebreather. Unknown PMH. Motor function is decreased and there is blood present within the R ear canal. Dried blood in BL nares and externally. R Superior periorbital hematoma without lacerations. He is confused, does not answer questions, makes noise.
SCENE INFORMATION
Scene Blood Pressure: 120/70
LOC: Yes
Hemodynamically: stable
Intubated: No
Transport: EMS
Injuries
- SAH, SDH
- Nasal fractures
- Basilar skull fracture, R parietal and temporal
- Potential blunt aortic root injury
- R lamina per pre she fracture with orbital fat herniation"

Past Medical History: History reviewed. No pertinent past medical history.
Past Surgical History: History reviewed. No pertinent surgical history.

Onset date of symptoms: 1/13/24
Consent for intervention given by: Patient

Prior Level of Swallowing Function: unable to assess

Pertinent Information:
Respiratory Status: Oxygen Delivery: Room air
CXR results 1/13/24: "Mild bibasilar atelectasis. No large pneumothorax."

Level of Alertness: Alert only with cues and Lethargic

Behavioral/Cognition: Restless, impulsive, cognitive-communication deficits

Current Diet: NPO: except ice chips

Ability to Manage Secretions: {Appears adequate

Dentition/ oral hygiene: Unable to adequately assess

Pain

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Other Orders (group 12 of 12) (continued)

Current Visit Pain: 0/10

Patient Positioning: Upright in bed

Vision for feeding: Unable to assess

Barriers to Learning: Cognition

Oral Mechanism Examination:
Pt was unable to participate in an oral motor exam. Informally, no impairments with lingual and labial strength and ROM.

Vocal Quality-Cranial Nerve X (Vagus Nerve):
Phonation of /a/ for several seconds (strong/loud): Unable to complete MPT; subjectively no voice abnormalities detected when pt offered speechPotential for Expectorating Material:
Cough: Unable to assess
Throat Clear: Unable to assess

Results of Swallow Examination:
SLP cleansed oral cavity with toothbrush and toothpaste. Pt was unable to swish and spit water to remove toothpaste from oral cavity; pt swallowed water instead. SLP adhered to ENT and ophthalmology no straw recs.
Various liquid/food consistencies were presented including: pureed, thin liquid and regular solid via spoon and cup with the following results:
Oral phase:
Active acceptance of bolus.
Adequate labial seal with spoon and cup edge without anterior loss of bolus.
Unremarkable post-swallow oral residue.
Pharyngeal phase:
Laryngeal elevation present up on palpation.
No subtle or overt s/s of aspiration with any other trials/consistencies.
Vocal quality remained clear without any changes in respiratory status.

Compensations Used during study/ Response:
None

Clinical Impressions:
Patient Sean Patrick Lynn presents with suspected acute mild oropharyngeal dysphagia, mostly due to cognitive and behavioral factors related to TBI. Pt likely will be impulsive and will have varying degrees of alertness. A full liquid diet is recommended, but pt should only be fed if pt is fully alert and participating. Pt's risk of aspiration is elevated; cognitive status will be the biggest factor for aspiration risk. .

Prognosis is good.

Recommendations:
Recommended Diet: Full liquid diet (IDDSI 0), then subsequently upgrade diet per SLP recs.
Swallowing/Feeding Techniques:
Sit upright with PO intake

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Other Orders (group 12 of 12) (continued)

Oral hygiene before meals
Small bites and sips
Eliminate distractions during meals
NO STRAWS (per ENT and ophtho)
Patient Positioning:
Upright in chair
Upright in bed
Mealtime Set-Up Instructions:
Needs non-distracting environment (turn off TV, limit visitors, limit talking)
Remove straw
Check that food is consistent with diet ordered
Supervision with Meals:
1:1 Constant supervision, do not leave patient alone with food
Eating only with trained medical staff or family
Medication Route:
One at a time with thin liquids or crushed in puree. MAKE SURE PT IS FULLY ALERT BEFORE PROVIDING PO MEDS
Oral Care:
Meticulous oral hygiene at least 3-4 times daily to remove biofilm from oral cavity
Follow-up recommendations include:
Skilled Speech Therapy for direct swallowing treatment 2-3 times per week for a total of 2-3 sessions.
Dysphagia treatment techniques will include:
Ongoing swallow eval in tx
Recommended referral/consultations include:
N/A

OT Therapy Scheduling Information

Row Name	01/17/24 1500
OT Therapy Scheduling Information	
OT Pertinent Info Note	Fall from ladder, facial/skull fxs; TBI -AB at 01/17/24 1508
OT Discharge Disposition Recommendations	Acute Rehab for TBI -AB at 01/17/24 1508
OT Equipment Recommendations	defer to post-acute facility -AB at 01/17/24 1508
OT Weekend Priority	2+ -AB at 01/17/24 1508
OT Patient Category	Trauma -AB at 01/17/24 1508
OT Goal Due Date	01/31/24 -AB at 01/17/24 1508
OT Therapy Frequency	3-5 times/week -AB at 01/17/24 1606
OT Eval Date	01/17/24 -AB at 01/17/24 1508
OT Eval Start Time	1405 -AB at 01/17/24 1508
OT Eval Stop Time	1413 -AB at 01/17/24 1508
OT Eval Time Calculation (min)	8 min -AB at 01/17/24 1508

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Flowsheets (group 6 of 7) (continued)

OT Last Treatment Date	01/17/24 -AB at 01/17/24 1508

AM-PAC Daily Activity

On & Off LOWER body clothing	A lot -AB at 01/17/24 1508
Bathing (washing, rinsing, drying)	A Little -AB at 01/17/24 1508
Toileting (toilet, bedpan or urinal}	A little -AB at 01/17/24 1508
On & Off UPPER body clothing	A little -AB at 01/17/24 1508
Personal grooming such as brushing teeth	A little -AB at 01/17/24 1508
Eating meals	None -AB at 01/17/24 1508
AMPAC Daily Activity Raw Score (of 24)	18 points -AB at 01/17/24 1508
AMPAC Percentage of Limitation	46.65% -AB at 01/17/24 1508

OT Evaluation

$ OT Evaluation	OT EVAL Moderate Complexity -AB at 01/17/24 1508

Pain Reassessment

Row Name	01/13/24 2039

Pain Assessment

Pain Assessment Scale	Unable to Assess - CW at 01/13/24 2039

Patient Belongings

Row Name	01/14/24 1200

Patient Belongings

Patient/Family informed of Valuables Policy	Yes -JL at 01/14/24 1213

Patient Belongings at Bedside

Belongings at Bedside	None see note; belongings sent home 1/14 -JL at 01/14/24 1213

Patient Belongings Sent Home

Belongings Sent Home	Clothing;Electronic device wallet, phone, shirt, jacket, jeans, underwear, socks, belt - JL at 01/14/24 1213

Patient Belongings Sent to Safe

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan

Active

Problem: Alteration in Ventilation - Critical Care

Dates: Start: 01/14/24
Disciplines: Interdisciplinary

Goal: Achieves optimal ventilation and oxygenation - Critical Care

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing
01/25/24 2012	Sargent, Jackson, RN	Progressing
01/24/24 1949	Lloyd, Noah, RN	Progressing
01/23/24 1936	Lloyd, Noah, RN	Progressing

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Assess pulmonary status

Dates: Start: 01/14/24

Intervention: Assess for changes in respiratory status

Dates: Start: 01/14/24

Intervention: Assess for changes in mentation and behavior

Dates: Start: 01/14/24

Intervention: Administer oxygen supplementation based on provider orders

Dates: Start: 01/14/24

Intervention: Assess oxygen saturation or ABGs as ordered

Dates: Start: 01/14/24

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Intervention: Encourage broncho-pulmonary hygiene including cough, deep breathe, incentive spirometry

Dates: Start: 01/14/24

Intervention: Provide actions to maintain patent airway

Dates: Start: 01/14/24

Goal: Oral health is maintained or improved

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing

01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Perform oral care with toothette swab (as needed per policy)

Dates: Start: 01/14/24

Intervention: Brush teeth (per policy)

Dates: Start: 01/14/24

Intervention: Apply water based moisturizer to lips (as policy/as needed)

Dates: Start: 01/14/24

Intervention: Suction oral pharynx (as needed, Q2, PRN per policy)

Dates: Start: 01/14/24

Problem: Alteration in cardiac output

Dates: Start: 01/14/24
Disciplines: Interdisciplinary

Goal: Improve and maintain optimal cardiac output and hemodynamic stability

Dates: Start: 01/14/24 Expected End: 01/31/24
Description:
Disciplines: Interdisciplinary

Outcomes

01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Assess signs and symptoms of cardiac arrhythmias

Dates: Start: 01/14/24

Intervention: Assess cardiovascular status

Dates: Start: 01/14/24

Intervention: Monitor diagnostic test results

Dates: Start: 01/14/24

Intervention: Provide scheduling of activities to allow for periods of rest

Dates: Start: 01/14/24

Intervention: Monitor vital signs

Dates: Start: 01/14/24

Intervention: Observe for signs and symptoms of excessive bleeding or fluid loss

Dates: Start: 01/14/24

Intervention: Observe for signs of heart failure

Dates: Start: 01/14/24

Intervention: Monitor hemodynamic parameters as ordered (CVP, PAP, PAWP, and ICP)

Dates: Start: 01/14/24

Goal: Patient/family will verbalize via teach back method the signs and symptoms to report to health care provider

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Intervention: Discuss signs and symptoms to report to health care provider

Dates: Start: 01/14/24

Intervention: Instruct to immediately report any chest discomfort or pain

Dates: Start: 01/14/24

Goal: Patient/family will verbalize via teach back method knowledge of prescribed therapeutic regimen

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Discuss activity level

Dates: Start: 01/14/24

Intervention: Discuss information regarding the therapeutic regimen

Dates: Start: 01/14/24

Intervention: Discuss prescribed diet

Dates: Start: 01/14/24

Intervention: Evaluate ability to carry out health-promoting plan

Dates: Start: 01/14/24

Problem: Alteration in comfort: Pain

Dates: Start: 01/14/24
Disciplines: Interdisciplinary

Goal: Patient who is able to participate in answering questions will report that their pain is managed at an acceptable level to them

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Review history of on-going/previous pain experiences and previously used methods to control pain

Dates: Start: 01/14/24

Intervention: Elicit what was/was not effective

Dates: Start: 01/14/24

Intervention: Use systematic approach to manage pain

Dates: Start: 01/14/24
Description:
a. Thorough pain history
b. Self-report of pain using appropriate scale for the patient (typically 0-10 scale)
c. Family report of pain
d. Behavioral indicators for pain
e. Physiological indicators for pain
f. Use of non-pharmacological methods to augment pain control
g. Medicate with analgesics as ordered

Intervention: Assess and document efficacy of analgesics and other pain control methods/notify physician for unmanaged pain

Dates: Start: 01/14/24

Intervention: Assess GI function during administration of opioids, consider obtaining orders for constipation management/prevention

Dates: Start: 01/14/24

Intervention: Anticipate painful procedures/situations and obtain orders for pain control if indicated

Dates: Start: 01/14/24

Goal: Patient who is unable to participate in answering questions will have appropriate assessment and management of pain

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Review history of on-going/previous pain experiences and previously used methods to control pain (if significant others available)

Dates: Start: 01/14/24

Intervention: Elicit what was/was not effective (if significant others available)

Dates: Start: 01/14/24

Intervention: Use systematic approach to manage pain

Dates: Start: 01/14/24
Description:
a. Thorough pain history (if significant others available)
b. Assessment of pain using facility approved method (noncommunicative, ICU)
c. Family report of pain
d. Behavioral indicators for pain
e. Physiological indicators for pain
f. Medicate with analgesics as ordered

Intervention: Assess and document efficacy of analgesics and other pain control methods/notify physician for unmanaged pain

Dates: Start: 01/14/24

Intervention: Assess GI function during administration of opioids, consider obtaining orders for constipation management/prevention

Dates: Start: 01/14/24

Intervention: Anticipate painful procedures/situations and obtain orders for pain control if indicated

Dates: Start: 01/14/24

Goal: Patient and/or family will verbalize through teach back method understanding of causes of pain, effective treatment modalities: how to take pain medication, side effects, management of pain medications, and when to notify provider or nurse regarding pain

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Review with patient their right to adequate pain management

Dates: Start: 01/14/24

Intervention: Review with patient the importance of pain management

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Dates: Start: 01/14/24

Intervention: Review the patient's and/or families' role in pain assessment and management

Dates: Start: 01/14/24

Intervention: Review with the patient and/or family their pain management options/plan and limitations

Dates: Start: 01/14/24

Intervention: Review with the patient possible side effects and management

Dates: Start: 01/14/24

Intervention: Review with the patient information to reduce barriers of effective pain management

Dates: Start: 01/14/24

Problem: Alteration in coping: anxiety or other psychosocial/spirit

Dates: Start: 01/14/24
Disciplines: Interdisciplinary

Goal: Patient will demonstrate effective coping strategies and ability to effectively weigh alternatives and participate in decision-making related to treatment and care

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing
01/25/24 2012	Sargent, Jackson, RN	Progressing
01/24/24 1949	Lloyd, Noah, RN	Progressing
01/23/24 1936	Lloyd, Noah, RN	Progressing
01/22/24 0752	Gray, Tyler, RN	Progressing
01/18/24 1124	Sclimenti, Hannah, RN	Progressing
01/17/24 2247	Roberts, Brenda, RN	Progressing

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Assist patient/family to identify coping skills, available support systems and cultural and spiritual values

Dates: Start: 01/14/24

Intervention: Provide emotional support, including active listening and acknowledgement of concerns of patient and caregivers

Dates: Start: 01/14/24

Intervention: Reduce environmental stimuli, as able

Dates: Start: 01/14/24

Intervention: Assess for spiritual pain/suffering and initiate Chaplain consult as needed

Dates: Start: 01/14/24

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Intervention: Determine when there are differences between patient's view, family's view, and healthcare provider's view of condition

Dates: Start: 01/14/24

Intervention: Facilitate patient and family articulation of goals for care

Dates: Start: 01/14/24

Intervention: Help patient and family identify pros/cons of alternative solutions

Dates: Start: 01/14/24

Intervention: Respect patient/family right to receive or not to receive information

Dates: Start: 01/14/24

Intervention: Serve as a liaison between patient and family and health care team

Dates: Start: 01/14/24

Intervention: Initiate Consults from Ethics, Palliative Care or initiate Family Care Conference as is appropriate

Dates: Start: 01/14/24

Goal: Patient will demonstrate the ability to refrain from verbally or physically hostile, aggressive, and/or threatening behaviors.

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing
01/25/24 2012	Sargent, Jackson, RN	Progressing
01/24/24 1949	Lloyd, Noah, RN	Progressing
01/23/24 1936	Lloyd, Noah, RN	Progressing
01/22/24 0752	Gray, Tyler, RN	Progressing
01/18/24 1124	Sclimenti, Hannah, RN	Progressing
01/17/24 2247	Roberts, Brenda, RN	Progressing
01/17/24 1403	Brown, Cejae, RN	Progressing
01/16/24 2115	McClure, Tyree, RN	Progressing
01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Address disruptive behavior when first occurs

Dates: Start: 01/14/24

Intervention: Identify/define triggers with patient/family and measures to reduce triggers

Dates: Start: 01/14/24

Intervention: Facilitate joint decision-making with patient/family using a shared, problem-solving approach

Dates: Start: 01/14/24

Intervention: Identify situational/environmental factors and triggers such as, but not limited to, noise, visitors, medications, and attempt to eliminate or modify

Dates: Start: 01/14/24

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Intervention: Clarify & Answer questions to the best of my knowledge

Dates: Start: 01/14/24

Intervention: Bundle care to minimize amount of time spent in patient.s room

Dates: Start: 01/14/24

Intervention: Consider changing the process to provide care (i.e., bathing the patient in bed rather than assisting to the shower, reduction of VS frequency, or intrusive behaviors to the lowest medically appropriate frequency)

Dates: Start: 01/14/24

Intervention: Ensure room is free from safety hazards (i.e., objects that could become weapons). Consider the use of plastic utensils, Styrofoam plates/cups.

Dates: Start: 01/14/24

Intervention: Provide "care in pairs" for enhanced safety, as needed

Dates: Start: 01/14/24

Intervention: Ensure a safe distance from the patient (one leg length) while determining if it is a safe time to provide care

Dates: Start: 01/14/24

Intervention: Maintain clear, easy way to exit the room quickly

Dates: Start: 01/14/24

Intervention: Notify other staff (nurse, social worker, MD, Police) who might help resolve agitation

Dates: Start: 01/14/24

Intervention: Set limits and establish professional boundaries with clear, mutual expectations

Dates: Start: 01/14/24

Intervention: Demonstrate supportive body language (avoid threatening gestures such as finger-pointing or crossed arms)

Dates: Start: 01/14/24

Intervention: Respect personal space

Dates: Start: 01/14/24

Intervention: Approach with side stance

Dates: Start: 01/14/24

Intervention: Avoid argumentative, defensive, and/or contradictory behaviors and conversations

Dates: Start: 01/14/24

Intervention: Avoid false promises

Dates: Start: 01/14/24

Intervention: Acknowledge concerns of patient

Dates: Start: 01/14/24

Intervention: Be calm, or at least act calm. Maintain non-threatening eye contact, smile, and keep hands open and visible.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Dates: Start: 01/14/24

Intervention: Use simple language

Dates: Start: 01/14/24

Intervention: Actively listen to patient concerns

Dates: Start: 01/14/24

Intervention: Use of silence for reflection

Dates: Start: 01/14/24

Intervention: Redirection with food, watching tv, reading materials, music, etc.

Dates: Start: 01/14/24

Intervention: PO or IM PRN medication offered

Dates: Start: 01/14/24

Intervention: Initiate care behavioral huddle or Behavioral Emergency Response Team (BERT) for behaviors reaching TIER III level

Dates: Start: 01/14/24

Intervention: Review plan of care with Behavioral Emergency Response Team as needed

Dates: Start: 01/14/24

Problem: Alteration in elimination and nutrition - Gastrointestinal function

Dates: Start: 01/14/24
Disciplines: Interdisciplinary

Goal: Returns to baseline bowel function

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing
01/25/24 2012	Sargent, Jackson, RN	Progressing

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Assess bowel function

Dates: Start: 01/14/24

Intervention: Encourage oral fluids to ensure adequate hydration

Dates: Start: 01/14/24

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Intervention: Encourage mobilization

Dates: Start: 01/14/24

Goal: Nausea and vomiting will be minimized or absent

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing
01/25/24 2012	Sargent, Jackson, RN	Progressing
01/24/24 1949	Lloyd, Noah, RN	Progressing
01/23/24 1936	Lloyd, Noah, RN	Progressing

01/16/24 2115	McClure, Tyree, RN	Progressing
01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Administer IV fluids as ordered to ensure adequate hydration

Dates: Start: 01/14/24

Intervention: Maintain NPO status until nausea and vomiting are resolved

Dates: Start: 01/14/24

Intervention: Slowly advance PO intake as tolerated

Dates: Start: 01/14/24

Intervention: Administer anti-emetics per order and assess for effects

Dates: Start: 01/14/24

Intervention: Encourage distraction methods to minimize nausea (deep breathing, music, imagery, other therapies the patient finds helpful)

Dates: Start: 01/14/24

Goal: Maintains adequate nutritional intake

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing
01/25/24 2012	Sargent, Jackson, RN	Progressing

01/18/24 1124	Sclimenti, Hannah, RN	Progressing

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

01/17/24 2247	Roberts, Brenda, RN	Progressing
01/17/24 1403	Brown, Cejae, RN	Progressing
01/16/24 2115	McClure, Tyree, RN	Progressing
01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Identify factors contributing to decreased intake, treat as appropriate

Dates: Start: 01/14/24

Intervention: Assist with meals as needed

Dates: Start: 01/14/24

Intervention: Monitor I and O, weight, and lab values

Dates: Start: 01/14/24

Intervention: Obtain nutritional consult for appropriate food choices

Dates: Start: 01/14/24

Intervention: Assess swallowing and aspiration risk factors - consult speech therapy as indicated

Dates: Start: 01/14/24

Problem: Alteration in elimination: Genitourinary function

Dates: Start: 01/14/24
Disciplines: Interdisciplinary

Goal: Patient will maintain adequate urinary output without evidence of retention

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Assess patient's ability to void and empty bladder

Dates: Start: 01/14/24

Intervention: Monitor intake and output and perform bladder scan as needed

Dates: Start: 01/14/24

Intervention: Place urinary catheter per order (as indicated)

Dates: Start: 01/14/24

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Intervention: Discuss with LIP medications to alleviate retention as needed

Dates: Start: 01/14/24

Goal: Patient will remain free from catheter associated urinary tract infection

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing
01/25/24 2012	Sargent, Jackson, RN	Progressing
01/24/24 1949	Lloyd, Noah, RN	Progressing
01/23/24 1936	Lloyd, Noah, RN	Progressing

01/17/24 1403	Brown, Cejae, RN	Progressing
01/16/24 2115	McClure, Tyree, RN	Progressing
01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Assessment/inspection of perineal area and insertion site every 12 hours

Dates: Start: 01/14/24

Intervention: Intake and output every 8 hours or as ordered

Dates: Start: 01/14/24

Intervention: Assess and document urine characteristics

Dates: Start: 01/14/24

Intervention: Assess for signs of CAUTI: urgency, frequency, dysuria, confusion, pyrexia, increased WBC, increased CRP, supra-pubic tenderness

Dates: Start: 01/14/24

Intervention: Daily meatal cleansing with soap and water or perineal cleanser

Dates: Start: 01/14/24

Intervention: Maintain catheter securement device

Dates: Start: 01/14/24

Intervention: Place and keep urinary catheter bag below bladder level

Dates: Start: 01/14/24

Intervention: Maintain unobstructed urine flow

Dates: Start: 01/14/24

Intervention: Monitor urine and/or blood specimens results

Dates: Start: 01/14/24

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Intervention: Preparation for removal and toileting practices

Dates: Start: 01/14/24

Goal: Patient/family will verbalize by teach back method understanding of actions to take to optimize genitourinary function

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Discuss use of urine containment devices (urinal, toilet hats) and need for accurate recording of output

Dates: Start: 01/14/24

Intervention: Discuss need for appropriate cleanliness

Dates: Start: 01/14/24

Intervention: Discuss need for timely removal of urinary catheter (as indicated)

Dates: Start: 01/14/24

Problem: Alteration in fluid volume: Excess

Dates: Start: 01/14/24
Disciplines: Interdisciplinary

Goal: Signs and symptoms of fluid volume excess will stabilize

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

01/14/24 0933 Langston, Jacob, RN Progressing

Intervention: Monitor intake and output

Dates: Start: 01/14/24

Intervention: Weigh patient daily at approximately the same time, report 2kg/24 hours for adults or as ordered

Dates: Start: 01/14/24

Intervention: Monitor for cardiovascular changes to include hypertension, S3, and edema

Dates: Start: 01/14/24

Intervention: Monitor labs and assess patient for signs and symptoms of electrolyte imbalances

Dates: Start: 01/14/24

Intervention: Monitor vital signs

Dates: Start: 01/14/24

Intervention: Assess mental status/level of consciousness

Dates: Start: 01/14/24

Intervention: Restrict fluid as ordered

Dates: Start: 01/14/24

Intervention: Administer IV medications slowly in the smallest volume possible. Consult with pharmacy as appropriate

Dates: Start: 01/14/24

Intervention: Monitor for pulmonary changes to include: pink frothy sputum, shortness of breath, or adventitious breath sounds

Dates: Start: 01/14/24

Intervention: Assess hemodynamic parameters (CVP, PAP, PAWP, and ICP > 20) as ordered

Dates: Start: 01/14/24

Goal: Patient will verbalize through teach back method an understanding of treatment, potential side effects and proposed outcomes of treatment

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Instruct patient on fluid and nutrition restrictions as appropriate

Dates: Start: 01/14/24

Intervention: Purpose of procedures and tests

Dates: Start: 01/14/24

Intervention: Signs and symptoms of fluid volume excess; edema, shortness of breath, pink frothy sputum, increased weight of 2lbs/24hrs

Dates: Start: 01/14/24

Intervention: Purpose of accurate intake and output/use of collection and measurement devices

Dates: Start: 01/14/24

Problem: Alteration in fluid volume: Deficit

Dates: Start: 01/14/24
Disciplines: Interdisciplinary

Goal: Signs and symptoms of dehydration will stabilize

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Monitor labs and assess patient for signs and symptoms of electrolyte imbalances/fluid volume deficit

Dates: Start: 01/14/24

Intervention: Administer electrolyte replacement as ordered

Dates: Start: 01/14/24

Intervention: Monitor response to electrolyte replacements and fluid replacement, including repeat lab results as appropriate

Dates: Start: 01/14/24

Intervention: Monitor intake and output

Dates: Start: 01/14/24

Intervention: Administer intravenous fluids/blood products as ordered

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Dates: Start: 01/14/24

Intervention: Weigh patient daily at approximately same time

Dates: Start: 01/14/24

Intervention: Monitor vital signs especially for increased heart rate and decreased blood pressure

Dates: Start: 01/14/24

Intervention: Assess mental status/level of consciousness

Dates: Start: 01/14/24

Intervention: Monitor urine specific gravity, serum osmolality and serum sodium as indicated or ordered

Dates: Start: 01/14/24

Intervention: Encourage oral intake as appropriate

Dates: Start: 01/14/24

Intervention: Monitor orthostatic blood pressure as ordered

Dates: Start: 01/14/24

Intervention: Monitor for integumentary changes to include decreased skin turgor or dry mucous membranes

Dates: Start: 01/14/24

Intervention: Assess hemodynamic parameters (CVP, PAP, PAWP, and ICP) as ordered

Dates: Start: 01/14/24

Goal: Patient will verbalize through teach back method an understanding of treatment, potential side effects and proposed outcomes of treatment

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Assess for signs and symptoms of bleeding or hemorrhage

Dates: Start: 01/14/24

Intervention: Monitor labs and diagnostic test results

Dates: Start: 01/14/24

Intervention: Administer supportive blood products/factors as ordered and appropriate

Dates: Start: 01/14/24

Intervention: Monitor amount, frequency, and /or characteristics of emesis

Dates: Start: 01/14/24

Intervention: Monitor amount, frequency, and/or characteristics of nasogastric tube drainage

Dates: Start: 01/14/24

Intervention: Monitor amount and/or characteristics of stool

Dates: Start: 01/14/24

Intervention: Monitor amount and/or characteristics of wound drainage

Dates: Start: 01/14/24

Intervention: Monitor blood loss

Dates: Start: 01/14/24

Intervention: Monitor vital signs and/or hemodynamic parameters as ordered (CVP,)

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Dates: Start: 01/14/24

Goal: Patient/family verbalize via teachback method understanding of bleeding risk and actions to decrease risk

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing
01/26/24 1933	Sargent, Jackson, RN	Progressing

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Discuss reasons for lab and diagnostic tests

Dates: Start: 01/14/24

Intervention: Discuss importance of monitoring potential sources of bleeding (emesis, drainage, stool)

Dates: Start: 01/14/24

Intervention: Discuss need to move slowly and carefully

Dates: Start: 01/14/24

Intervention: Discuss reasons for blood product transfusions and signs and symptoms of blood transfusion reactions to report

Dates: Start: 01/14/24

Problem: Alteration in mobility: Musculoskeletal function

Dates: Start: 01/14/24
Disciplines: Interdisciplinary

Goal: Patient mobility will return to safest and most optimal level of function

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Assess patient stability and activity tolerance for standing, transferring and ambulating w/ or w/o assistive devices

Dates: Start: 01/14/24

Intervention: Assist with transfers and ambulation using safe patient handling equipment as needed

Dates: Start: 01/14/24

Intervention: Ensure adequate protection for wounds/incisions during mobilization

Dates: Start: 01/14/24

Intervention: Obtain PT/OT consults as needed

Dates: Start: 01/14/24

Intervention: Assess patient's ADL deficits and provide assistive devices as needed

Dates: Start: 01/14/24

Goal: Patient will maintain proper alignment and circulation of affected body part

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome

01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Support and protect limb and body alignment per provider's orders

Dates: Start: 01/14/24

Intervention: Instruct and reinforce with patient and family use of appropriate assistive device and precautions (e.g. spinal or hip dislocation precautions)

Dates: Start: 01/14/24

Intervention: Ensure proper limb and body positioning in bed with patients in skeletal or Buck's traction.

Dates: Start: 01/14/24

Intervention: Notify orthopedic technician for assistance with traction or positioning as indicated

Dates: Start: 01/14/24

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Intervention: Assess neurovascular status and skin integrity of affected body part

Dates: Start: 01/14/24

Intervention: VTE prophylaxis as ordered

Dates: Start: 01/14/24

Intervention: Perform pin site care to patients with skeletal traction

Dates: Start: 01/14/24

Intervention: Assess for signs and symptoms of compartment syndrome as indicated and notify physician if present

Dates: Start: 01/14/24

Intervention: Monitor drain site and output as indicated

Dates: Start: 01/14/24

Goal: Patient and/or family will verbalize via teachback method activities to ensure safety and optimum mobility

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

Outcomes

Date/Time	User	Outcome
01/27/24 0705	Fitsimones, James, RN	Progressing

01/15/24 0447	Tipton, Evelyn, RN	Progressing
01/14/24 0933	Langston, Jacob, RN	Progressing

Intervention: Discuss ordered activity level

Dates: Start: 01/14/24

Intervention: Discuss advancing activity level and self-care

Dates: Start: 01/14/24

Intervention: Discuss safe use of assistive devices as indicated

Dates: Start: 01/14/24

Problem: Alteration in neurosensory function

Dates: Start: 01/14/24
Disciplines: Interdisciplinary

Goal: Achieves stable or improved neurological status

Dates: Start: 01/14/24 Expected End: 01/31/24
Disciplines: Interdisciplinary

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Intervention: Upon admission/transfer to a unit, two RNs should complete a head to toe skin assessment. Any pressure injuries noted should be documented individually. Notify physician and WOCN team. For all Stage II pressure injuries, notify the WOCN and MD.

Dates: Start: 01/14/24

Intervention: Determine risk for Pressure Injury (PI) using the Braden Scale upon admission, each shift, with any change in the patient's condition, with any patient transfer, or with discovery of a pressure injury.

Dates: Start: 01/14/24

Intervention: For other wounds noted such as skin tears, abrasions, lacerations, obtain physician orders for wound care. Each wound should be documented individually.

Dates: Start: 01/14/24

Intervention: Evaluate Specialty bed algorithm with charge nurse to ensure patient does not need a specialty bed or surface. EXCEPTION:Any patient on spinal precautions or Multiple Myeloma patients MUST BE CLEARED BY MD before ordering.

Dates: Start: 01/14/24

Intervention: Avoid positioning on an area of redness

Dates: Start: 01/14/24

Intervention: Keep skin clean and dry

Dates: Start: 01/14/24

Intervention: Assess moisture (sweat, drainage, and incontinence)

Dates: Start: 01/14/24

Intervention: Do not massage or vigorously rub at-risk skin

Dates: Start: 01/14/24

Intervention: Avoid positioning on medical devices or other foreign objects

Dates: Start: 01/14/24

Intervention: Limit head of bed elevation to 30° for patients on bedrest

Dates: Start: 01/14/24

Intervention: Educate patient and family on their risks for pressure injury and how to prevent them

Dates: Start: 01/14/24

Intervention: Activate care plan sections corresponding to any item on the Braden Scale scoring 2 or less.

Dates: Start: 01/14/24

Problem: OT Long Term Goals

Dates: Start: 01/17/24
Disciplines: OT

Goal: LTG-ADL MET

Dates: Start: 01/17/24 Expected End: 01/31/24
Description: LTG-Patient will perform ADL MET at level 2 - Sitting: self-bathing, shaving, grooming, dressing;

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

unlimited sitting; ambulation at a slow pace in room as tolerated.
Disciplines: OT

Goal: LTG-Dynamic standing balance

Dates: Start: 01/17/24 Expected End: 01/31/24
Description: LTG-Patient will increase dynamic standing balance to supervision with LRD.
Disciplines: OT

Goal: LTG -HEP

Dates: Start: 01/17/24 Expected End: 01/31/24
Description: Patient/Caregiver to perform HEP with independence
Disciplines: OT

Goal: OT Misc Goal

Dates: Start: 01/17/24 Expected End: 01/31/24
Description: Patient will be oriented x 4 without cue.
Disciplines: OT

Goal: LTG-Follow instructions

Dates: Start: 01/17/24 Expected End: 01/31/24
Description: LTG-Patient will be able to follow multi-step instructions 100% of the time without cue.
Disciplines: OT

Problem: PT Long Term Goals

Dates: Start: 01/17/24
Disciplines: PT

Goal: LTG-Transfers

Dates: Start: 01/17/24 Expected End: 01/29/24
Description: LTG-Patient to perform all transfers independently.
Disciplines: PT

Goal: LTG-Ambulate

Dates: Start: 01/17/24 Expected End: 01/29/24
Description: LTG-Patient to ambulate independently 500'+.
Disciplines: PT

Problem: Restraints

Dates: Start: 01/15/24
Description: SUPPORTIVE DATA: Physical restraints are any method, device, material, or equipment attached or adjacent to the patient's body which the patient cannot remove easily and which restricts freedom of movement or normal access to ones body. An order for physical restraints is required and must be renewed every 24 hours.
Chemical Restraints: A drug or medication when it is used as a restriction to manage the patient's behavior or restrict the patient's freedom of movement and is not a standard treatment or dosage for the patient's condition. REFERENCES:
Arkansas Department of Health, Rules and Regulations for Hospitals and Related Institutions in Arkansas, 2007, Section 13: Restraints. RULES AND REGULATIONS FOR HOSPITALS AND RELATED INSTITUTIONS IN ARKANSAS 2007, Section 13: Restraints, State Operations Manual, Appendix A – Survey Protocol, Regulations and Interpretive Guidelines for Hospitals (Rev. 1, 05/21/04) 482.13 (e) and 482.13 (f).

Problem: SPOKEN LANGUAGE COMPREHENSION

Dates: Start: 01/18/24
Disciplines: Interdisciplinary, SLP

Goal: LTG-Improve auditory comprehension for simple level conversation

Dates: Start: 01/18/24 Expected End: 02/01/24
Description: LTG-Patient will improve Auditory Comprehension for simple level conversation with 70% accuracy
Disciplines: SLP

Goal: STG-Will answer basic yes/no questions

Dates: Start: 01/18/24 Expected End: 02/01/24
Description: STG-Patient will answer basic yes/no questions with 70% accuracy
Disciplines: SLP

Goal: STG-Follow 1 step commands

Dates: Start: 01/18/24 Expected End: 02/01/24
Description: STG-Patient will follow 1 step commands with 70% accuracy
Disciplines: SLP

Problem: SPOKEN LANGUAGE EXPRESSION

Dates: Start: 01/18/24
Disciplines: Interdisciplinary, SLP

Goal: LTG-Express basic wants and needs

Dates: Start: 01/18/24 Expected End: 02/01/24
Description: LTG-Patient will express basic wants and needs with 70% accuracy
Disciplines: SLP

Goal: STG-Will produce automatic speech tasks

Dates: Start: 01/18/24 Expected End: 02/01/24
Description: STG-Patient will produce automatic speech tasks with 70% accuracy
Disciplines: SLP

Goal: STG-Will repeat words

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Care Plan (continued)

Dates: Start: 01/18/24 Expected End: 02/01/24
Description: STG-Patient will repeat words with 70% accuracy
Disciplines: SLP

Goal: STG-Will complete confrontation naming

Dates: Start: 01/18/24 Expected End: 02/01/24
Description: STG-Patient will complete confrontation naming with 70% accuracy
Disciplines: SLP

Problem: SWALLOWING

Dates: Start: 01/15/24
Disciplines: Interdisciplinary, SLP

Goal: LTG-Safe swallow function

Dates: Start: 01/15/24 Expected End: 01/29/24
Description: LTG-Patient will establish safe swallow function for management of own secretions/po trials with 100% accuracy
Disciplines: SLP

Goal: STG-Tolerate P.O. therapeutic trials

Dates: Start: 01/15/24 Expected End: 01/29/24
Description: STG-Patient will tolerate P.O. therapeutic trials without s/s aspiration with 90% accuracy
Disciplines: SLP

Resolved

Problem: PT Long Term Goals

Dates: Start: 01/15/24 Resolved: 01/17/24
Disciplines: PT

Goal: LTG-Bed mobility (Resolved)

Dates: Start: 01/15/24 Expected End: 01/29/24 Resolved: 01/17/24
Description: LTG-Patient will perform bed mobility independently.
Disciplines: PT

Outcomes

Date/Time	User	Outcome
01/17/24 1122	Cathcart, Christopher S, PT	Met

Goal: LTG-Transfers (Resolved)

Dates: Start: 01/15/24 Expected End: 01/29/24 Resolved: 01/17/24
Description: LTG-Patient to perform all transfers with supervision.
Disciplines: PT

Outcomes

Date/Time	User	Outcome
01/17/24 1122	Cathcart, Christopher S, PT	Met

Goal: LTG-Ambulate (Resolved)

Dates: Start: 01/15/24 Expected End: 01/29/24 Resolved: 01/17/24
Description: LTG-Patient to ambulate 250'+ with supervision.

Patient Education

Title: Fall Patient Education ()

Topic: Fall Patient Education - Teaching Points (In Progress)

Point: Instruct/reinforce with patient and family the use of call light for assistance (In Progress)

Description:
Instruct/reinforce with patient and family the use of call light for assistance

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Patient Education (continued)

Learning Progress Summary

Patient	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JS at 1/26/2024 1933
	Nonacceptance, Explanation, Needs Reinforcement by JS at 1/25/2024 2012
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/24/2024 1948
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/23/2024 1936
	Acceptance, Explanation, Verbalizes Understanding, Needs Reinforcement , No Evidence of Learning by CS at 1/20/2024 1017
	Acceptance, Explanation, Needs Reinforcement , No Evidence of Learning by BP at 1/19/2024 1948
	Nonacceptance, Explanation, Verbalizes Understanding, Needs Reinforcement , No Evidence of Learning by CS at 1/19/2024 0722
	Acceptance, Explanation, Needs Reinforcement , No Evidence of Learning by BP at 1/18/2024 2010
	Acceptance, Explanation, No Evidence of Learning by HS at 1/18/2024 1123
	Acceptance, Explanation, Verbalizes Understanding by BR at 1/17/2024 1920
	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Refuses, Explanation, Refused Teaching by ER at 1/16/2024 1450
	Nonacceptance, Explanation, Demonstration, No Evidence of Learning by ET at 1/15/2024 0447
	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JL at 1/14/2024 0933
	Acceptance, Explanation, Needs Reinforcement , No Evidence of Learning by LW at 1/14/2024 0055

Point: Instruct patient/ family to call staff for assistance when getting out of bed. (In Progress)

Description:
Instruct patient/ family to call staff for assistance when getting out of bed.

Learning Progress Summary

Patient	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JS at 1/26/2024 1933
	Nonacceptance, Explanation, Needs Reinforcement by JS at 1/25/2024 2012
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/24/2024 1948
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/23/2024 1936
	Acceptance, Explanation, Verbalizes Understanding, Needs Reinforcement , No Evidence of Learning by CS at 1/20/2024 1017
	Nonacceptance, Explanation, Verbalizes Understanding, Needs Reinforcement , No Evidence of Learning by CS at 1/19/2024 0722
	Acceptance, Explanation, No Evidence of Learning by HS at 1/18/2024 1123
	Acceptance, Explanation, Verbalizes Understanding by BR at 1/17/2024 1920
	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Refuses, Explanation, Refused Teaching by ER at 1/16/2024 1450
	Nonacceptance, Explanation, Demonstration, No Evidence of Learning by ET at 1/15/2024 0447
	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JL at 1/14/2024 0933
	Acceptance, Explanation, Needs Reinforcement , No Evidence of Learning by LW at 1/14/2024 0055

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Patient Education (continued)

Point: Instruct patient/family to exit bed on their strongest side. (In Progress)

Description:
Instruct patient/family to exit bed on their strongest side.

Learning Progress Summary

Patient	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JS at 1/26/2024 1933
	Nonacceptance, Explanation, Needs Reinforcement by JS at 1/25/2024 2012
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/24/2024 1948
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/23/2024 1936
	Acceptance, Explanation, Verbalizes Understanding, Needs Reinforcement , No Evidence of Learning by CS at 1/20/2024 1017
	Nonacceptance, Explanation, Verbalizes Understanding, Needs Reinforcement , No Evidence of Learning by CS at 1/19/2024 0722
	Acceptance, Explanation, No Evidence of Learning by HS at 1/18/2024 1123
	Acceptance, Explanation, Verbalizes Understanding by BR at 1/17/2024 1920
	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Refuses, Explanation, Refused Teaching by ER at 1/16/2024 1450
	Nonacceptance, Explanation, Demonstration, No Evidence of Learning by ET at 1/15/2024 0447
	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JL at 1/14/2024 0933
	Acceptance, Explanation, Needs Reinforcement , No Evidence of Learning by LW at 1/14/2024 0055

Point: Review medications daily with patient and family and educate on side effects. (In Progress)

Description:
Review medications daily with patient and family and educate on side effects.

Learning Progress Summary

Patient	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JS at 1/26/2024 1933
	Nonacceptance, Explanation, Needs Reinforcement by JS at 1/25/2024 2012
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/24/2024 1948
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/23/2024 1936
	Acceptance, Explanation, Verbalizes Understanding, Needs Reinforcement , No Evidence of Learning by CS at 1/20/2024 1017
	Nonacceptance, Explanation, Verbalizes Understanding, Needs Reinforcement , No Evidence of Learning by CS at 1/19/2024 0722
	Acceptance, Explanation, No Evidence of Learning by HS at 1/18/2024 1123
	Acceptance, Explanation, Verbalizes Understanding by BR at 1/17/2024 1920
	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Refuses, Explanation, Refused Teaching by ER at 1/16/2024 1450
	Nonacceptance, Explanation, Demonstration, No Evidence of Learning by ET at 1/15/2024 0447
	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JL at 1/14/2024 0933
	Acceptance, Explanation, Needs Reinforcement , No Evidence of Learning by LW at 1/14/2024 0055

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Patient Education (continued)

Point: Reinforce falls education with each patient contact (In Progress)

Description:
Reinforce falls education with each patient contact

Learning Progress Summary

Patient	
	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JS at 1/26/2024 1933
	Nonacceptance, Explanation, Needs Reinforcement by JS at 1/25/2024 2012
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/24/2024 1948
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/23/2024 1936
	Acceptance, Explanation, Verbalizes Understanding, Needs Reinforcement , No Evidence of Learning by CS at 1/20/2024 1017
	Nonacceptance, Explanation, Verbalizes Understanding, Needs Reinforcement , No Evidence of Learning by CS at 1/19/2024 0722
	Acceptance, Explanation, No Evidence of Learning by HS at 1/18/2024 1123
	Acceptance, Explanation, Verbalizes Understanding by BR at 1/17/2024 1920
	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Refuses, Explanation, Refused Teaching by ER at 1/16/2024 1450
	Nonacceptance, Explanation, Demonstration, No Evidence of Learning by ET at 1/15/2024 0447
	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JL at 1/14/2024 0933
	Acceptance, Explanation, Needs Reinforcement , No Evidence of Learning by LW at 1/14/2024 0055

Point: Encourage family to stay with patient and instruct to notify staff if/when leaving patient. (In Progress)

Description:
Encourage family to stay with patient and instruct to notify staff if/when leaving patient.

Learning Progress Summary

Patient	
	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JS at 1/26/2024 1933
	Nonacceptance, Explanation, Needs Reinforcement by JS at 1/25/2024 2012
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/24/2024 1948
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/23/2024 1936

Title: OT ()

Topic: OT-General (In Progress)

Point: Discuss the role of OT, Plan of Care, & Goals (In Progress)

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Patient Education (continued)

Description:
Discuss the role of OT, Plan of Care, & Goals

Learning Progress Summary

Patient	Acceptance, Explanation, No Evidence of Learning by AB at 1/17/2024 1514

Point: Instruct in energy conservation tips (Done)

Description:
Instruct in energy conservation tips

Learning Progress Summary

Patient	Acceptance, Explanation, Demonstration, Verbalizes Understanding, Demonstrated Understanding , Needs Reinforcement by AB at 1/17/2024 1514

Point: Instruct in functional transfer training (Done)

Description:
Instruct in functional transfer training

Learning Progress Summary

Patient	Acceptance, Explanation, Demonstration, Verbalizes Understanding, Demonstrated Understanding , Needs Reinforcement by AB at 1/17/2024 1514

Title: PT ()

Topic: PT-General (In Progress)

Point: Discuss the role of PT, Plan of Care, & Goals (In Progress)

Description:
Discuss the role of PT, Plan of Care, & Goals

Learning Progress Summary

Patient	Acceptance, Explanation, Needs Reinforcement by AL at 1/20/2024 2358
	Acceptance, Explanation, No Evidence of Learning by CC at 1/17/2024 1122
	Nonacceptance, Explanation, No Evidence of Learning by CC at 1/15/2024 1009

Point: Instruct in functional transfer activities with appropriate assistive device (In Progress)

Description:
Instruct in functional transfer activities with appropriate assistive device

Learning Progress Summary

Patient	Acceptance, Explanation, Needs Reinforcement by AL at 1/20/2024 2358
	Acceptance, Explanation, No Evidence of Learning by CC at 1/17/2024 1122
	Nonacceptance, Explanation, No Evidence of Learning by CC at 1/15/2024 1009

Point: Instruct in gait activities with appropriate assistive device (In Progress)

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Patient Education (continued)

Description:
Instruct in gait activities with appropriate assistive device

Learning Progress Summary

Patient	Acceptance, Explanation, Needs Reinforcement by AL at 1/20/2024 2358
	Acceptance, Explanation, No Evidence of Learning by CC at 1/17/2024 1122
	Nonacceptance, Explanation, No Evidence of Learning by CC at 1/15/2024 1009

Point: Instruct in safety and fall prevention (In Progress)

Description:
Instruct in safety and fall prevention

Learning Progress Summary

Patient	Acceptance, Explanation, Needs Reinforcement by AL at 1/20/2024 2358
	Acceptance, Explanation, No Evidence of Learning by CC at 1/17/2024 1122
	Nonacceptance, Explanation, No Evidence of Learning by CC at 1/15/2024 1009

Point: Discuss D/C outcomes and equipment needs (In Progress)

Description:
Discuss D/C outcomes and equipment needs

Learning Progress Summary

Patient	Acceptance, Explanation, Needs Reinforcement by AL at 1/20/2024 2358
	Acceptance, Explanation, No Evidence of Learning by CC at 1/17/2024 1122
	Nonacceptance, Explanation, No Evidence of Learning by CC at 1/15/2024 1009

Title: Speech Language Pathology ()

Topic: SLP-Dysphagia (In Progress)

Point: Discuss the role of SLP, Plan of Care, & Goals (In Progress)

Learning Progress Summary

Patient	Acceptance, Explanation, No Evidence of Learning by EG at 1/15/2024 1125
Family	Acceptance, Explanation, Needs Reinforcement by EG at 1/15/2024 1125

Point: Instruct on swallow strategies (In Progress)

Learning Progress Summary

Patient	Acceptance, Explanation, No Evidence of Learning by EG at 1/15/2024 1125
Family	Acceptance, Explanation, Needs Reinforcement by EG at 1/15/2024 1125

Point: Instruct on Aspiration Precautions (In Progress)

Learning Progress Summary

Patient	Acceptance, Explanation, No Evidence of Learning by EG at 1/15/2024 1125
Family	Acceptance, Explanation, Needs Reinforcement by EG at 1/15/2024 1125

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Patient Education (continued)

Topic: SLP-Brain Injury (In Progress)

Point: Discuss the role of SLP, Plan of Care, & Goals (In Progress)

Learning Progress Summary

Patient	Nonacceptance, Explanation, No Evidence of Learning by EG at 1/18/2024 1537

Title: First-Dose Education ()

Points For This Title

Point: guanfacine HCl (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115

Point: sodium,potassium phosphates (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115

Point: potassium chloride (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Nonacceptance, Demonstration, No Evidence of Learning by CR at 1/23/2024 1359

Point: diazepam (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Nonacceptance, Explanation, No Evidence of Learning by CR at 1/24/2024 1330

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Patient Education (continued)

Point: haloperidol lactate (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JL at 1/14/2024 0933

Point: acetaminophen (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JL at 1/14/2024 0933

Point: atropine sulfate (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115

Point: propranolol HCl (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115

Point: carboxymethylcellulose sodium (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Patient Education (continued)

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Acceptance, Explanation, Needs Reinforcement , No Evidence of Learning by LW at 1/14/2024 0055

Point: erythromycin base (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Acceptance, Explanation, Needs Reinforcement , No Evidence of Learning by LW at 1/14/2024 0055

Point: lorazepam (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Acceptance, Explanation, Needs Reinforcement , No Evidence of Learning by LW at 1/14/2024 0055

Point: enoxaparin sodium (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115

Point: 0.9 % sodium chloride (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115

Point: sodium chloride 3 % (In Progress)

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Patient Education (continued)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, No Evidence of Learning by HS at 1/18/2024 1123
	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115

Point: olanzapine (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115

Point: quetiapine fumarate (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115

Point: levetiracetam (In Progress)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, No Evidence of Learning by HS at 1/18/2024 1123
	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115

Point: polyethylene glycol 3350 (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115

Point: ciprofloxacin HCl/dexameth (Done)

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Patient Education (continued)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Acceptance, Explanation, Needs Reinforcement , No Evidence of Learning by LW at 1/14/2024 0055

Point: dexmedetomidine in 0.9 % NaCl (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JL at 1/14/2024 0933

Point: magnesium sulfate in water (Done)

Description:
Instruct learners on name and purpose of medications and possible side effects. If appropriate, include food/drug interactions, reporting of efficacy, and symptoms to report.

Learning Progress Summary

Patient	Acceptance, Explanation, Teach Back , Verbalizes Understanding by TM at 1/16/2024 2115
	Acceptance, Explanation, No Evidence of Learning , Needs Reinforcement by JL at 1/14/2024 0933

Title: Pain Management ()

Topic: Pain Management (In Progress)

Point: Encourage Patient to Monitor Own Pain (In Progress)

Description:
Provide patient with information on the Pain Rating Scale. Explain the rating scale of 0 to 10.

01/13/2024 - ED to Hosp-Admission (Discharged) in H4 - TSICU/CVICU (continued)

Patient Education (continued)

Learning Progress Summary

Patient	Nonacceptance, Explanation, No Evidence of Learning by JF at 1/27/2024 0706
	Acceptance, Explanation, Teach Back by JP at 1/25/2024 0715
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/24/2024 1948
	Nonacceptance, Explanation, No Evidence of Learning by NL at 1/23/2024 1936

COVID Vaccine Scheduling (continued)

Other instructions

Discharge instructions

Pain Management:
Alternate taking Tylenol (acetaminophen) and/or Advil/Motrin (ibuprofen) around the clock for the first few days to have a base layer of pain control.

Activity
If at all possible, have someone with you to help you. Going up stairs is not a problem. Listen to your body and rest when you are tired. Do not lift anything heavier than a gallon of milk, or 10lbs. Do not drive a motor vehicle; operate machinery or power tools while taking pain medications.

Diet
You may resume your at-home diet as directed immediately. Always try to take pain medications with food or milk to prevent nausea.

Follow Up
None necessary

Seek medical attention for a fever of 101.5F or higher (it is not uncommon to have a low-grade fever after surgery), unusual chest pain, or increased work of breathing. Call 911 in an emergency.

You have left against medical advice. You are highly advised to seek medical care immediately and it is felt that you are not medically ready to discharge.

Fall Prevention at Home

How to Prevent Falls at Home

These are some things you can do to keep yourself safe:

Around the House

- Look at the places where you walk in your home. Be sure:
  - There is no furniture in the way

©2023 Epic Systems Corporation

Fall Prevention at Home (continued)

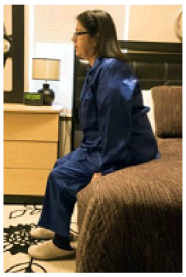
- There are no wires or cords in the way (like those from fans or lamps)

- Remove area rugs, or use non-slip backing.
- Keep floors clean, dry, and clutter-free.
- Place non-skid stickers on bathroom and shower floors.
- Place grab bars in bathroom around toilet and shower.
- Use nightlights to give you light from the bedroom to the bathroom.
- Use handrails, especially in stairways.
- Keep bright lighting in your home.
- Keep rooms cool to reduce dizzy spells.

From Lying Down to Standing Up

Note: If your right side is the strongest, get out of the bed on that side.
Follow these steps to stand up.

1. Sit on the edge of the bed and dangle your feet for a minute before you stand up.
2. Move your ankles up and down to get your blood pumping.
3. Look down (but don't bend down) and place your "nose over your toes" before you stand up.
4. Push off the bed or chair using your arms. Do not use an object to pull up.
5. Wait a minute before you start to walk.



Walking and Moving Around

- Wear shoes that:
  - Fit you well (not too big, not too small)
  - Have firm, non-skid soles
  - Are low-heeled

©2023 Epic Systems Corporation

Fall Prevention at Home (continued)

- Have a secure back around your heel

- If you have a walker, cane, or crutches:
  - Make sure it is in good shape.
  - Use it as your healthcare team asked you to.
- Plan physical activity with help during the day.
- Call for help when getting up and walking if you feel weak or wobbly.
- Take your time turning around to walk another direction.
- Keep items in easy reach so you do not need to bend over or use a stool.
- If you must use a stool, use one with rails. Do not use chairs as step stools.

Taking Your Medicine

- If you take more than one med that makes you sleepy, try to take them at different times. Example: Do not take a sleeping and a pain pill together.

- Talk to your doctor or pharmacist about side effects of any medications (meds) you take. They may want to change the time you take some meds with side effects that increase the risk for falls. For example, ask about:
  - Taking water pills in the morning to decrease bathroom visits at night.
  - Taking medicine that may make you sleepy at night.

Going to the Bathroom

- Go to the bathroom every few hours during the day.
- Use the bathroom before going to bed.
- So you do not get constipated (have hard or irregular poop):
  - Drink plenty of fluids during the day
  - Eat fiber as allowed by your diet
- Do not drink liquids after 8 PM to prevent extra trips to the bathroom during the night.
- Get a raised toilet seat (if needed)
- If you use a bedside toilet, put the seat facing your bed. This keeps you from having to walk around the toilet.
- Have someone stay close to you when going to the bathroom.
- Sit down on the toilet to prevent dizziness.
- Rise slowly from the toilet. Do not lean forward.
- Use grab bars and hand rails to keep you steady. Other items are not strong enough to hold you.
- Pull your pants up over your knees before you stand up. This way, you do not have to bend forward to pull them up while standing.

Other Tips

- Wear your glasses/contacts and hearing aids.
- Use an around-the-neck holder for eyeglasses to keep you from getting up to place and pick up your glasses.

©2023 Epic Systems Corporation

Fall Prevention at Home (continued)

- Have an eye exam every year.
- If you are diabetic, check and keep your blood sugar at safe levels.
- If you have an arm or leg that is paralyzed or numb:
- Keep it bent about halfway, or where it is comfortable.
- This helps with blood flow.

Call your doctor for any of these:

- Pain or loss of feeling in your feet
- Large, thick toenails and corns
- Dizzy spells

Traumatic Brain Injury &/or Spinal Cord Injury

Traumatic Brain Injury &/or Spinal Cord Injury

The Trauma Rehabilitation Call Center is a free resource that's available 24 hours a day, 7 days a week for patients with a spinal cord (SCI) or traumatic brain injury (TBI.) Calls are answered by nurses who apply their experience and the most up to date clinical guidelines to assist callers with a wide variety of concerns.

The Trauma Rehab Call Center may be able to arrange a telemedicine follow-up through the Call Center line for someone having a hardship with traveling to and from Little Rock.

Our website, ATRP.AR.GOV, is a free, frequently updated, and easily navigable wealth of community services and medical information for the TBI or SCI survivor and their family/caregivers. It includes educational information and videos; lists of resources from local, state, and federal agencies; upcoming events and ways to be engaged with others; support group times and locations; etc.

The Trauma Rehabilitation Call Center 855-767-6983.

UAMS CARES

If you feel you or a family member/friend is at risk of suicide please call the National Suicide Prevention Lifeline call, text or chat at 988.

APPOINTMENT CONTACT INFORMATION

To cancel or reschedule an appointment please call the clinic number listed in your clinic appointment.

If you are interested in making a new appointment with a different specialty or service at UAMS please call (501) 686-8000.

APPOINTMENT CONTACT INFORMATION (continued)

Sign up for Text Message Appointment Reminders

To sign up for text message appointment reminders from UAMS, please log into MyChart and make sure your mobile phone number is correct. If you don't have MyChart, you can sign up today using the instructions above or below.

After you log into MyChart , click on the "**Menu**" button. Under "**Account Settings**," click on "**Communication Preferences**."

Under the Contact Information section at the bottom, make sure your mobile phone number is correct. If it is not correct, click "**Edit,**" type in the correct number, and click "**Save Changes.**"

If you are not signed up for text messages from UAMS, click the "**Sign up now**" link in the Communication Preferences section. You can choose the type of information you'd like to receive by text message.

Standard text message rates apply.

UAMS Text Message Reminder Disclaimer

Warning: UAMS does not guarantee information sent or received via text message is secure. There are security risks associated with sending information via text message. For example, an unauthorized person or entity may access or use the information. By requesting that UAMS send you information via text message, you acknowledge you have been warned of and accept such risks.

We Want to Hear from You!

Thank you for choosing UAMS! We would like to hear about your experience. Soon you may receive a survey with questions about your care. Please complete the survey. Your feedback helps us continue to provide the best possible experience for you and other patients and families.

Narrative

Crew arrived on scene with entrance of neighborhood being extremely steep. Crew was able to make access to the front of the home where patient was located. LRFD on scene and patient found on the back side of the house with multilevel and stairs due to the house being built in the hill. Patient was alert to verbal stimuli and oriented to his person with confusion. Bystander explains "I heard a thud and came and found him out by the ladder." Patient found unresponsive with his head lying on a rock and a ladder was partially falling. The ladder was diagonally lying across the porch and a nearby powerline. No signs of electric involvement. Patient was working approximately 35 feet in the air above level of the porch patient was found on. Patient had a ccollar already in place by LRFD. Lung sounds and airway clear. Bleeding controlled at nose with probable facial fractures to the Nose and R orbit. Patient was spinal motion restricted with ccollar to a spine board. With LRFD and crew, patient was extricated up the side of the hill via patient being carried on Long spine board up the steps. Patient smc's remained in tact. Patient secured on the stretcher and then in the unit. Nonrebreather placed at 15LPM on patient. Vitals obtained while Trauma comm report called. Patient transported emergent to UAMS. IV access and EKG performed enroute. Full body assessments completed and UAMS was contacted via radio with report. Upon our arrival, patient was taken inside the ED to Trauma 1. Patient moved onto the facility bed with UAMS staff assistance. Care report given and care transferred. Unit in service. Patient clothes and wallet left with receiving RN in trauma room.

UAMS Medical Center

8. **Consent to Photographs and Recordings:** I consent to photographs and recordings (video, electronic or other media) of me for clinical care, payment and/or healthcare operations. I understand that PRI and certain patient care areas in the Emergency Department are continuously monitored by video recording for the purpose of clinical care and patient safety. Any photographs/recordings will be securely maintained and destroyed in accordance with applicable law and UAMS policies. I understand that I have the right that any photography/recording be stopped at anytime.
9. **Text Messages:** By providing UAMS with my cell phone number and the cell phone numbers of any family and friends, I agree that UAMS can send text messages that may contain my health information. Text messages may include, but are not limited to, reminders of upcoming appointments, prescription refill reminders, my status during a surgery or Emergency Department visit, such as a text message that informs my family, friends and/or others who I choose that I am out of surgery and in a recovery room, treatment plans, and text messages for other similar purposes. UAMS does not guarantee information sent via a text message to a cell phone is secure and encrypted. There are security risks associated with texting information in an unsecure and unencrypted manner, including, but not limited to, an unauthorized person or entity accessing or using the information. I acknowledge and agree I have been warned of and accept such risks.
10. **Release of Information:** I understand my protected health information will be released in accordance with the UAMS Notice of Privacy Practices. I understand that my non-UAMS healthcare providers, such as my primary care physician, will be able to access my UAMS records electronically through the UAMS physician portal that is known as EpicCare Link.
11. **Tobacco Use:** UAMS is a TOBACCO-FREE CAMPUS. I understand that I may not use any tobacco products on campus, including electronic cigarettes (e-cigarettes).
12. **Absence From Unit:** I understand that I must be present in my hospital room to receive prescribed treatments, procedures, and diagnostic services. If I choose to leave the unit, I understand that UAMS is not liable for any harm that might befall me, and I will notify my nurses before leaving. I understand and agree that if I am repeatedly absent from the unit to the extent that it interferes with my care and treatment, I may be discharged against medical advice and my room given to another patient.

I, or my legal representative, have read and agree to the above.

UAMS Medical Center

ADMISSION/CONSENT AGREEMENT

1. **Consent for Medical Treatment:** I consent to inpatient and/or outpatient care and treatment by my physician and other health care providers at UAMS Medical Center (UAMS) and authorize all routine hospital care, services, treatments, examinations and diagnostic procedures as may be ordered by my treating physician(s). I understand that UAMS is a teaching facility where students, residents and other trainees will be involved in my care and treatment under the supervision of a qualified professional, and I consent to the observation and participation of such personnel in my care and treatment. I understand the practice of medicine and surgery is not an exact science, and I certify that no guarantees or assurances have been made as to the results that may be obtained. I understand that I have the right to consent to or refuse any recommended or proposed care, procedure or treatment.
2. **Nursing Care:** UAMS provides general duty nursing care unless additional care is required in special care units. I understand that if I desire continuous patient supervision, I must arrange and pay for this service.
3. **Personal Information:** I certify that the information I have provided is true and accurate to the best of my knowledge. I understand this information is subject to verification with credit agencies, federal and/or state agencies and others as required. I authorize my employer to release to UAMS proof of my income. I agree that UAMS and their collection agency or other authorized designee may contact me on my cell phone, landline, or any other number I provide, directly, through an automated dialing system or through an artificial prerecorded voice system to discuss payment of any unpaid financial obligation I have at UAMS or to receive general information from UAMS, and this consent shall remain valid unless revoked by me or my legal representative.
4. **Valuables:** I understand that UAMS is not liable for the personal belongings or valuables I keep in my possession while in the hospital and hereby release UAMS from any responsibility for loss or damage of such items. I understand that such items should be sent home with family/friends or stored in the hospital safe.
5. **Assignment of Benefits:** In consideration of services rendered, I hereby assign any benefits due to my insurance coverage, for inpatient, outpatient and physician services to UAMS Medical Center. I understand I am financially responsible for all charges not covered including deductibles, co-pays, and co-insurance. This facility has both on-campus and off-campus hospital based departments of UAMS. The services provided at those locations charge a fee separate from and in addition to the professional service. If you are receiving care at a hospital based department of UAMS whether on or off campus, you may incur additional costs that would not have incurred otherwise. After reasonable notice, accounts not paid may be turned over to a collection agency and/or attorney. Attorney fees, the cost of collection and court costs will be the patient's responsibility.
6. **Financial Disclosure:** I understand that my doctor and others that care for me at UAMS may have financial relationships (make money) with other companies. I understand that UAMS may have financial relationships with other companies in the health and medical field. If I want more information about this, I can ask my health care provider or call the UAMS Conflict of Interest office at (501) 686-6447.
7. **Health Information Exchange:** UAMS participates in electronic Health Information Exchange (HIE). I understand that my UAMS health information will be sent to the HIE so it is available to health care providers who participate in my care outside of UAMS. I understand that I may opt out of this service by informing the registrar, but my UAMS health information may still be available to other providers in an emergency situation.

Discharge of Patient from Hospital Against Medical Advice (AMA)

Being about to leave the University of Arkansas for Medical Sciences (UAMS), I, Sean Lynn acknowledge that I understand this action to be against the advice of the attending physician(s) and/or hospital authorities. I assume the risk and accept the consequences of my departure from UAMS at this time, and hereby release all health care providers, including the Hospital, its staff, and physician(s) from any liability for ill effects that may result from discontinuance of treatment.

I have been informed of the risk involved and possible danger to my health that may result from leaving the hospital at this time. I also understand that there may be financial implications for this action should medical coverage be denied.

Sean Lynn
I have requested ~~prescriptions~~ for the medications that stabalized Sean.
I agree to follow the protocol Representative of Patient Sean Lynn is on until receiving medical advice.

This is to certify that I, Laura Lynn Hammett,
as (relationship to patient) Mother
of (Patient's name) Sean Lynn

Insist that he/she be discharged AMA from UAMS without the authorization of the patient's physician(s) and/or Hospital authorities.

I assume the risk and accept the consequences of removing the patient from UAMS at this time, and hereby release all health care providers, including the Hospital, its staff, and physicians, from any liability for ill effects that may result from discontinuance of treatment. I also understand that there may be financial implications for this action should the medical coverage be denied.

Laura Hammett Sean Lynn — Patient or Legal Representative Signature — 1/27/24 Date — 1245 Time

Witness Signature — 1/27/24 Date — 1245 Time

☐ Patient refused to sign this release before leaving.

☐ Patient's representative refused to sign this release before leaving.

I recommend and highly advise you go immediately to another hospital to seek medical attention. I do not think you are medically ready for discharge.

1

IN THE CIRCUIT COURT OF PULASKI, ARKANSAS

SEAN LYNN; and
LAURA HAMMETT — PLAINTIFFS

v. Case No. 60CV-26-216

BOARD OF TRUSTEES of the UNIVERSITY of ARKANSAS, in their official capacity;
et al. — DEFENDANTS

PLAINTIFFS' EXHIBIT 11 – LYNN v. UAMS, CLAIM NO. 250191, RESPONSE TO CLAIMANTS' FIRST SET OF INTERROGATORIES AND REQUESTS FOR PRODUCTION OF DOCUMENTS ON BEHALF OF THE UNIVERSITY OF ARKANSAS FOR MEDICAL SCIENCES

BEFORE THE ARKANSAS STATE CLAIMS COMMISSION

SEAN LYNN AND
LAURA HAMMETT **CLAIMANTS**

V. **NO. 250191**

UNIVERSITY OF ARKANSAS
FOR MEDICAL SCIENCES **RESPONDENT**

RESPONSE TO CLAIMANTS' FIRST SET OF INTERROGATORIES AND REQUESTS FOR PRODUCTION OF DOCUMENTS ON BEHALF OF THE UNIVERSITY OF ARKANSAS FOR MEDICAL SCIENCES

Comes now Respondent, University of Arkansas for Medical Sciences (UAMS), by and through its undersigned counsel, and for its Response to Claimants' First Set of Interrogatories and Requests for Production of Documents, states as follows.

OBJECTIONS

Respondent objects to the instructions and definitions set forth by Claimants. These discovery requests are being answered only in accordance with Arkansas law and not in accordance with any instructions or definitions of Claimants. Respondent will supplement its responses to Claimants' discovery after obtaining all the records and the pertinent deposition testimony of the fact witnesses and any expert witnesses. All references to the medical record by Respondent herein are to the Legal Medical Record generated on April 29, 2025 and provided to Claimants on May 9, 2025 by email to Claimant Laura Hammett.

INTERROGATORIES

INTERROGATORY NO. 1: Please identify all individuals who you believe have any information regarding the denials you made in your answer. Include in your response the following information:

a. Name;

b. Address;

c. Telephone number;

d. Whether the individual is a lay witness or expert witness; and

e. A general summary of what information the witness may have.

ANSWER: UAMS objects to this interrogatory as vague, ambiguous, overbroad, and unduly burdensome. Notwithstanding the objection, UAMS believes that all individuals listed in the medical record may have information relevant to this matter. While most of those individuals are medical professionals and may qualify as experts, their testimony in this matter will be primarily factual. Should UAMS determine that any of the medical professionals listed in the medical record will be an expert witness in this matter, UAMS will supplement this response at the appropriate time. The factual information each individual will rely upon is contained within the medical record unless stated otherwise in these or other discovery responses on behalf of UAMS. All UAMS employees may be contacted through UAMS counsel. In addition to the individuals listed in the medical record, the following individuals may have information and may be contacted through UAMS counsel:

1. Kathy Flores, former Sr. Manager of Patient Relations, may have information regarding complaints raised by Claimants.
2. Lisa Varner, CSM H-4, may have general information regarding Lynn's care and treatment while a patient on H-4. Additionally, Varner has knowledge about policies, procedures and processes applicable to nursing, the types of patients on H-4 and the general care provided to patients on H-4.

3. Terry Jones, Executive Director and Chief Security Officer of the Department of Public Safety, has knowledge about the security cameras used at UAMS, including the locations and how long recordings are preserved.
4. Mark Kolody, Director of Security and Support Services, has knowledge about the security cameras used at UAMS, including the locations and how long recordings are preserved.
5. Kristy Bienvenu, Risk Management Coordinator, may have information regarding complaints raised by Claimants.
6. Robyn Horn, Director of Clinical Risk, Patient Safety and Patient Relations, may have information regarding complaints raised by Claimants as well as the UAMS policies and procedures related to Clinical Risk, Patient Safety and Patient Relations.

INTERROGATORY NO. 2: Please identify all illnesses, conditions and injuries that Sean Lynn was diagnosed with by a medical provider at UAMS before Lynn was first restrained physically or chemically by UAMS. Identify the medical provider who diagnosed him with each illness, condition or injury, the date and time of the diagnosis.

ANSWER: UAMS objects to this interrogatory as vague, ambiguous, argumentative, overbroad, unduly burdensome, and not reasonably calculated to lead to the discovery of admissible evidence. Notwithstanding the objection, the medical record of Lynn's hospitalization at UAMS from January 13-27, 2024 contains all diagnoses made by UAMS medical providers during the entirety of the hospitalization. Claimants have previously been provided multiple copies of the medical record.

INTERROGATORY NO. 3: Identify each person who restrained Lynn from leaving the hospital by physically tackling him, using hand restraints, using foot restraints, using a

harness, forcing Lynn to ingest or be injected with chemical restraints, threatening to or requesting assistance from security or UAMS PD, or any combination of these tactics? What were the time periods each person took part in the restraint?

ANSWER: UAMS objects to this interrogatory as argumentative and unduly burdensome. Notwithstanding the objection, the medical record of Lynn's hospitalization at UAMS from January 13-27, 2024 contains documentation of use of physical restraints on Lynn to protect him from harming himself. See, e.g., pp. 632-642, 821-841. There are multiple sections of the record labeled "User Key" or "Attribution Key" which identifies the initials throughout the record. UAMS denies that Lynn was tackled, chemically restrained, or threatened by security or UAMS PD.

INTERROGATORY NO. 4: Identify each UAMS employee who told Hammett that UAMS does not administer benzodiazepines to TBIs.

ANSWER: UAMS objects to this interrogatory at it seeks information in the possession of or known to Claimants. Notwithstanding the objection, UAMS is without sufficient information to determine every UAMS employee that Hammett had contact with during Lynn's hospitalization January 13-27, 2024 or anytime thereafter.

INTERROGATORY NO. 5: Identify each person who told Hammett that UAMS does not administer opioids to TBIs?

ANSWER: UAMS objects to this interrogatory at it seeks information in the possession of or known to Claimants. Notwithstanding the objection, UAMS is without sufficient information to determine every UAMS employee that Hammett had contact with during Lynn's hospitalization January 13-27, 2024 or anytime thereafter.

INTERROGATORY NO. 6: For each food or drink presented by UAMS to Lynn for consumption, list when the food or drink was presented, how Lynn was supposed to eat or drink (whether his hands were restrained), and an ingredient list for the food and drinks.

ANSWER: UAMS does not routinely maintain the information requested and does not have this information for Lynn. Notwithstanding, Lynn was given only a liquid diet and/or a feeding tube until just a few hours before he left the hospital against medical advice.

INTERROGATORY NO. 7: Referring to Med. Rec. 4/29/25 at 1292 and 2: There was a consent form and privacy notice signed by Lynn's former girlfriend, Lisette Reyes, on January 14, 2024 at 4:09 p.m. and 4:10 p.m. respectively. Identify all documents showing consent given by Sean Lynn or Laura Hammett, Lynn's next-of-kin who was at Lynn's bedside from approximately for Lynn's hospitalization at UAMS Medical Center, allowing invasive procedures or agreeing to the use of controlled substances.

ANSWER: The signature on the consent in the medical record—Admission/Consent Agreement—is not legible, and the form speaks for itself. Based on other documentation in the medical record, it appears that Lisette Reyes was at the bedside with Lynn in the emergency department. According to the medical record, Lynn did not have any invasive procedures during his admission January 13-27, 2024. Additionally, separate written consent is not required for medication administration, and the medical record indicates that Lynn refused medications several times during his admission.

INTERROGATORY NO. 8: Were there surveillance cameras in any room in which Lynn was kept, the hallways on the floor where Lynn was kept, the stairwell Lynn went down during an attempt to leave, the elevator area where Lynn was chased to by UAMS staff? If so, list each camera as UAMS identifies it and the location of the camera.

ANSWER: UAMS maintains security cameras throughout the campus including on the unit where Lynn was a patient; however, security cameras are not used in patient rooms. In certain circumstances an Avasure camera, which is a camera on wheels that is sometimes referred to as a telesitter, may be used to assist in monitoring a patient; however, no such camera was used in Lynn's room.

INTERROGATORY NO. 9: Identify each person who accessed fentanyl from any medication dispensing system (including Pyxis or equivalent) by cabinet override at any time during Claimant's admission. For each such instance, state:

a. The name and job title of the person who performed the override;

b. The date, time, and location of the override;

c. The quantity of medication accessed;

d. Whether the medication was administered to the Claimant, to another patient, or not administered at all;

e. Whether the medication was properly documented as administered or wasted; and

f. The reason the cabinet override was performed rather than following standard medication dispensing procedures.

ANSWER: UAMS objects to this interrogatory as vague, ambiguous, overly broad, unduly burdensome, and not reasonably calculated to lead to the discovery of admissible evidence. Whether fentanyl was accessed as described for any patient during Lynn's admission, including Lynn, is irrelevant to Claimants' claims.

INTERROGATORY NO. 10: Identify each person who accessed haloperidol from any medication dispensing system (including Pyxis or equivalent) by cabinet override at any time during Claimant's admission. For each such instance, state:

a. The name and job title of the person who performed the override;

b. The date, time, and location of the override;

c. The quantity of medication accessed;

d. Whether the medication was administered to the Claimant, to another patient, or not administered at all;

e. Whether the medication was properly documented as administered or wasted; and

f. The reason the cabinet override was performed rather than following standard medication dispensing procedures.

ANSWER: UAMS object to this interrogatory as vague, ambiguous, overly broad, unduly burdensome, and not reasonably calculated to lead to the discovery of admissible evidence. Whether haloperidol was accessed as described for any patient during Lynn's admission, including Lynn, is irrelevant to Claimants' claims.

INTERROGATORY NO. 11: Explain why the Billing Detail by Date generated on 02/21/24 reflects the following charge: "01/13/24 0636 J3010 Fentanyl per 0.1 mg (0409-9094-12) 1 11.35" when the medical record dated 04/29/25 contains the following entries reflecting no documented administration:

- Page 69 – Initial entry showing 0 mcg administered and marked "stopped".
- Page 84 – Additional entries on the same date, again ending in "stopped".
- Page 500 – Order by Dr. Natalie Applebaum showing 50 mcg ordered, 0 mcg remaining/total, and marked "completed (past end date/time)".
- Page 547 – Cabinet override entry marked "Active" with no documentation of administration.

- Page 548 – Duplicate of the Page 500 entry showing 50 mcg (0/1) and marked "completed (past end date/time)". Specifically, identify who authorized the charge, who documented the administration (if anyone), and produce any supporting records showing that fentanyl was actually administered or properly wasted in accordance with hospital protocol.

ANSWER: UAMS object to this interrogatory as vague, ambiguous, overly broad, unduly burdensome, and not reasonably calculated to lead to the discovery of admissible evidence. Notwithstanding the objection, on page 84 of the UAMS medical record, it indicates that Dr. Applebaum, an Emergency Department physician, ordered a 50 mcg dose of fentanyl via injection into the IV line for Lynn while he was in the Emergency Department, and Emergency Department nurse Nathan Ernst administered the fentanyl per the order.

INTERROGATORY NO. 12: Might a reasonable person conclude that the use of four-point restraints posed a significant risk to Patient Lynn, given that the heavy breathing associated with physical struggle increases thoracic pressure, which can in turn elevate intracranial pressure (ICP), potentially exacerbating a cerebrospinal fluid (CSF) leak by placing additional strain on the surrounding membranes?

ANSWER: UAMS objects to this interrogatory as it calls for pure conjecture and speculation. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS.

INTERROGATORY NO. 13: Do Lynn's dry, chapped lips as shown in photographs on Med. Rec. 4/29/25 at 1295 and 1297 indicate dehydration?

ANSWER: UAMS objects to this interrogatory as it calls for pure conjecture and speculation, is not reasonably calculated to lead to the discovery of admissible evidence and is not relevant to any of the claims raised by Claimants. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

INTERROGATORY NO. 14: Did Lynn have dry, chapped lips upon arrival at UAMS? If so, please identify any documentation reflecting this observation.

ANSWER: UAMS objects to this interrogatory as it calls for pure conjecture and speculation is not reasonably calculated to lead to the discovery of admissible evidence and is not relevant to Claimants' claims. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

INTERROGATORY NO. 15: Based on Lynn's initial condition at UAMS — including a GCS score of 14, a Wong-Baker FACES Pain Rating of "Hurts a little bit," and other vitals documented on Med. Rec. 4/29/25 at pages 77 and 78 — was his presentation more consistent with a fall from a 10-foot-high ladder rung or a 30-foot-high rung?

ANSWER: UAMS objects to this interrogatory it calls for pure conjecture and speculation, is not reasonably calculated to leave to the discovery of admissible evidence, and is not relevant to Claimants' claims. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection,

UAMS notes that in one of Hammett's own recordings on or about January 29, 2024, she states that Lynn fell from a height of 34 feet. UAMS further refers Claimants to the medical record, which speaks for itself.

INTERROGATORY NO. 16: Why did UAMS refuse to amend its medical record to reflect that the fall was from the 10-foot-high rung of the ladder, as requested in Lynn's Request for Amendment of Health Information dated 4/26/2024 (see additional sheet, page 2)?

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Notwithstanding the objection, UAMS notes that in one of Hammett's own recordings on or about January 29, 2024, she states that Lynn fell from a height of 34 feet.

INTERROGATORY NO. 17: According to the NCBI/NIH study "Falls from Height: A Retrospective Analysis" (https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5717375/), survivors had a mean GCS score of 14.40 ± 1.55, while the mean for non-survivors was 6.00 ± 2.73. In light of Lynn's GCS never falling below 13 and most often recorded as 14, could a reasonable person conclude that he had a high likelihood of survival?

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, is not reasonably calculated to lead to the discovery of admissible evidence, and is not relevant to Claimants' claims. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

INTERROGATORY NO. 18: Identify all legal authority, hospital policy, or medical documentation that UAMS relied upon to justify detaining the Claimant on or after January 13, 2024, including but not limited to:

a. Any psychiatric hold or commitment documentation;

b. Any documentation used to determine that the Claimant lacked capacity or decision-making ability, including how that determination was made and by whom;

c. Any court order, guardianship determination, or other legal authorization;

d. Any identified medical condition that allegedly posed an immediate risk of serious harm if the Claimant were to leave the hospital;

and identify the person(s) who made each such determination.

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

INTERROGATORY NO. 19: Why did UAMS refuse to recognize Hammett as a surrogate decision-maker for Lynn prior to January 27, 2024?

ANSWER: UAMS did not refuse to recognize Hammett as a surrogate decision maker for Lynn prior to January 27, 2024.

INTERROGATORY NO. 20: On Med. Rec. 4/29/25, there are notations in the format "XY.NZ," where XY appears to be the initials of the documenting provider, N is a numeral,

and Z is a code (Claimants have identified "T," "M," and "C," though others may exist). Please identify the meaning of each numeral (N) and code (Z).

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, overbroad, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have not provided specific locations in the medical record for each numeral and code. Notwithstanding the objection, the format listed by Claimants indicates as follows: XY are the initials of the documenting provider and the Attribution Key throughout the medical record identifies who the initials belong to, N is the version of entry by that provider, and Z is the type of entry - Manual, Template, or Copied.

INTERROGATORY NO. 21: Does UAMS contend that it is legally permissible to detain a patient against their will solely on the basis of "agitation"?

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

INTERROGATORY NO. 22: For each modification, alteration, addition, or other change made to any entry on Med. Rec. 4/29/25, identify:

a. The person who made the change;

b. Whether the change was a modification, deletion, or addition;

c. What the original entry stated (if altered), or whether the change was a new addition; and

d. provide supporting documentation of each change, pursuant to Request for Production No. 3.

ANSWER: UAMS objects to this interrogatory as vague, ambiguous, overly broad, unduly burdensome and harassing, and not reasonably calculated to lead to the discovery of admissible evidence. Notwithstanding the objection, Claimants have already been provided a copy of the medical record that was generated on April 29, 2025 which contains all information regarding Lynn's treatment at UAMS January 13-27, 2024. Additionally, UAMS previously provided copies of all versions of notes that were redacted to Claimants by email on July 2, 2025. The Attribution Keya and User Keys listed in the medical record identifies each person responsible for the record entry and the date/time stamp the entry was made.

INTERROGATORY NO. 23: Identify each instance in which UAMS referred to Sean Lynn's attempts to leave the facility between January 13, 2024, and January 21, 2024, using the term "elope" rather than "escape". For each such instance, provide the following:

a. The date and time of the attempted departure;

b. The specific language used in any documentation, including nursing notes, physician reports, security records, or internal communications;

c. The name and role of each person who authored, edited, or approved that documentation;

d. Whether Mr. Lynn was physically restrained, verbally threatened, or otherwise prevented from leaving during that event;

e. Whether Mr. Lynn expressed a desire to leave and was denied the right to do so;

f. Whether any UAMS personnel contacted a legal representative, guardian, or family

member before or after the event;

g. The justification UAMS claims for categorizing the incident as an "elopement" rather than an "escape."

ANSWER: UAMS objects to Claimants' Request as argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

INTERROGATORY NO. 24: Did Lynn attack a healthcare worker during his confinement? If so, when, provide a description and list the documentation that supports an affirmative answer such as a police report or surveillance video.

ANSWER: There is no indication in the medical record or in UAMS PD incident reports that Lynn attacked a healthcare worker during his admission to UAMS.

INTERROGATORY NO. 25: Did Lynn threaten to harm a healthcare worker during his confinement? If so, when, provide a description and list the documentation that supports an affirmative answer.

ANSWER: There is no indication in the medical record or in UAMS PD incident reports that Lynn threatened to harm a healthcare worker during his admission to UAMS.

INTERROGATORY NO. 26: Other than while attempting to stop a procedure or leave the hospital, did Lynn harm himself? If so, when, provide a description and list the documentation that supports an affirmative answer.

ANSWER: The medical record documents that Lynn was placed on a 72 hour hold once during his January 13-27, 2024 admission to UAMS, and there were multiple orders for physical restraints because of Lynn's actions removing IV lines, foley catheters, and medical equipment and his lack of capacity to understand the impact of his actions that put him at high risk for further injury.

INTERROGATORY NO. 27: Did Lynn express a desire to die? If so, when, provide a detailed description including identification of the person whom Lynn allegedly communicated his intent and list the documentation that supports an affirmative answer.

ANSWER: There is no indication in the medical record that Lynn expressed a desire to die.

INTERROGATORY NO. 28: Did Lynn express a desire to harm himself? If so, when, provide a detailed description including Lynn's stated plan, identification of the person whom Lynn allegedly communicated his intent and list the documentation that supports an affirmative answer.

ANSWER: There is no indication in the medical record that Lynn expressed a desire to harm himself. However, the medical record documents that Lynn was placed on a 72 hour hold once during his January 13-27, 2024 admission to UAMS, and there were multiple orders for physical restraints because of Lynn's actions removing IV lines, foley catheters, and medical equipment and his lack of capacity to understand the impact of his actions that put him at high risk for further injury.

INTERROGATORY NO. 29: Did UAMS restrain Lynn by strapping him to a bed so as to interfere substantially with Lynn's liberty? If so, identify each person who applied the restraints, identify each person who ordered the use of restraints, and list each time the restraints were applied and removed by UAMS.

ANSWER: UAMS objects to Claimants' Request as it is ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

INTERROGATORY NO. 30: List each time Lynn removed physical restraints without the help of UAMS.

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

INTERROGATORY NO. 31: List each time Lynn refused to take a chemical restraint orally and describe how the chemical was introduced into Lynn's body, identifying who ordered the use of the chemical restraint and who administered the chemical restraint.

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Notwithstanding the objection, UAMS denies that chemical restraints were used on Lynn during his January 13-27, 2024 admission to UAMS.

INTERROGATORY NO. 32: Did UAMS restrain Lynn by having several persons tackle him so as to interfere substantially with Lynn's liberty? If yes, identify each person who had bodily contact with Lynn in an effort to contain Lynn on a hospital bed, the date and time.

ANSWER: No.

INTERROGATORY NO. 33: During the hospitalization, was Lynn "Incompetent", meaning unable to care for himself because of physical or mental disease or defect?

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

INTERROGATORY NO. 34: Assuming Hammett's birthdate is in 1962, was Hammett over 60 years of age during the hospitalization?

ANSWER: UAMS objects to this interrogatory as argumentative, harassing because of its outlandish nature, assuming facts not in evidence, is not reasonably calculated to lead to the discovery of admissible evidence and not relevant to Claimants' claims. Notwithstanding the objection, conventional math dictates that an individual born in 1962 would be over 60 years old in January 2024.

INTERROGATORY NO. 35: Did UAMS' insistence that Lynn remain hospitalized expose him to a substantial risk of serious physical injury? For example:

a. Could Lynn have sustained serious injury while running down the stairs with UAMS employees in pursuit?

b. Could Lynn have sustained serious injury while struggling against one or more UAMS employees as they attempted to strap him to a bed?

c. Could UAMS Police Department have mistakenly perceived Lynn as a threat as he fled the hospital and shot him, potentially fatally?

d. Could UAMS' decision to catheterize Lynn, instead of addressing his stated need to urinate and desire to leave, have resulted in Lynn pulling out the catheter in an attempt to escape, thereby causing injury?

e. Could the trauma inherent in being treated like a prisoner have delayed the healing process from his brain injury or caused permanent psychological or neurological damage?

f. Could forcing Lynn—a person with a history of substance abuse—to take benzodiazepines, barbiturates, or fentanyl have triggered a relapse into drug or alcohol use, which the court may take judicial notice is physically harmful?

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, as it is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

INTERROGATORY NO. 36: Had Hammett not continued efforts to negotiate Lynn's release and instead participated in his escape (e.g., by throwing blocks or driving the escape vehicle), would Hammett have faced a substantial risk of serious physical harm? For example:

a. Being shot by a UAMS police officer;

b. Falling down the hospital stairs; or

c. Being shoved into an elevator wall during a struggle.

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS.

INTERROGATORY NO. 37: Would Hammett, as caretaker of Lynn's 8-year-old daughter, C.L., have been able to spend more time with Lynn if UAMS had allowed her to bring C.L. into the hospital room where Lynn was confined?

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS.

INTERROGATORY NO. 38: Is it reasonable to believe that Lynn would have experienced substantial therapeutic benefit from the company of his daughter during the two weeks following his traumatic brain injury?

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims

through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS.

INTERROGATORY NO. 39: Please watch the following videos of Lynn taken shortly after his release from UAMS Against Medical Advice (AMA), located on YouTube at the channel @StopBigBusinessBillionaires:

- https://www.youtube.com/shorts/x7Tg_RfYA2k
- https://www.youtube.com/shorts/E6Ss-1CY1x0
- https://www.youtube.com/watch?v=y3T7iZP-CdI

These and other videos will be included in our production of documents. However, for immediate access, please view them via the links above. Based on your review, does Lynn appear agitated in these videos?

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS.

INTERROGATORY NO. 40: Identify all video footage of Lynn being wheeled from the ICU floor to the front of the hospital building on January 27, 2024? Does the video depict Lynn in an agitated state or does he appear calm?

ANSWER: UAMS does not have security video footage of Lynn during his admission to UAMS from January 13 to 27, 2024. Additionally, UAMS was not put on notice sufficient

to establish that it was required to place a litigation hold on any possible security video footage during Lynn's hospitalization January 13-27, 2024.

INTERROGATORY NO. 41: On January 29, 2024, at approximately 10:00 a.m., UAMS placed a call to Lynn at (213) 716-5231. Lynn authorized Hammett to speak for him as an ADA accommodation for hearing loss and aphasia. Hammett began recording the call at 10:03 a.m., after being transferred. The video of the call is posted on Hammett's YouTube at https://www.youtube.com/watch?v=4ggx0nLuNMk and will be included in the first production of documents as file "20240129_1003 UAMS initiated call to Lynn Hammett transferred left message lawsuit.mp4".

A) Identify the person who received the voicemail.

B) Was this a clearly stated threat of litigation requiring a litigation hold on UAMS generated videos?

C) Identify all documentation of the message Hammett left.

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, is vague, ambiguous, argumentative, overbroad, and is not reasonably calculated to lead to the discovery of admissible evidence. Notwithstanding the objection, UAMS is without sufficient information to determine who Hammett allegedly spoke to January 29, 2024 as the person is not identified in the video. As a result, UAMS cannot identify the individual or respond to Claimants' additional requests in this interrogatory.

INTERROGATORY NO. 42: Please identify and describe in detail any and all facts known to you regarding the administration of Ciprofloxacin-Dexamethasone 0.3%-0.1% (eye/ear drops) to Lynn during their admission from January 13, 2924 to January 27, 2024, including:

a. The total number of doses ordered, the frequency (e.g., BID), and the duration of the prescribed regimen;

b. The total number of doses actually administered to the patient, including the date and time of each administration;

c. An explanation for any missed, delayed, or undocumented doses, including whether such omissions were due to staff error, medication unavailability, patient refusal, or any other reason;

d. identify each person involved in the ordering, administration, or oversight of this medication during the relevant time period;

e. An explanation of why there is a discrepancy between the administration logs on pages 482–483 of Med. Rec. 4/29/25 (which document 18 administrations) and the daily record (which reflects only five administrations);

f. Whether any adverse outcomes, complications, or deviations in recovery were noted by clinical staff in connection with missed or omitted doses of this medication; and

g. A copy of all internal communications, incident reports, or quality assurance reviews conducted in response to this discrepancy, if any.

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, is vague, ambiguous, argumentative, overbroad, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

REQUESTS FOR PRODUCTION OF DOCUMENTS

REQUEST FOR PRODUCTION NO. 1: Produce copies of all documents, records, communications, correspondence, or recordings—whether or not specifically requested herein—that were used, identified, or relied upon to answer, support, or substantiate your responses to these interrogatories, or that support your denials in your answer or any future defenses.

ANSWER: The medical record generated on April 29, 2025 is the primary document utilized to respond to Claimants' discovery requests. That record was previously produced to Claimants.

REQUEST FOR PRODUCTION NO. 2: For each expert you intend to call as a witness, produce copies of the following:

(a) the expert's current curriculum vitae;

(b) any written report prepared by the expert containing their opinions and conclusions regarding the matters on which they may testify at hearing; and

(c) any underlying data, resource materials, written documents, computer programs, or other materials produced or utilized by the expert in forming their opinions, preparing their written report, or preparing for their testimony.

ANSWER: UAMS believes that all individuals listed in the medical record may have information relevant to this matter. While most of those individuals are medical professionals and may qualify as experts, their testimony in this matter will be primarily factual. Should UAMS determine that any of the medical professionals listed in the medical record will be an expert witness in this matter, UAMS will supplement this response at the appropriate time. The factual information each individual will rely upon is contained within

the medical record unless stated otherwise in these or other discovery responses on behalf of UAMS.

REQUEST FOR PRODUCTION NO. 3: Produce any audit trail, revision history, or similar document for the Medical Record generated 4/29/25, showing all modifications, changes, updates, or other alterations to original entries, and identify what the original, contemporaneous entries stated.

ANSWER: UAMS objects to this interrogatory as vague, ambiguous, overly broad, unduly burdensome and harassing, and not reasonably calculated to lead to the discovery of admissible evidence. Notwithstanding the objection, Claimants were provided a copy of the medical record generated on April 29, 2025 which contains all information regarding Lynn's treatment at UAMS January 13-27, 2024. Additionally, UAMS provided copies of all versions of notes that were redacted to Claimants by email on July 2, 2025.

REQUEST FOR PRODUCTION NO. 4: Produce all incident reports, security reports, staff statements, or other documentation identifying each person involved in physically restraining Lynn or participating in efforts to prevent him from leaving the hospital, as referenced in Interrogatory No. 3.

ANSWER: UAMS objects to this interrogatory as argumentative and unduly burdensome. Notwithstanding the objection, the medical record of Lynn's hospitalization at UAMS from January 13-27, 2024 contains documentation of use of physical restraints on Lynn to protect him from harming himself.

REQUEST FOR PRODUCTION NO. 5: Produce any policies, guidelines, protocols, or written materials regarding the administration or avoidance of benzodiazepines and opioids

in the treatment of patients with traumatic brain injuries (TBI), as referenced in Interrogatories No. 4, 5, 9, 11, and 35(f).

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, is not reasonably calculated to lead to the discovery of admissible evidence, and is not relevant to Claimants' claims. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS.

REQUEST FOR PRODUCTION NO. 6: Produce all dietary records, menus, ingredient lists, and nutritional information for food or beverages presented by UAMS to Lynn for consumption, as referenced in Interrogatory No. 6.

ANSWER: This information is no longer available.

REQUEST FOR PRODUCTION NO. 7: Produce copies of any and all documents showing consent given by Sean Lynn or Laura Hammett for Lynn's hospitalization at UAMS Medical Center, allowing invasive procedures or agreeing to the use of controlled substances as referenced in Interrogatory No. 7.

ANSWER: Copies of consent documents are provided in the medical records which has been previously provided to Claimants.

REQUEST FOR PRODUCTION NO. 8: Produce a map or description identifying the locations of all surveillance cameras in the rooms, hallways, stairwells, and elevator areas where Lynn was housed or pursued, as referenced in Interrogatories No. 8, 24, and 40, along with any video footage captured by those cameras.

ANSWER: UAMS produced a document containing the location of the cameras to Claimant Hammett on June 23, 2025 in response to a request under the Arkansas Freedom

of Information Act. Additionally, counsel for UAMS arranged for Claimant Hammett to tour H4 and F4 with the Executive Director of Public Safety on July 1, 2025 to see the locations of the cameras as well. Additionally, see attached .pdf which is best viewed at 200% or higher in order to see details.

REQUEST FOR PRODUCTION NO. 9: Produce all system logs, access records, and audit trails showing cabinet overrides or other medication dispensing activity for fentanyl and haloperidol during Lynn's admission, as referenced in Interrogatories No. 9, 10, and 11.

ANSWER: UAMS objects to this Request as vague, ambiguous, overly broad, unduly burdensome, and not reasonably calculated to lead to the discovery of admissible evidence. Whether fentanyl or haloperidol was accessed as described for any patient during Lynn's admission, including Lynn, is irrelevant to Claimants' claims.

REQUEST FOR PRODUCTION NO. 10: Produce all billing records, audit trails, and supporting documentation related to the fentanyl charge listed in the Billing Detail by Date report generated on February 21, 2024, as referenced in Interrogatory No. 11.

ANSWER: UAMS objects to this Request as vague, ambiguous, overly broad, unduly burdensome, and not reasonably calculated to lead to the discovery of admissible evidence. Notwithstanding the objection, billing records have already been produced to Claimants. With regard to the audit trail, see response to Request for Production No. 3.

REQUEST FOR PRODUCTION NO. 11: Produce any internal risk assessments, staff discussions, or policy documents addressing the risks of using physical or chemical restraints on patients with suspected or confirmed brain injuries, including any references to increased intracranial pressure, as referenced in Interrogatory No. 12.

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, is not reasonably calculated to lead to the discovery of admissible evidence, and is not relevant to Claimants' claims. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

REQUEST FOR PRODUCTION NO. 12: Produce all photographs, medical notes, and assessments documenting Lynn's hydration status, including any references to dry or chapped lips, as referenced in Interrogatories No. 13 and 14.

ANSWER: If Lynn had hydration issues, it would be noted in the medical record, which speaks for itself.

REQUEST FOR PRODUCTION NO. 13: Produce all records reflecting Lynn's vital signs, pain scale ratings, and Glasgow Coma Scale (GCS) score upon admission, as referenced in Interrogatories No. 15 and 17.

ANSWER: Please see the medical record which has been previously produced to Claimants and speaks for itself.

REQUEST FOR PRODUCTION NO. 14: Produce all records, communications, or responses related to Lynn's Request for Amendment of Health Information dated April 26, 2024, as referenced in Interrogatories No. 14 and 16.

ANSWER: UAMS objects to this request as vague, ambiguous, overly broad, unduly burdensome and harassing, and not reasonably calculated to lead to the discovery of admissible evidence. Notwithstanding the objection, see attached documents which

Claimants have already been provided. Additionally, UAMS previously provided copies of all versions of notes that were redacted by email on July 2, 2025.

REQUEST FOR PRODUCTION NO. 15: Produce any risk assessments, clinical studies, or staff discussions evaluating Lynn's likelihood of survival based on his reported GCS score of 14, as referenced in Interrogatories No. 15 and 17.

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, is not reasonably calculated to lead to the discovery of admissible evidence, and is not relevant to Claimants' claims. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

REQUEST FOR PRODUCTION NO. 16: Produce all policies, procedures, or legal documents relied upon to justify Lynn's continued detention in the hospital, as referenced in Interrogatory No. 18.

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, overbroad, argumentative, is not reasonably calculated to lead to the discovery of admissible evidence, and is not relevant to Claimants' claims. Moreover, this Request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

REQUEST FOR PRODUCTION NO. 17: Produce all communications or documentation regarding the refusal to recognize Hammett as Lynn's surrogate prior to January 27, 2024, as referenced in Interrogatory No. 19.

ANSWER: UAMS did not refuse to recognize Hammett as Lynn's surrogate. There is no formal documentation in the medical record appointing a surrogate; however, the medical records indicate that UAMS medical providers recognized Hammett as the surrogate decision maker for Lynn.

REQUEST FOR PRODUCTION NO. 18: Produce any legend, key, or explanatory document identifying the meaning of the notations in the format "XY:NZ" used in Med. Rec. 4/29/25, as referenced in Interrogatory No. 20.

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, overbroad, and is not reasonably calculated to lead to the discovery of admissible evidence. Notwithstanding the objection, there is no document containing the explanation sought; however, please see Answer to Interrogatory No. 20 for the explanation.

REQUEST FOR PRODUCTION NO. 19: Produce all policies, legal opinions, or clinical guidelines indicating whether "agitation" is a sufficient justification for detaining a patient against their will, as referenced in Interrogatory No. 21.

ANSWER: UAMS objects to Claimants' Request as it calls for pure conjecture and speculation, is not reasonably calculated to lead to the discovery of admissible evidence, and is not relevant to Claimants' claims. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

REQUEST FOR PRODUCTION NO. 20: Produce all reports, incident summaries, or medical records documenting any allegations that Lynn attacked a healthcare worker or expressed suicidal ideation, as referenced in Interrogatories No. 24 through 28.

ANSWER: N/A.

REQUEST FOR PRODUCTION NO. 21: Produce all records or reports documenting the use of physical or chemical restraints on Lynn, including bed restraints, physical takedowns, and medications administered for behavior control, as referenced in Interrogatories No. 25 through 27.

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, overbroad, and argumentative. Notwithstanding the objection, UAMS denies that it used chemical restraints or physical takedowns. Additionally, UAMS refers Claimants to the medical record, which speaks for itself,.

REQUEST FOR PRODUCTION NO. 22: Produce any risk assessments, incident reports, or staff communications addressing the risks associated with Lynn's confinement or his attempts to escape, as referenced in Interrogatories No. 30, 31, and 32.

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

REQUEST FOR PRODUCTION NO. 23: Produce all policies, legal documents, or risk assessments concerning the rights and abilities of family members to provide care and support to hospitalized patients, as referenced in Interrogatory No. 37.

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the

discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

REQUEST FOR PRODUCTION NO. 24: Produce all clinical studies, internal communications, or policies addressing the therapeutic value of allowing patients with traumatic brain injuries to have contact with their children, as referenced in Interrogatory No. 38.

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

REQUEST FOR PRODUCTION NO. 25: Produce all notes, assessments, or internal communications documenting Lynn's level of agitation and whether discharge or release was considered as a method to reduce that agitation.

ANSWER: UAMS objects to Claimants' Request as it is vague, ambiguous, argumentative, overbroad, calls for a legal conclusion, and is not reasonably calculated to lead to the discovery of admissible evidence. Moreover, this request is unduly burdensome as Claimants have the burden of proving their claims through expert testimony, and this Request impermissibly attempts to shift this burden to UAMS. Notwithstanding the objection, UAMS refers Claimants to the medical record, which speaks for itself.

Respectfully submitted,

UNIVERSITY OF ARKANSAS
FOR MEDICAL SCIENCES,
Respondent
